

Contents

1	Calculation of Improper Integrals by Using Uniformly Distributed Sequences	1
1.1	Introduction	1
1.2	Some Auxiliary Notions and Facts from the Theory of Uniform Distribution of Sequences	2
1.3	Kolmogorov Strong Law of Large Numbers and Glivenko–Cantelli Theorem	5
1.4	Calculation of a Certain Improper One-Dimensional Riemann Integral by Using Uniformly Distributed Sequences	15
	References	18
2	Infinite-Dimensional Monte Carlo Integration	19
2.1	Introduction	19
2.2	Uniformly Distributed Sequences of an Increasing Family of Finite Sets in Infinite-Dimensional Rectangles	21
2.3	Monte Carlo Algorithm for Estimating the Value of Infinite-Dimensional Riemann Integrals	34
2.4	Applications to Statistics	41
	References	46
3	Structure of All Real-Valued Sequences Uniformly Distributed in $[-\frac{1}{2}, \frac{1}{2}]$ from the Point of View of Shyness	47
3.1	Introduction	47
3.2	Some Auxiliary Notions and Facts from Mathematical Analysis and Measure Theory	47
3.3	On the Structure of Real-Valued Sequences Uniformly Distributed in $[-\frac{1}{2}, \frac{1}{2}]$ from the Point of View of Shyness	50
3.4	On the Structure of Real-Valued Sequences Uniformly Distributed Modulo 1 in $[-\frac{1}{2}, \frac{1}{2}]$ from the Point of View of Shyness	52
	References	55

4 On Moore–Yamasaki–Kharazishvili Type Measures and the Infinite Powers of Borel Diffused Probability Measures on \mathbf{R}.	57
4.1 Introduction	57
4.2 Solution of the Problem 4.1.1.	60
4.3 Particular Solution of Problem 4.1.2.	61
4.4 Solution of Problems 4.1.3 and 4.1.4	65
References.	70
5 Objective and Strong Objective Consistent Estimates of Unknown Parameters for Statistical Structures in a Polish Group Admitting an Invariant Metric.	73
5.1 Introduction	73
5.2 Auxiliary Notions and Facts from Functional Analysis and Measure Theory	78
5.3 An Objective Infinite Sample Consistent Estimate of an Unknown Distribution Function	82
5.4 An Effective Construction of the Strong Objective Infinite Sample Consistent Estimate of a Useful Signal in the Linear One-Dimensional Stochastic Model.	86
5.5 Infinite Sample Consistent Estimates of an Unknown Probability Density Function	88
5.6 Orthogonal Statistical Structures in a Nonlocally Compact Polish Group Admitting an Invariant Metric.	96
5.7 Objective and Strong Objective Consistent Estimates of an Unknown Parameter in a Compact Polish Group $\{0, 1\}^{\mathbb{N}}$	103
5.8 Conclusion	104
References.	105
6 Why Null Hypothesis Is Rejected for Almost Every Infinite Sample by the Hypothesis Testing of a Maximal Reliability	107
6.1 Introduction	107
6.2 Auxiliary Notions and Facts from Functional Analysis and Measure Theory.	109
6.3 Consistent Estimators of a Useful Signal in a One-Dimensional Linear Stochastic Model When the Expectation of the Transformed Signal Is Not Defined	110
6.4 Some Statistical Tests and Their Criticism from the Point of View of Functional Analysis	112
References.	117
Appendix A: Curriculum Vitae	119
Index	133

Applications of Measure Theory to Statistics

Pantsulaia, G.

2016, XV, 134 p., Hardcover

ISBN: 978-3-319-45577-8
