

# Contents

<b>1 The Genetics of Color Vision and Congenital Color Deficiencies .....</b>	<b>1</b>
David M. Hunt and Livia S. Carvalho	
<b>2 The Retinal Processing of Photoreceptor Signals .....</b>	<b>33</b>
Jan Kremers, Luiz Carlos L. Silveira, Neil R.A. Parry, and Declan J. McKeefry	
<b>3 Functional Imaging of Cone Photoreceptors.....</b>	<b>71</b>
Lawrence C. Sincich, Ramkumar Sabesan, William S. Tuten, Austin Roorda, and Wolf M. Harmening	
<b>4 Cone Opponency: An Efficient Way of Transmitting Chromatic Information .....</b>	<b>105</b>
Barry B. Lee and Luiz Carlos L. Silveira	
<b>5 Psychophysical Correlates of Retinal Processing.....</b>	<b>133</b>
Rigmor C. Baraas and Andrew J. Zele	
<b>6 Color Constancy and Contextual Effects on Color Appearance .....</b>	<b>159</b>
Maria Olkkonen and Vebjørn Ekroll	
<b>7 Color in the Cortex .....</b>	<b>189</b>
Elizabeth N. Johnson and Kathy T. Mullen	
<b>8 Interactions of Color Vision with Other Visual Modalities.....</b>	<b>219</b>
Frederick A.A. Kingdom	
<b>9 Computational Modeling of Color Vision.....</b>	<b>243</b>
Thomas Wachtler and Christian Wehrhahn	

<b>10</b>	<b>Color Vision in Clinical Practice.....</b>	<b>269</b>
	Cord Huchzermeyer, Jan Kremers, and John Barbur	
<b>11</b>	<b>Evolution of Color Vision .....</b>	<b>317</b>
	Almut Kelber and Gerald H. Jacobs	
	<b>Index.....</b>	<b>355</b>

Human Color Vision

Kremers, J.; Baraas, R.C.; Marshall, N.J. (Eds.)

2016, XI, 361 p. 82 illus., 74 illus. in color., Hardcover

ISBN: 978-3-319-44976-0
