

Contents

- 1 Markov Chains** 1
 - 1.1 Definitions and Examples 1
 - 1.2 Multistep Transition Probabilities 9
 - 1.3 Classification of States 13
 - 1.4 Stationary Distributions 21
 - 1.4.1 Doubly Stochastic Chains 26
 - 1.5 Detailed Balance Condition 28
 - 1.5.1 Reversibility 34
 - 1.5.2 The Metropolis–Hastings Algorithm 35
 - 1.5.3 Kolmogorow Cycle Condition 38
 - 1.6 Limit Behavior 40
 - 1.7 Returns to a Fixed State 46
 - 1.8 Proof of the Convergence Theorem* 50
 - 1.9 Exit Distributions 53
 - 1.10 Exit Times 61
 - 1.11 Infinite State Spaces* 68
 - 1.12 Chapter Summary 74
 - 1.13 Exercises 78
- 2 Poisson Processes** 95
 - 2.1 Exponential Distribution 95
 - 2.2 Defining the Poisson Process 100
 - 2.2.1 Constructing the Poisson Process 103
 - 2.2.2 More Realistic Models 104
 - 2.3 Compound Poisson Processes 106
 - 2.4 Transformations 108
 - 2.4.1 Thinning 108
 - 2.4.2 Superposition 112
 - 2.4.3 Conditioning 113
 - 2.5 Chapter Summary 115
 - 2.6 Exercises 116

3	Renewal Processes	125
3.1	Laws of Large Numbers	125
3.2	Applications to Queueing Theory	130
3.2.1	GI/G/1 Queue	130
3.2.2	Cost Equations	131
3.2.3	M/G/1 Queue	133
3.3	Age and Residual Life*	136
3.3.1	Discrete Case	137
3.3.2	General Case	139
3.4	Chapter Summary	141
3.5	Exercises	142
4	Continuous Time Markov Chains	147
4.1	Definitions and Examples	147
4.2	Computing the Transition Probability	152
4.2.1	Branching Processes	157
4.3	Limiting Behavior	162
4.3.1	Detailed Balance Condition	167
4.4	Exit Distributions and Exit Times	170
4.4.1	Exit Distribution	170
4.4.2	Exit Times	173
4.5	Markovian Queues	176
4.5.1	Single Server Queues	177
4.5.2	Multiple Servers	180
4.5.3	Departure Processes	182
4.6	Queueing Networks*	183
4.7	Chapter Summary	190
4.8	Exercises	192
5	Martingales	201
5.1	Conditional Expectation	201
5.2	Examples	204
5.3	Gambling Strategies, Stopping Times	207
5.4	Applications	211
5.4.1	Exit Distributions	212
5.4.2	Exit Times	214
5.4.3	Extinction and Ruin Probabilities	216
5.4.4	Positive Recurrence of the GI/G/1 Queue*	218
5.5	Exercises	220
6	Mathematical Finance	223
6.1	Two Simple Examples	223
6.2	Binomial Model	227
6.2.1	One Period Case	227
6.2.2	N Period Model	229
6.3	Concrete Examples	232

6.4	American Options	237
6.5	Black–Scholes Formula	241
6.5.1	The Black–Scholes Partial Differential Equation	244
6.6	Calls and Puts	245
6.7	Exercises	247
A	Review of Probability	251
A.1	Probabilities, Independence	251
A.1.1	Conditional Probability	253
A.2	Random Variables, Distributions	255
A.3	Expected Value, Moments	261
A.4	Integration to the Limit	267
	References	269
	Index	271
