1 Overview of Microarray Bioprinting Technology	1
Moo-Yeal Lee	
1.1 Overview	1
1.2 Microarray Chip Platforms	3
1.2.1 Chips and Instrument	3
1.2.2 Cell Microarrays	6
1.2.3 Enzyme Microarrays.....	7
1.2.4 Virus Microarrays	11
1.3 Experimental Procedures	12
1.3.1 Cell Spotting	13
1.3.2 Enzyme and Compound Spotting	13
1.3.3 Chip Incubation, Staining, Scanning, and Data Analysis	13
1.4 Advantages and Applications.....	14
References.....	16
2 Microarray Spotter and Printing Technologies.....	19
Akshata Datar, Dong Woo Lee, Sang Youl Jeon, and Moo-Yeal Lee	
2.1 Introduction.....	20
2.1.1 Contact Printing Techniques	20
2.1.2 Non-contact Printing Techniques.....	21
2.2 Materials	22
2.3 Components of S+ MicroArrayer	22
2.3.1 Main Body Components	23
2.3.2 Externally Connected Components.....	26
2.4 General Precautions for Operating S+ MicroArrayer.....	27
2.5 Daily Operations of S+ MicroArrayer	28
2.5.1 Turning ‘ON’ the System.....	29
2.5.2 Refilling the Pressure Bottles.....	29

2.5.3	Washing Tubes, Solenoid Valves, and Ceramic Tips with Ethanol and Water.....	30
2.5.4	Dispensing Samples on the Micropillar/Microwell Chips with a Work File	32
2.5.5	Replacing Solenoid Valves and Ceramic Tips	34
2.5.6	Turning 'OFF' the System	37
2.6	Detailed Programming for Normal Operation	38
2.6.1	Generating Wash and Dry Sequences	38
2.6.2	Defining Well Plates.....	38
2.6.3	Registering Chips.....	41
2.6.4	Registering Spot Layouts.....	44
2.6.5	Optimizing Dispensing Parameters Using Vision Inspection	47
2.7	Summary	50
	References.....	50
3	Chip Platforms and Chip Surface Treatments.....	53
	Parnian Bigdelou, Alexander Roth, Yana Sichkar, and Moo-Yeal Lee	
3.1	Introduction.....	54
3.1.1	Surface Modification of Micropillar and Microwell Chips ...	54
3.1.2	Surface Modification of Glass Slides.....	56
3.2	Materials	57
3.3	Protocols	58
3.3.1	Cleaning Microwell Chips with Plasma for Air Bubble Removal.....	58
3.3.2	Coating Micropillar Chips with Poly(maleic anhydride- <i>alt</i> -1-octadecene) (PMA-OD) for Cell Printing	61
3.3.3	Cleaning the Surface of Glass Slides with Acid	61
3.3.4	Coating of Glass Slides with Poly(styrene- <i>co</i> -maleic anhydride) (PS-MA) for Cell Printing	63
3.3.5	Coating of Acid-Cleaned Glass Slides with Methyltrimethoxysilane (MTMOS) for Enzyme Printing.....	64
3.3.6	Coating of Acid-Cleaned Glass Slides with (3-Aminopropyl)trimethoxysilane (APTMS) for Protein Attachment.....	65
3.3.7	Measurement of Silanization on the Surface of the APTMS Slides with Fluorescein Isothiocyanate (FITC) Labeling.....	65
3.3.8	Attachment of Glutaraldehyde on the Surface of the APTMS Slides for Protein Attachment	66
3.3.9	Immobilization of Extracellular Matrix (ECM) Proteins on Reactive Surfaces.....	67
3.4	Summary	68
	References.....	69

4 Biological Sample Printing	71
Parnian Bigdelou, Alexander Roth, Akshata Datar, and Moo-Yeal Lee	
4.1 Introduction.....	71
4.2 Materials	73
4.3 Preparation of Stock Solutions.....	74
4.4 Daily Operation of the S+ MicroArrayer for Dispensing Biological Samples	76
4.5 Sample Printing Protocols.....	80
4.5.1 Enzyme Printing for Metabolism-Induced Drug Toxicity Assays	80
4.5.2 Compound Printing	82
4.5.3 Cell Printing	85
4.5.3.1 Preparation of Cell Suspension in Growth Medium.....	85
4.5.3.2 Cell Printing for 2D Monolayer Culture on the Micropillar Chip.....	86
4.5.3.3 Cell Printing in Alginate for 3D Cultures	87
4.5.3.4 Cell Printing in Matrigel for 3D Cultures	90
4.5.3.5 Cell Printing in a Mixture of Alginate and Matrigel for 3D Cultures	93
4.5.3.6 Cell Printing in a Mixture of Alginate and Fibrinogen for 3D Cultures	95
4.5.3.7 Cell Printing in PuraMatrix for 3D Cultures.....	96
4.5.4 Virus Printing	98
4.5.4.1 Measurement of Viral Titer in a 96-Well Plate	98
4.5.4.2 Adenoviral Transduction on the Micropillar/ Microwell Chip	99
4.6 Inspection of Cells Printed on the Micropillar Chips Using a Bright-Field Microscope.....	101
4.7 Coefficient of Variation (CV) and Z' Factor for Assay Validation....	102
4.8 Summary	103
References	103
5 High-Content Cell Staining	105
Kyeong-Nam Yu, Pranav Joshi, and Moo-Yeal Lee	
5.1 Introduction.....	105
5.1.1 Fluorescent Dyes.....	106
5.1.2 Immunofluorescence (IF) Assays with Antibodies.....	107
5.1.3 Fluorescent Proteins.....	108
5.2 Materials	109
5.2.1 Reagents for Fluorescence Staining.....	109
5.2.2 Reagents for Immunofluorescence Staining	109
5.2.3 Devices for Cell Staining	110
5.2.4 Preparation of Dye Stock Solutions in DMSO	111

5.3	Protocols	112
5.3.1	Staining Cells with Fluorescent Dyes	112
5.3.1.1	Preparation of a Saline Solution	112
5.3.1.2	Staining Cells on the Micropillar/Microwell Chip Platform with Fluorescent Dyes	112
5.3.2	Staining Cells on the Chip Platform with Fluorophore-Labeled Antibodies	116
5.3.2.1	Cell Fixation	117
5.3.2.2	Permeabilization of Cell Membranes	117
5.3.2.3	Blocking of Nonspecific Binding and Incubation with Primary/Secondary Antibodies for Fluorescence Labeling and Detection	118
5.3.3	Measuring the Expression Levels of Drug Metabolizing Enzymes on a Chip	119
5.3.3.1	Tyramide Signal Amplification Kit (Life Technologies)	121
5.4	Summary	122
	References	122
6	3D-Cultured Cell Image Acquisition	125
	Pranav Joshi, Kyeong-Nam Yu, Emily Serbinowski, and Moo-Yeal Lee	
6.1	Introduction	125
6.2	Materials	127
6.3	Protocols	127
6.3.1	Daily Operational Procedures	128
6.3.2	Parameter Setting Procedures	135
6.3.2.1	Setting the Position of Filters and the Distance of Each Step for Autofocus	135
6.3.2.2	Setting XYZ Coordinates for Different Chips and Objective Lenses	137
6.4	Summary	139
6.5	Appendix	139
	References	141
7	High-Content Image Analysis	143
	Sean Yu, Pranav Joshi, Dong Woo Lee, and Moo-Yeal Lee	
7.1	Introduction	143
7.2	Materials	145
7.2.1	ImageJ	145
7.2.2	S+ Chip Analysis	145
7.3	Protocols	146
7.3.1	3D Cell Image Analysis with ImageJ	146
7.3.2	Examples of Image Processing with ImageJ	149
7.3.2.1	Hue Filter	149
7.3.2.2	Background Subtraction, Brightness Filter, and Region of Interest (ROI)	150

7.3.2.3	Outlier Exclusion	151
7.3.2.4	The Performance of the Plugin	151
7.3.3	Image Deconvolution	152
7.3.3.1	Performance of Deconvolution	154
7.3.4	Plotting Dose Response Curves with S+ Chip Analysis.....	154
7.4	Summary	159
	References.....	159
8	Applications of Microarray Bioprinting.....	161
	Alexander Roth, Emily Serbinowski, and Moo-Yeal Lee	
8.1	Introduction.....	161
8.2	Assay Development for Microarray Bioprinting Technologies	162
8.2.1	Hepatotoxicity Assays	162
8.2.1.1	Phase I and Phase II Drug Metabolizing Enzyme Assays	164
8.2.1.2	Drug Transporter Assays	165
8.2.1.3	Oxidative Stress Assays	166
8.2.2	Neurotoxicity Assays	166
8.2.2.1	Oxidative Stress and Related Assays	167
8.2.2.2	Ion Channel Assays.....	167
8.2.2.3	Drug Metabolism Assays.....	168
8.3	Simulation of the <i>In Vivo</i> Microenvironment: Liver Applications	169
8.4	Other Applications	171
8.5	Summary	171
	References.....	172

Microarray Bioprinting Technology

Fundamentals and Practices

Lee, M.-Y. (Ed.)

2016, XIII, 175 p. 120 illus., 114 illus. in color.,

Hardcover
