1	Energy Development in the World and China	1
1.1	World Energy Development Review	2
1.1.1	World Economy and Energy Consumption Are Significantly Correlated When Taking a Statistical Perspective	2
1.1.2	Different Energy Demand Elasticities of GDP in Different Development Stages	3
1.1.3	Different Decreasing Rates of Energy Intensity Across Countries	4
1.1.4	There Is no Significant Improvement in the World's Unbalanced Energy Consumption	5
1.1.5	Energy Poverty and the Induced Health Issues Are Still Serious	6
1.1.6	World Energy Trade Increases Steadily and Natural Gas Emerges Progressively	6
1.1.7	Fossil Fuel-Based Energy Consumption Has Caused Serious Pollution Are Carbon Emissions	10
1.2	New Trends of World Energy Development from 2008 to 2010	12
1.2.1	Recent Changes in the World Economy and the Global Financial Crisis	12
1.2.2	Recent Changes in World Energy Development	14
1.3	Energy Structural Changes in the G7 and BRICs	18
1.4	Review of China's Energy Development	32
1.4.1	Rapid Economic Growth with a Lower Energy Consumption Growth Rate	32
1.4.2	Energy Supply Maintains a Rapid Growth Rate While the Energy Self-sufficiency Rate Has Declined	34

1.4.3	Less Carbon-Intensive and Cleaner Energy Structure and More Energy-Intensive Economic Structure	37
1.4.4	CO ₂ Emissions Grow Rapidly and CO ₂ Abatement Pressures Increase	38
1.5	New Changes and Trends in China's Energy Development	39
1.5.1	Reform of the Energy Management Mechanism Keeps Moving	39
1.5.2	Energy Demand Growth Rate Decreased Due to the Business Cycle	40
1.5.3	Energy Supply Diversification Is Accelerating	41
1.5.4	Striking Advances in Energy Conservation Development	42
1.5.5	China's Energy Flow Analysis in 2008	44
1.6	Challenges and Reactions of China's Energy Development	47
1.6.1	Huge Energy Demand with Considerable Uncertainty	47
1.6.2	Insufficient Per Capita Energy Resources, Especially High-Quality Ones	47
1.6.3	New Challenges Facing Energy Development Due to Global Climate Change	48
1.6.4	Global Climate Change Has Brought About New Energy Challenges	48
1.6.5	An Important and Effective Way of Facing Challenges: Improving Energy Efficiency	49
	References	50
2	Relationship Between Energy Efficiency and the Economic System: Measuring Energy Efficiency	53
2.1	Reconsideration of Energy Efficiency and Its Relation to the Economic System	54
2.1.1	Understanding Energy Efficiency	54
2.1.2	Measuring Energy Efficiency	55
2.1.3	Energy Efficiency and the Economic System	57
2.1.4	Energy Efficiency and Energy Conservation	63
2.2	Indicators and Measurement of Energy Efficiency	64
2.2.1	Energy Macro-efficiency	65
2.2.2	Energy Physical Efficiency	67
2.2.3	Energy Thermodynamics Efficiency	68
2.2.4	Energy Value Efficiency	69
2.2.5	Energy Allocation Efficiency	70
2.2.6	Energy Utilization Efficiency	74
2.2.7	Energy Economic Efficiency	76
2.3	Summary	78
	References	80

3	Impact of Economic Structural Changes on Energy	
	Macro-efficiency	81
3.1	Linkages of the Industrial Structure and Energy Intensity.	82
3.1.1	Statistical Description of the Change in Energy Intensity	82
3.1.2	Impacts of Internal Industrial Structural Change on Energy Intensity	86
3.1.3	Further Discussion of the Decomposition Method	96
3.2	Final Demand Structure and Energy Efficiency.	97
3.2.1	Marginal Energy Consumption of Different Final Demands	97
3.2.2	Study on the Expenditure Elasticity of Residual Energy Consumption	103
3.2.3	Analysis of the Elasticity of Energy Macro-efficiency to the Investment Ratio	105
3.2.4	Analysis of the Direct and Embodied Energy Exports	107
3.3	Impact of the National Income Distribution Structure on Energy Demand.	108
3.3.1	Analysis of the Income Elasticity of Household Energy Demand.	108
3.3.2	Changes in the Income Distribution Pattern and Its Impact on Energy Consumption	110
3.4	Research Methodology of the Influence of Urbanization on Energy Demand with Supporting Evidence	112
3.4.1	Research into Urbanization and Household Direct Energy Consumption Based on the Divisia Decomposition Method	112
3.4.2	Research into Urbanization and Household Indirect Energy Consumption Based on the Input–Output Analysis Method	114
3.4.3	Research into the Construction Industry and Energy Demand Based on the Input–Output Analysis Method	115
3.5	Conclusion	115
	References.	116
4	Residential Energy Consumption	119
4.1	Residential Energy Consumption Characteristics in Some Representative Countries.	120
4.1.1	Final Energy Consumption Structure by Sector in Some Representative Countries	120
4.1.2	Analysis of Trends in Residential Energy Final Demand for Some Representative Countries	122

4.1.3	Comparison of the Energy Consumption Structure Among Representative Countries.	124
4.1.4	Regional Comparison of Residential Energy Consumption	127
4.2	State of China's Residential Energy Consumption	127
4.2.1	Change in Residential Energy Consumption	128
4.2.2	Analysis of Different Kinds of Energy Consumption	130
4.2.3	Characteristics of the Residential Energy Consumption	133
4.3	Comparison Between Urban and Rural Residential Energy Consumption.	133
4.3.1	Differences Between Urban and Rural Residential Energy Consumption	134
4.3.2	Differences Between the Structure of Urban and Rural Residential Energy Consumption	137
4.4	Regional Comparison of Residential Energy Consumption.	140
4.4.1	Regional Comparison of Residential Energy Consumption	141
4.4.2	Regional Comparison of the Structures of Residential Energy Consumption	144
4.4.3	Impact Factors of Residential Energy Consumption: Examples from Three Regions	148
4.4.4	Characteristics of Regional Residential Energy Consumption	151
4.5	Impact Analysis of Urban Residential Energy Consumption.	152
4.5.1	Impact Factors of Urban Residential Energy Consumption	153
4.5.2	Accounting Methodology and Data Description	155
4.5.3	Results Analysis and Discussion	159
4.5.4	Conclusions.	162
4.6	Summary	162
	References.	164
5	Energy Efficiency in Key Sectors	167
5.1	Transportation Sector	168
5.1.1	Energy Consumption Characteristics in China's Transportation Sector.	168
5.1.2	Systematic Analysis of the Impact of Energy Intensity on Transportation	180
5.1.3	International Comparison of Energy Consumption in Transportation	184
5.1.4	International Comparison of Energy Consumption and Emission Reductions.	199
5.1.5	Summary	202

5.2	Energy Consumption in Buildings	204
5.2.1	Definition of Energy Consumption in China's Public Buildings	205
5.2.2	Development Tendencies and the Energy Consumption Situation of China's Public Buildings . . .	207
5.2.3	Characteristics of Energy Consumption in Large Public Buildings	212
5.2.4	Geographical Differences of Energy Consumption Among Large Public Buildings	214
5.2.5	Overall Features of Energy Consumption in Public Building	216
5.3	Energy Efficiency in the Electric Power Sector.	217
5.3.1	Energy Efficiency of Electric Power Generation	217
5.3.2	Energy Efficiency of Power Transportation and Distribution.	223
5.3.3	Electricity Allocation Optimization and Economical Transmission	224
5.3.4	Demand Side Management and Energy Efficiency	228
5.4	Summary	229
	References.	230
6	Empirical Research About the Effects of Price on Oil Demand . . .	233
6.1	Introduction	233
6.2	Research Method on the Demand Elasticity of China's Crude Oil	235
6.2.1	Variable Selections and Research Methods	235
6.2.2	Data Sources and Processing	237
6.2.3	Data Analysis and Bounds Test.	238
6.3	Analysis of the Demand Elasticity of China's Crude Oil	240
6.3.1	Analysis of Crude Oil Demand Elasticity in the Long Run	240
6.3.2	Analysis of Crude Oil Demand Elasticity in the Short Run	242
6.4	Conclusions and Implications	245
	References.	247
7	China's Regional Energy Efficiency	249
7.1	Decomposition Study of Regional Energy Macro Efficiency . . .	250
7.1.1	Theil Index Decomposition Method	250
7.1.2	Data Sources and Processing	251
7.1.3	Results and Discussion	252
7.1.4	Econometric Analysis of Differences in Regional Energy Macro Efficiency	254

7.2	Comparison of Regional Energy Utilization Efficiencies.	258
7.2.1	Data Sources and Processing	258
7.2.2	Results and Discussion	259
7.2.3	Econometric Analysis of the Regional Energy Utilization Efficiency Differences.	263
7.3	Evolution of Energy Physical Efficiency in the Regional Iron and Steel Sector	265
7.3.1	Introduction	265
7.3.2	Malmquist Index Decomposition Method	267
7.3.3	Data Sources, Results, and Discussion	272
7.4	Summary	274
	References.	275
