Contents

1 Introduction to the Glutamate–Glutamine Cycle 1
Ursula Sonnewald and Arne Schousboe

2 Glucose, Lactate, β-Hydroxybutyrate, Acetate, GABA, and Succinate as Substrates for Synthesis of Glutamate and GABA in the Glutamine–Glutamate/GABA Cycle 9
Leif Hertz and Douglas L. Rothman

3 Anaplerosis for Glutamate Synthesis in the Neonate and in Adulthood 43
Eva Brekke, Tora Sund Morken, Anne B. Walls, Helle Waagepetersen, Arne Schousboe, and Ursula Sonnewald

4 Enzyme Complexes Important for the Glutamate–Glutamine Cycle 59
Mary C. McKenna and Gustavo C. Ferreira

5 BCAA Metabolism and NH_3 Homeostasis 99
M.E. Conway and S.M. Hutson

6 Glutaminases 133
Javier Márquez, José M. Matés, and José A. Campos-Sandoval

7 Vesicular Glutamate Uptake 173
Tetsufumi Ueda

8 The Glutamine Transporters and Their Role in the Glutamate/GABA–Glutamine Cycle 223
Renata Leke and Arne Schousboe

9 Glutamine Metabolism in Gliomas 259
Monika Szeliga and Jan Albrecht

10 Oligodendrocytes: Development, Physiology and Glucose Metabolism 275
Ana I. Amaral, Joana M. Tavares, Ursula Sonnewald, and Mark R.N. Kotter

11 Dysregulation of Glutamate Cycling Mediates Methylmercury-Induced Neurotoxicity 295
Megan Culbreth and Michael Aschner

12 Astroglia, Glutamatergic Transmission and Psychiatric Diseases 307
Alexei Verkhratsky, Luca Steardo, Liang Peng, and Vladimir Parpura

13 Glutamine Synthetase: Role in Neurological Disorders 327
Arumugam R. Jayakumar and Michael D. Norenberg

14 The Glutamate–Glutamine Cycle in Epilepsy 351
Tore Eid, Shaun E. Gruenbaum, Roni Dhaher, Tih-Shih W. Lee, Yun Zhou, and Niels Christian Danbolt

The Glutamate/GABA-Glutamine Cycle
Amino Acid Neurotransmitter Homeostasis
Schousboe, A.; Sonnewald, U. (Eds.)
2016, X, 416 p. 55 illus., 42 illus. in color., Hardcover
ISBN: 978-3-319-45094-0
