

Contents

1	Introduction	1
1.1	The Inter-Particle Potential	1
1.2	The Born-Oppenheimer Approximation	2
1.3	The Interaction Energy at Long-Range	3
1.4	Electrostatic Energy	4
1.5	Induction Energy	5
1.6	Dispersion Energy	6
1.7	Photons: Real and Virtual Light Quanta	8
1.8	Dispersion Forces Between Macroscopic Objects	9
1.9	Different Physical Ways of Understanding the Dispersion Interaction Between Atoms and Molecules	11
	References	14
2	Non-relativistic QED	17
2.1	Classical Mechanics and Electrodynamics	17
2.2	Lagrangian for a Charged Particle Coupled to Electromagnetic Radiation	21
2.3	Minimal-Coupling QED Hamiltonian	25
2.4	Multipolar-Coupling QED Hamiltonian	29
2.5	Perturbative Solution to the QED Hamiltonian	35
	References	36
3	Dispersion Interaction Between Two Atoms or Molecules	39
3.1	Casimir-Polder Potential: Minimal-Coupling Calculation	39
3.2	Casimir-Polder Energy Shift: Multipolar Formalism Calculation	45
3.3	Asymptotically Limiting Forms	49
3.4	Correlation of Fluctuating Electric Dipoles	52
	References	55

4	Inclusion of Higher Multipole Moments	57
4.1	Introduction	57
4.2	Generalised Dispersion Energy Shift for Molecules with Arbitrary Electric Multipoles	58
4.3	Electric Dipole-Quadrupole Dispersion Potential	61
4.4	Electric Quadrupole-Quadrupole Interaction Energy	63
4.5	Electric Dipole-Octupole Energy Shift	64
4.6	Electric Dipole-Magnetic Dipole Potential	66
4.7	Inclusion of Diamagnetic Coupling	68
4.8	Discriminatory Dispersion Potential	70
	References.	73
5	van der Waals Dispersion Force Between Three Atoms or Molecules	75
5.1	Introduction	75
5.2	Two-Photon Coupling: The Craig-Power Hamiltonian	76
5.3	Triple Dipole Dispersion Potential	78
5.4	Far- and Near-Zone Limits	82
5.5	Equilateral Triangle Geometry	84
5.6	Collinear Arrangement	85
5.7	Right-Angled Triangle Configuration	86
	References.	87
6	Three-Body Dispersion Energy Shift: Contributions from Higher Electric Multipoles	89
6.1	Introduction	89
6.2	Generalised Three-Body Dispersion Potential	90
6.3	Dipole-Dipole-Quadrupole Potential	92
6.4	Dipole-Quadrupole-Quadrupole Dispersion Energy Shift	95
6.5	Dipole-Dipole-Octupole Dispersion Potential	98
	References.	101
	Index	103
