

Contents

1	Introduction to Microbial Metabolomics	1
	Silas G. Villas-Boas	
2	Microbes, Metabolites and Health	13
	Trevor J. Lockett, Anthony R. Bird, Claus Christophersen, Julie M. Clarke, Michael A. Conlon and David L. Topping	
3	Exploring the Bioactive Landscape of the Gut Microbiota to Identify Metabolites Underpinning Human Health.	49
	Páraic Ó Cuív, Sriti Burman, Sian Pottenger and Mark Morrison	
4	Using Metabolomic Approaches to Characterize the Human Pathogen <i>Leishmania</i> in Macrophages.	83
	Joachim Kloehn, Eleanor C. Saunders and Malcolm J. McConville	
5	Exometabolomics for Linking Soil Carbon Dynamics to Microbial Communities.	119
	Andrea Lubbe and Trent Northen	
6	Soil Microbial Metabolomics	147
	Michael W. Heaven and Devin Benheim	
7	Community Metabolomics in Environmental Microbiology	199
	Oliver A.H. Jones, Gavin Lear, Aalim M. Welji, Gavin Collins and Christopher Quince	
8	Metabolomics: Applications to Food Safety and Quality Research	225
	Farhana R. Pinu	
9	Microbial Metabolomics in Biomass Waste Management.	261
	Avinash V. Karpe, David J. Beale, Ian H. Harding and Enzo A. Palombo	
10	Beyond Metabolomics: A Review of Multi-Omics-Based Approaches	289
	David J. Beale, Avinash V. Karpe and Warish Ahmed	
	Index	313

Microbial Metabolomics

Applications in Clinical, Environmental, and Industrial
Microbiology

Beale, D.; Kouremenos, K.; Palombo, E. (Eds.)

2016, VII, 321 p. 29 illus., 24 illus. in color., Hardcover

ISBN: 978-3-319-46324-7
