SPI and the ISO/IEC 29110 Standard

Bridging the Gap Between SPI and SMEs in Educational Settings: A Learning Tool Supporting ISO/IEC 29110	3
<i>Mary-Luz Sanchez-Gordón, Rory V. O'Connor, Ricardo Colomo-Palacios, and Eduardo Herranz</i>	
Implementing the New ISO/IEC 29110 Systems Engineering Process Standard in a Small Public Transportation Company	15
<i>Claude Y. Laporte, Nicolas Tremblay, Jamil Menaceur, and Denis Poliquin</i>	
A Multi-case Study Analysis of Software Process Improvement in Very Small Companies Using ISO/IEC 29110	30
<i>Claude Y. Laporte and Rory V. O'Connor</i>	

Communication and Team Issues in SPI

Refactoring Software Development Process Terminology Through the Use of Ontology	47
<i>Paul M. Clarke, Antoni Lluís Mesquida Calafat, Damjan Ekert, J.J. Ekstrom, Tatjana Gornostaja, Milos Jovanovic, Jørn Johansen, Antonia Mas, Richard Messnarz, Blanca Nájera Villar, Alexander O'Connor, Rory V. O'Connor, Michael Reiner, Gabriele Sauberer, Klaus-Dirk Schmitz, and Murat Yilmaz</i>	
Cardion.spec: An Approach to Improve the Requirements Specification Written in the Natural Language Through the Formal Method	58
<i>Masao Ito</i>	
Establishing Effective Software Development Teams: An Exploratory Model	70
<i>Mirna Muñoz, Jezreel Mejia, Adriana Peña, and Nora Rangel</i>	

SPI and Assessment

Using a Process Assessment Model to Prepare for an ISO/IEC 20000-1 Certification: ISO/IEC 15504-8 or TIPA for ITIL?	83
<i>Stéphane Cortina, Béatrix Barafort, Michel Picard, and Alain Renault</i>	

Towards Automated Traceability Assessment through Augmented Lifecycle Space	94
<i>Miklós Biró, József Klespitz, Johannes Gmeiner, Christa Illibauer, and Levente Kovács</i>	

Measuring Readiness for Compliance: A Gap Analysis Tool to Complete the TIPA Process Assessment Framework	106
<i>Michel Picard, Alain Renault, Béatrix Barafort, and Stéphane Cortina</i>	

SPI in Secure and Safety Critical Environments

Development and Production Processes for Secure Embedded Control Devices	119
<i>Tobias Rauter, Andrea Höller, Johannes Iber, and Christian Kreiner</i>	

Situational Factors in Safety Critical Software Development.	132
<i>Risto Nevalainen, Paul Clarke, Fergal McCaffery, Rory V. O'Connor, and Timo Varkoi</i>	

Supporting Cyber-Security Based on Hardware-Software Interface Definition.	148
<i>Georg Macher, Harald Sporer, Eugen Brenner, and Christian Kreiner</i>	

SPI Initiatives

Collective Intelligence-Based Quality Assurance: Combining Inspection and Risk Assessment to Support Process Improvement in Multi-Disciplinary Engineering	163
<i>Dietmar Winkler, Juergen Musil, Angelika Musil, and Stefan Biffel</i>	

Automotive Quality Universities - AQUA Alliance Extension to Higher Education.	176
<i>Jakub Stolfa, Svatopluk Stolfa, Andreas Riel, Serge Tichkiewitch, Christian Kreiner, Richard Messnarz, Miran Rodic, and Monika Gaisch</i>	

How the Company Manages Critical Success Factors in Software Process Improvement Initiatives: Pilot Case-Study in Finnish Software Company	188
<i>Jaana Pekki</i>	

Selected Key Notes and Workshop Papers

GamifySPI

Software Developer's Journey: A Story-Driven Approach to Support Software Practitioners	203
<i>Murat Yilmaz, Berke Atasoy, Rory V. O'Connor, Jean-Bernard Martens, and Paul Clarke</i>	

Gamification Proposal for Defect Tracking in Software Development Process	212
<i>Gloria Piedad Gasca-Hurtado, Maria Clara Gómez-Alvarez, Mirna Muñoz, and Jezreel Mejía</i>	
Process Improving by Playing: Implementing Best Practices through Business Games	225
<i>Antoni-Lluís Mesquida, Milos Jovanovic, and Antònia Mas</i>	
Gamification and Human Factors in Quality Management Systems: Mapping from Octalysis Framework to ISO 10018	234
<i>Mary-Luz Sanchez-Gordón, Ricardo Colomo-Palacios, and Eduardo Herranz</i>	
Gamifying the Onboarding Process for Novice Software Practitioners	242
<i>Mehmet Kosa and Murat Yilmaz</i>	

Functional Safety

Functional Safety Considerations for an In-wheel Electric Motor for Education	251
<i>Miran Rodic, Andreas Riel, Richard Messnarz, Jakub Stolf, and Svatopluk Stolf</i>	
A Compact Introduction to Automotive Engineering Knowledge.	259
<i>Andreas Riel, Monique Kollenhof, Sebastiaan Boersma, Ron Gommans, Damjan Ekert, and Richard Messnarz</i>	
A GSN Approach to SEooC for an Automotive Hall Sensor.	269
<i>Xabier Larrucea, Silvana Mergen, and Alastair Walker</i>	
Formal Methods and Functional Safety	281
<i>Micheal Mac an Airchinnigh</i>	

Supporting Innovation and Improvement

Forming a European Innovation Cluster as a Think Tank and Knowledge Pool	293
<i>Richard Messnarz, Andreas Riel, Gabriele Sauberer, and Michael Reiner</i>	
Innovative Marketing in Low-Tech Micro Companies - Lessons Learned from Study Projects.	302
<i>Michael Reiner, Christian Reimann, and Elena Vitkauskaitė</i>	

Method to Establish Strategies for Implementing Process Improvement According to the Organization's Context	312
<i>Mirna Muñoz, Jezreel Mejia, Gloria P. Gasca Hurtado, Maria C. Gómez-Álvarez, and Brenda Durón</i>	
User Orientation through Open Innovation and Customer Integration.	325
<i>Dimitrios Siakas and Kerstin Siakas</i>	
Author Index	343

Systems, Software and Services Process Improvement
23rd European Conference, EuroSPI 2016, Graz,
Austria, September 14-16, 2016, Proceedings
Kreiner, C.; O'Connor, R.V.; Poth, A.; Messnarz, R. (Eds.)
2016, XVIII, 344 p. 92 illus., Softcover
ISBN: 978-3-319-44816-9
