

Contents

On the Differential and Full Algebraic Complexities of Operator Matrices Transformations	1
<i>Sergei A. Abramov</i>	
Resolving Decompositions for Polynomial Modules	15
<i>Mario Albert and Werner M. Seiler</i>	
Setup of Order Conditions for Splitting Methods.	30
<i>Winfried Auzinger, Wolfgang Herfort, Harald Hofstätter, and Othmar Koch</i>	
Symbolic Manipulation of Flows of Nonlinear Evolution Equations, with Application in the Analysis of Split-Step Time Integrators	43
<i>Winfried Auzinger, Harald Hofstätter, and Othmar Koch</i>	
Improved Computation of Involutive Bases	58
<i>Bentolhoda Binaei, Amir Hashemi, and Werner M. Seiler</i>	
Computing All Space Curve Solutions of Polynomial Systems by Polyhedral Methods	73
<i>Nathan Bliss and Jan Verschelde</i>	
Algorithmic Computation of Polynomial Amoebas	87
<i>D.V. Bogdanov, A.A. Kytmanov, and T.M. Sadykov</i>	
Sparse Gaussian Elimination Modulo p : An Update.	101
<i>Charles Bouillaguet and Claire Delaplace</i>	
MATHCHECK2: A SAT+CAS Verifier for Combinatorial Conjectures	117
<i>Curtis Bright, Vijay Ganesh, Albert Heinle, Ilias Kotsireas, Saeed Nejadi, and Krzysztof Czarnecki</i>	
Incompleteness, Undecidability and Automated Proofs (Invited Talk)	134
<i>Cristian S. Calude and Declan Thompson</i>	
A Numerical Method for Computing Border Curves of Bi-parametric Real Polynomial Systems and Applications	156
<i>Changbo Chen and Wenyuan Wu</i>	
The Complexity of Cylindrical Algebraic Decomposition with Respect to Polynomial Degree	172
<i>Matthew England and James H. Davenport</i>	

Efficient Simplification Techniques for Special Real Quantifier Elimination with Applications to the Synthesis of Optimal Numerical Algorithms	193
<i>Mădălina Eraşcu</i>	
Symbolic-Numeric Algorithms for Solving BVPs for a System of ODEs of the Second Order: Multichannel Scattering and Eigenvalue Problems.	212
<i>A.A. Gusev, V.P. Gerdt, L.L. Hai, V.L. Derbov, S.I. Vinitsky, and O. Chuluunbaatar</i>	
Symbolic Algorithm for Generating Irreducible Rotational-Vibrational Bases of Point Groups	228
<i>A.A. Gusev, V.P. Gerdt, S.I. Vinitsky, V.L. Derbov, A. Gózdź, A. Pędrak, A. Szulerecka, and A. Dobrowolski</i>	
A Symbolic Investigation of the Influence of Aerodynamic Forces on Satellite Equilibria	243
<i>Sergey A. Gutnik and Vasily A. Sarychev</i>	
Computer Algebra in High-Energy Physics (<i>Invited Talk</i>).	255
<i>Thomas Hahn</i>	
A Note on Dynamic Gröbner Bases Computation	276
<i>Amir Hashemi and Delaram Talaashrafi</i>	
Qualitative Analysis of the Reyman – Semenov–Tian–Shansky Integrable Case of the Generalized Kowalewski Top	289
<i>Valentin Irtegov and Tatiana Titorenko</i>	
On Multiple Eigenvalues of a Matrix Dependent on a Parameter.	305
<i>Elizabeth A. Kalinina</i>	
A Generalised Branch-and-Bound Approach and Its Application in SAT Modulo Nonlinear Integer Arithmetic	315
<i>Gereon Kremer, Florian Corzilius, and Erika Ábrahám</i>	
Computing Characteristic Polynomials of Matrices of Structured Polynomials	336
<i>Marshall Law and Michael Monagan</i>	
Computing Sparse Representations of Systems of Rational Fractions	349
<i>François Lemaire and Alexandre Temperville</i>	
On the General Analytical Solution of the Kinematic Cosserat Equations	367
<i>Dominik L. Michels, Dmitry A. Lyakhov, Vladimir P. Gerdt, Zahid Hossain, Ingmar H. Riedel-Kruse, and Andreas G. Weber</i>	
Using Sparse Interpolation in Hensel Lifting.	381
<i>Michael Monagan and Baris Tuncer</i>	

A Survey of Satisfiability Modulo Theory	401
<i>David Monniaux</i>	
Quadric Arrangement in Classifying Rigid Motions of a 3D Digital Image. . .	426
<i>Kacper Pluta, Guillaume Moroz, Yukiko Kenmochi, and Pascal Romon</i>	
A Lower Bound for Computing Lagrange's Real Root Bound	444
<i>Swaroop N. Prabhakar and Vikram Sharma</i>	
Enhancing the Extended Hensel Construction by Using Gröbner Bases	457
<i>Tateaki Sasaki and Daiju Inaba</i>	
Symbolic-Numerical Optimization and Realization of the Method of Collocations and Least Residuals for Solving the Navier–Stokes Equations. . .	473
<i>Vasily P. Shapeev and Evgenii V. Vorozhtsov</i>	
Pruning Algorithms for Pretropisms of Newton Polytopes	489
<i>Jeff Sommars and Jan Verschelde</i>	
Computational Aspects of a Bound of Lagrange	504
<i>Doru Ștefănescu</i>	
Author Index	513

Computer Algebra in Scientific Computing
18th International Workshop, CASC 2016, Bucharest,
Romania, September 19-23, 2016, Proceedings
Gerdt, V.P.; Koepf, W.; Seiler, W.; Vorozhtsov, E.V. (Eds.)
2016, XIII, 513 p. 61 illus., Softcover
ISBN: 978-3-319-45640-9
