Part I Psychoneuroimmunology and Systems Biology Mechanisms

1 From Psychoneuroimmunology to Personalized, Systems, and Dynamical Medicine	3
1.1 Psychoneuroimmunology (PNI) and Systems Biology	3
1.2 Emotions, Stress, Inflammation, and Diseases	4
1.3 The Dynamical Biopsychosocial Models on the Basis of PNI and Systems Biology	5
1.4 Systemic PNI Profiles for Personalized, Systems, and Dynamical Medicine	7
References	8
2 Stress and Inflammation: Translational Implications in Mind–Body Medicine	11
2.1 Stress and Inflammation: A Systems Biology Perspective	11
2.2 The PNI Networks, Systems-Based Biomarkers, and Mind–Body Mechanisms	12
2.3 The Stress–Inflammation–Disease Associations: Translational Implications of PNI	13
2.4 Targeting the Stress and Inflammation-Associated Networks	15
References	15
3 Biological Rhythms and the HPA Axis in Psychoneuroimmunology	19
3.1 The Rhythmic Patterns of the PNI Networks: Systems Biology Approaches	19
3.2 Chronic Stress and the Dynamics of the HPA Axis	20
3.2.1 The Rhythmic Patterns of the HPA Axis in Association with Stress Responses	20
3.2.2 The Circadian and Homeostatic Mechanisms of the HPA Axis at Various Levels	22

3.3	The Dynamics of the HPA Axis in Association with Diseases	23
3.3.1	Depression and Cancer	23
3.3.2	The Cholesterol Levels and Obesity	24
	References	25
4	The Inflammatory Networks and Dynamical Patterns in Psychoneuroimmunology	27
4.1	Inflammatory Networks and Systemic PNI Profiling	27
4.2	IL-6 and Associated Networks	28
4.3	TNF and Associated Networks	29
4.4	NF-kB and Associated Networks	30
4.5	BDNF and Associated Networks	30
4.6	PPARs and Associated Networks	32
	References	33
Part II Psychoneuroimmunology, Diseases, and Mind-Body Medicine		
5	Sleep, Psychoneuroimmunology, and Mind-Body Medicine	39
5.1	Sleep Disturbances, Systemic Inflammation, and Mind-Body Techniques	39
5.2	Sleep Problems and Aging	40
5.3	Psychosocial Stress, Poor Sleep Quality, and Obesity	40
5.4	Mind-Body Methods for Improving Sleep Quality	41
	References	42
6	Psychoneuroimmunology of Depression	43
6.1	PNI and the Biopsychosocial Models	43
6.2	The PNI Implications in Personalized, Systems, and Dynamical Medicine	44
6.3	Potential Systemic Biomarkers in Depression	45
6.4	Stress Response and Inflammatory Pathways in Depression	45
6.4.1	The Immune-Kynurenine Pathway	45
6.4.2	The HPA Axis and Associated Pathways	46
6.4.3	The ERK1/2 and MAPK Signaling Pathways	47
6.4.4	The GSK3-Dependent TLR4 Signaling Pathways	47
6.5	The Inflammatory Networks: The Links Between Depression and Other Diseases	48
6.5.1	Cancer	48
6.5.2	Cardiovascular Diseases	49
6.5.3	Other Relevant Diseases	50
	References	51
7	Psychoneuroimmunology of Schizophrenia	53
7.1	The Stress-Inflammation Associations and the Biopsychosocial Models	53

7.2	The Interactions Among the Immune, Endocrine, Nervous Systems, and Cognition	54
7.3	PNI and Potential Immunomodulation Strategies.....	55
7.4	Stress Response and Inflammatory Pathways in Schizophrenia....	55
7.4.1	Metabolic and Inflammatory Pathways	55
7.4.2	Important Cytokine Networks	58
7.4.3	Neurotransmitters and Neuronal Signaling Pathways	59
7.4.4	Multiple Signaling Pathways.....	60
7.4.5	The HPA Axis and Associated Pathways.....	62
	References.....	62
8	Obesity, Stress, Inflammation, and Psychoneuroimmunology	65
8.1	Obesity, PNI, and the Biopsychosocial Models.....	65
8.2	Psychological Stress, Obesity, and Associated Diseases	66
8.3	Potential Stress and Inflammatory Biomarkers in Obesity	67
8.4	Obesity-Associated Inflammatory Pathways	69
8.5	Obesity and the HPA Axis.....	70
8.6	Potential Therapeutic Targets in Association with Stress and Obesity	71
	References.....	72
9	Psychoneuroimmunology of Aging.....	75
9.1	Aging, PNI, and the Systems Biology Models	75
9.2	The Stress–Inflammation Correlations in Aging.....	76
9.3	Inflammatory Pathways: The Links Among Stress, Aging, and Chronic Diseases.....	77
9.3.1	Cardiovascular Aging and Diseases.....	77
9.3.2	Brain Aging and Neuropsychiatric Symptoms	79
9.3.3	The mTOR Signaling Pathways, Alzheimer’s Disease, and Autoimmune Disorders	80
9.3.4	Melatonin-Associated Pathways and Age-Associated Neurodegenerative Disorders	81
9.3.5	The Kidney–Brain Axis and Chronic Kidney Disease (CKD).....	82
9.3.6	Bone Loss, Osteoporosis, and Muscle Dysfunctions.....	82
9.3.7	Age-Related Macular Degeneration in the Eye.....	83
9.3.8	Chronic Obstructive Pulmonary Disease (COPD)	83
9.3.9	The Mitochondrial Signaling Pathways and Systemic Inflammation.....	84
	References.....	84
10	Psychoneuroimmunology of Cardiovascular Diseases	87
10.1	Psychological Stress, Depression, and Cardiovascular Diseases.....	87
10.2	The Complex PNI Interactions and Inflammatory Biomarkers	88

10.3	Inflammatory Pathways: The Links Between Stress and Cardiovascular Diseases	89
10.3.1	Emotional Problems, Inflammation, and Atherosclerosis	89
10.3.2	The IL-1 Family.....	90
10.3.3	The Networks of Multiple Cytokines	91
10.3.4	The Signaling Pathway of Toll-Like Receptors (TLR) ...	92
10.3.5	The Kynurenine Pathway and Metabolic Networks.....	92
10.3.6	The Complex Notch Signaling Pathway.....	93
	References.....	94
11	Psychoneuroimmunology and Cancer	97
11.1	The Systems-Based PNI Frameworks	97
11.2	Inflammatory Pathways in Different Types of Cancer.....	98
11.2.1	Pancreatic Cancer and the NFATc2-STAT3-GSK-3 β Pathway.....	98
11.2.2	Hepatocellular Carcinoma (HCC) and the β -Catenin Signaling Pathway	100
11.2.3	Squamous Cell Carcinoma (SCC) and the Pathways of Tgfbr2, p21	100
11.2.4	Colorectal Cancer and the Signaling Pathways of TLRs and PPAR δ	101
11.2.5	Breast Cancer and Various Signaling Pathways	101
11.3	The NF-kB- and p53-Associated Pathways.....	102
11.4	The Interleukin-1 (IL-1) Cytokine Family and Associated Pathways	103
11.5	Inflammatory Pathways in the Microbiota.....	103
11.6	Biobehavioral Pathways in Hematopoietic Stem Cell Transplant Patients.....	104
11.7	The HPA Axis and the Roles of Melatonin	105
11.8	Inflammatory Pathways Associated with Neuroendocrine (NE) Differentiation.....	105
	References.....	106
12	Psychoneuroimmunology of Skin Diseases.....	109
12.1	The PNI Mechanisms of Skin Disorders at Various Levels.....	109
12.2	Emotional Tension and Immune Responses	110
12.3	PNI of Atopic Dermatitis (AD) and Other Skin Diseases.....	111
12.3.1	Atopic Dermatitis (AD)	111
12.3.2	Other Relevant Skin Disorders	112
12.4	Stress Response and Inflammatory Networks in Skin Disorders	113
12.4.1	Stress and the Neurotrophin Nerve Growth Factor (NGF) Pathway	113
12.4.2	Multiple Cytokine Networks and Skin Homeostasis.....	115
12.4.3	Inflammatory Networks in Association with Various Skin Disorders	116
	References.....	118

13 The Translation of Psychoneuroimmunology into Mind–Body Medicine..... 121

13.1 From PNI to Mind–Body Medicine..... 121

13.2 The PNI Mechanisms of Meditation..... 123

13.3 PNI and Nutrition..... 124

13.3.1 Stress, Diets, and Inflammation..... 124

13.3.2 Nutritional Interventions, Stress Responses, and Anti-inflammatory Effects..... 125

13.4 Mind–Body Interventions for Cardiovascular Diseases 126

13.5 Mind–Body Interventions for Aging and Associated Disorders 126

13.6 Incorporating Chronotherapy into Systems and Dynamical Medicine 127

References..... 128

Index..... 131

Psychoneuroimmunology

Systems Biology Approaches to Mind-Body Medicine

Yan, Q.

2016, XIII, 136 p. 3 illus. in color., Hardcover
