

Contents

1	Ergodicity for Functional Stochastic Equations	
	Under Dissipativity	1
1.1	An Overview of FSDEs	1
1.2	Introduction	3
1.3	Ergodicity for FSDEs	3
1.4	Ergodicity for FSDEs of Neutral Type	9
1.5	Ergodicity for FSPDEs Driven by Cylindrical Wiener Processes	13
1.6	Ergodicity for FSDEs Driven by Jump Processes	17
1.7	Ergodicity for FSPDEs Driven by α -Stable Processes	21
2	Ergodicity for Functional Stochastic Equations	
	Without Dissipativity	27
2.1	Introduction	27
2.2	Ergodicity for FSDEs Driven by Brownian Motions	29
2.3	Ergodicity for FSDEs of Neutral Type	37
2.4	Ergodicity for FSPDEs Driven by Cylindrical Wiener Processes	40
2.5	Ergodicity for FSDEs Driven by Jump Processes	45
3	Convergence Rate of Euler–Maruyama Scheme for FSDEs	55
3.1	Introduction	55
3.2	Convergence Rate under a Polynomial Condition: Systems Driven by Brownian Motions	56
3.3	Convergence Rate: Polynomial Condition for Systems Driven by Pure Jump Processes	62
3.4	Convergence Rate under a Logarithm Lipschitz Condition	68
4	Large Deviations for FSDEs	77
4.1	Introduction	77
4.2	Preliminaries	78

4.3	Uniform Large Deviations under Uniform Lipschitz Conditions	82
4.4	Uniform Large Deviations under Polynomial Growth Conditions	92
4.5	Moderate Deviations for SDDEs with Jumps	101
4.6	Central Limit Theorem for FSDEs of Neutral Type	108
5	Stochastic Interest Rate Models with Memory:	
	Long-Term Behavior.	113
5.1	Introduction	113
5.2	Preliminaries	115
5.3	Almost Sure Convergence of Long-Term Returns	120
5.4	An Application to Two-Factor CIR Models	125
	Appendix A: Existence and Uniqueness	129
	Appendix B: Markov Property and Variation of Constants	
	Formulas	137
	References	143
	Index	151

Asymptotic Analysis for Functional Stochastic
Differential Equations

Bao, J.; Yin, G.; Yuan, C.

2016, XVI, 151 p., Softcover

ISBN: 978-3-319-46978-2
