

Contents

Part I Neuroscience of Creativity

The Vestibular System and Artistic Painting: A Theoretical Framework for the Study of Multi-modal Interactions in Aesthetic Experience of Painting and Painting Viewing	3
Alain Londero, Didier Bouccara and Hervé Bozec	
Heuraesthesia: When Synaesthesia Fertilizes the Mind	19
Vincent Mignerot	
Dyslexia, Education and Creativity, a Cross-Cultural Study	31
Zoï Kapoula and Marine Vernet	

Part II Neurophysiology of the Artworks' Observer

The Theatrical Stage Setting: A Tool for Neuropsychology and Cognitive Neuroscience	45
Yannick Bressan	
Aesthetic Impact of Anthropomorphic Figures in Art: The Case of Facial Expressions	55
Amel Achour Benallegue, Jérôme Pelletier and Gwenaël Kaminski	
How Art and Neuroscience Fell for Each Other	81
Marine Vernet	

Part III Understanding and Enhancing Art Experiences

Spectating Myriam Gourfink's Dances; Transdisciplinary Explorations	93
Coline Joufflineau and Asaf Bachrach	

Interactive Experiences Shape the Perception of an Artistic Performance: Evidence from Eye Movements and Physiological Measures	117
Solène Kalénine	
Variations in Visual Exploration and Physiological Reactions During Art Perception When Children Visit the Museum with a Mobile Electronic Guide	131
Laurent Sparrow	
Part IV Training and Teaching Through Art and Neuroscience	
Steps Towards the Art of Placing Science in the Acting Practice. A Performance-Neuroscience Perspective	141
Daria Lippi, Corinne Jola, Victor Jacono and Gabriele Sofia	
Art, Mathematics, Pedagogy.	165
Claude Paul Bruter	
Percepts & Parameters, a Prospective Approach of Architectural Materiality	173
Eglantine Bigot-Doll	
Part V Neuroscientific Inspiration for Artists	
Paintings as Complex Dynamic Systems	199
Sophie Lavaud-Forest	
Time: Active or Passive	213
Olga Kisseleva and Claire Leroux	
“The Experiencing Body”, for a Combination of Movements	225
Pascale Weber and Jean Delsaux	
Part VI Modeling and Naturalizing Aesthetics	
An Introduction on Formal and Computational Models in Popular Music Analysis and Generation.	257
Moreno Andreatta and Gilles Baroin	
The Evolution of Aesthetics: A Review of Models	271
Julien P. Renoult	
Philosophical Aesthetics and Neuroaesthetics: A Common Future?	301
Bruno Trentini	

Aesthetics and Neuroscience

Scientific and Artistic Perspectives
