

# Contents

<b>1</b>	<b>Introduction to Dynamical Systems</b>	<b>1</b>
1.1	Basic Concepts	1
1.1.1	Invariant Sets	1
1.1.2	Topological Classification. Stability	6
1.1.3	Hyperbolicity. The Simplest Hyperbolic Sets	8
1.2	Basic Sets	13
1.2.1	Axiom A. Spectral Decomposition Theorem	13
1.2.2	Transversality. Absence of Cycles	17
1.2.3	A Markov Chain and a Solenoid	22
	References	25
<b>2</b>	<b>General Properties of the Morse–Smale Diffeomorphisms</b>	<b>27</b>
2.1	Embedding and Asymptotic Behavior of the Invariant Manifolds of Periodic Points	27
2.1.1	Representation of the Ambient Manifold as the Unit of the Invariant Manifolds of the Periodic Points	31
2.1.2	Embedding of Invariant Manifolds of Periodic Points into the Ambient Manifold	32
2.1.3	Topological Invariants Related to the Embedding of the Invariant Manifolds of the Periodic Points into the Ambient Manifold	35
2.1.4	A Linearizing Neighborhood	40
2.1.5	The Asymptotic Behavior of the Invariant Manifolds of the Periodic Points	44
2.2	Morse–Lyapunov Functions. Attractors and Repellers	46
2.2.1	“Source-Sink” Diffeomorphisms	49
2.2.2	Morse–Lyapunov Functions	50
2.2.3	Attractors and Repellers	51
	References	54

<b>3</b>	<b>The Topological Classification of the Gradient-Like Diffeomorphism on Surfaces . . . . .</b>	<b>57</b>
3.1	The Realization of the Gradient-Like Diffeomorphisms by Means of Periodic Transformations . . . . .	57
3.1.1	The Structure of the Periodic Data of a Gradient-Like Diffeomorphism on a Surface . . . . .	60
3.1.2	Periodic Transformations and Their Connection to the Periodic Data. . . . .	62
3.1.3	The Construction of the Gradient-Like Diffeomorphism for the Admissible Collection . . . . .	62
3.2	The Topological Classification of the Gradient-Like Diffeomorphisms. . . . .	65
3.2.1	The Connection Between the Graph and the Scheme. . . . .	70
3.2.2	Sufficient Conditions of the Topological Conjugacy . . . . .	72
	References. . . . .	74
<b>4</b>	<b>Wild Embedding of the Separatrices into 3-Manifolds and Pixton Diffeomorphism . . . . .</b>	<b>77</b>
4.1	Embedding to a Manifold Whose Fundamental Group Admits a Nontrivial Homomorphism into the Group $\mathbb{Z}$ . . . . .	78
4.1.1	Properties of the $\eta_{\mathbb{S}^2 \times \mathbb{S}^1}^s$ -Essential Torus. . . . .	80
4.1.2	The Criterion of Triviality of the $\eta_{\mathbb{S}^2 \times \mathbb{S}^1}^s$ -Essential Knot (Torus) . . . . .	81
4.2	Embedding of Separatrices to a 3-Manifold . . . . .	82
4.2.1	The Behavior of the Tame Separatrix in a Neighborhood of a Sink. . . . .	84
4.2.2	The Criterion of Tame Embedding of Separatrices to a 3-Manifold . . . . .	86
4.3	Pixton Diffeomorphisms . . . . .	87
4.3.1	Topological Classification . . . . .	88
4.3.2	Bifurcation of the Embedding of a Separatrix of a Saddle Fixed Point. . . . .	95
