Open Knowledge Extraction Challenge

The Second Open Knowledge Extraction Challenge	3
<i>Andrea Giovanni Nuzzolese, Anna Lisa Gentile, Valentina Presutti, Aldo Gangemi, Robert Meusel, and Heiko Paulheim</i>	
Enhancing Entity Linking by Combining NER Models	17
<i>Julien Plu, Giuseppe Rizzo, and Raphaël Troncy</i>	
Collective Disambiguation and Semantic Annotation for Entity Linking and Typing.	33
<i>Mohamed Chabchoub, Michel Gagnon, and Amal Zouaq</i>	
DWS at the 2016 Open Knowledge Extraction Challenge: A Hearst-Like Pattern-Based Approach to Hypernym Extraction and Class Induction	48
<i>Stefano Faralli and Simone Paolo Ponzetto</i>	
Entity Typing and Linking Using SPARQL Patterns and DBpedia	61
<i>Lara Haidar-Ahmad, Ludovic Font, Amal Zouaq, and Michel Gagnon</i>	

Challenge on Semantic Sentiment Analysis

Challenge on Fine-Grained Sentiment Analysis Within ESWC2016.	79
<i>Mauro Dragoni and Diego Reforgiato Recupero</i>	
App2Check Extension for Sentiment Analysis of Amazon Products Reviews	95
<i>Emanuele Di Rosa and Alberto Durante</i>	
Sentiment Polarity Detection from Amazon Reviews: An Experimental Study	108
<i>Efstathios Sygkounas, Giuseppe Rizzo, and Raphaël Troncy</i>	
Exploiting Propositions for Opinion Mining	121
<i>Andi Rexha, Mark Kröll, Mauro Dragoni, and Roman Kern</i>	
The IRMUDOSA System at ESWC-2016 Challenge on Semantic Sentiment Analysis	126
<i>Giulio Petrucci and Mauro Dragoni</i>	
A Knowledge-Based Approach for Aspect-Based Opinion Mining.	141
<i>Marco Federici and Mauro Dragoni</i>	

Aspect-Based Sentiment Analysis Using a Two-Step Neural Network Architecture.	153
<i>Soufian Jebbara and Philipp Cimiano</i>	

Challenge on Question Answering over Linked Data

6th Open Challenge on Question Answering over Linked Data (QALD-6) . . .	171
<i>Christina Unger, Axel-Cyrille Ngonga Ngomo, and Elena Cabrio</i>	
SPARKLIS on QALD-6 Statistical Questions	178
<i>Sébastien Ferré</i>	

Top-k Shortest Paths in Large Typed RDF Datasets Challenge

Top-K Shortest Paths in Large Typed RDF Datasets Challenge.	191
<i>Ioannis Papadakis, Michalis Stefanidakis, Phivos Mylonas, Brigitte Endres Niggemeyer, and Spyridon Kazanas</i>	
Top-k Shortest Paths in Directed Labeled Multigraphs.	200
<i>Sven Hertling, Markus Schröder, Christian Jilek, and Andreas Dengel</i>	
Modified MinG Algorithm to Find Top-K Shortest Paths from large RDF Graphs.	213
<i>Zohaib Hassan, Mohammad Abdul Qadir, Muhammad Arshad Islam, Umer Shahzad, and Nadeem Akhter</i>	
Using Triple Pattern Fragments to Enable Streaming of Top-k Shortest Paths via the Web.	228
<i>Laurens De Vocht, Ruben Verborgh, and Erik Mannens</i>	

Semantic Publishing Challenge

Semantic Publishing Challenge – Assessing the Quality of Scientific Output in Its Ecosystem	243
<i>Anastasia Dimou, Angelo Di Iorio, Christoph Lange, and Sahar Vahdati</i>	
Reconstructing the Logical Structure of a Scientific Publication Using Machine Learning	255
<i>Stefan Klampfl and Roman Kern</i>	
Automatically Identify and Label Sections in Scientific Journals Using Conditional Random Fields.	269
<i>Sree Harsha Ramesh, Arnab Dhar, Raveena R. Kumar, Anjaly V., Sarath K.S., Jason Pearce, and Krishna R. Sundaresan</i>	

ACM: Article Content Miner for Assessing the Quality of Scientific Output . . .	281
<i>Andrea Giovanni Nuzzolese, Silvio Peroni, and Diego Reforgiato Recupero</i>	
Information Extraction from PDF Sources Based on Rule-Based System Using Integrated Formats	293
<i>Riaz Ahmad, Muhammad Tanvir Afzal, and Muhammad Abdul Qadir</i>	
An Automatic Workflow for the Formalization of Scholarly Articles’ Structural and Semantic Elements	309
<i>Bahar Sateli and René Witte</i>	
Author Index	321

Semantic Web Challenges

Third SemWebEval Challenge at ESWC 2016, Heraklion,
Crete, Greece, May 29 - June 2, 2016, Revised Selected
Papers

Sack, H.; Dietze, S.; Tordai, A.; Lange, C. (Eds.)

2016, XIII, 321 p. 79 illus., Softcover

ISBN: 978-3-319-46564-7
