

Contents

Testing Methodologies

Conformance Testing with Respect to Partial-Order Specifications	3
<i>Gregor von Bochmann</i>	
Back-to-Back Testing of Self-organization Mechanisms	18
<i>Benedikt Eberhardinger, Axel Habermaier, Hella Seebach, and Wolfgang Reif</i>	
Test Generation by Constraint Solving and FSM Mutant Killing.	36
<i>Alexandre Petrenko, Omer Nguena Timo, and S. Ramesh</i>	
Risk-Based Interoperability Testing Using Reinforcement Learning	52
<i>André Reichstaller, Benedikt Eberhardinger, Alexander Knapp, Wolfgang Reif, and Marcel Gehlen</i>	
A Combinatorial Approach to Analyzing Cross-Site Scripting (XSS)	
Vulnerabilities in Web Application Security Testing	70
<i>Dimitris E. Simos, Kristoffer Kleine, Laleh Shikh Gholamhossein Ghandehari, Bernhard Garn, and Yu Lei</i>	

Heuristics and Non-determinism in Testing

Controllability Through Nondeterminism in Distributed Testing	89
<i>Robert M. Hierons, Mercedes G. Merayo, and Manuel Núñez</i>	
Parallelizing Heuristics for Generating Synchronizing Sequences.	106
<i>Sertaç Karahoda, Osman Tufan Erenay, Kamer Kaya, Uraz Cengiz Türker, and Hüsnü Yenigün</i>	
Resolving the Equivalent Mutant Problem in the Presence of Non-determinism and Coincidental Correctness.	123
<i>Krishna Patel and Robert M. Hierons</i>	
On-the-Fly Construction of Adaptive Checking Sequences for Testing Deterministic Implementations of Nondeterministic Specifications.	139
<i>Nina Yevtushenko, Khaled El-Fakih, and Anton Ermakov</i>	

Practical Applications

Mutation-Based Test Generation for PLC Embedded Software Using Model Checking	155
<i>Eduard P. Enoiu, Daniel Sundmark, Adnan Čaušević, Robert Feldt, and Paul Pettersson</i>	
STIPI: Using Search to Prioritize Test Cases Based on Multi-objectives Derived from Industrial Practice	172
<i>Dipesh Pradhan, Shuai Wang, Shaukat Ali, Tao Yue, and Marius Liaaen</i>	
From Simulation Data to Test Cases for Fully Automated Driving and ADAS	191
<i>Christoph Sippl, Florian Bock, David Wittmann, Harald Altinger, and Reinhard German</i>	

Short Contributions

Searching Critical Values for Floating-Point Programs	209
<i>Hélène Collavizza, Claude Michel, and Michel Rueher</i>	
UTTOS: A Tool for Testing UEFI Code in OS Environment	218
<i>Eder C.M. Gomes, Paulo R.P. Amora, Elvis M. Teixeira, Antonio G.S. Lima, Felipe T. Brito, Juliano F.C. Ciocari, and Javam C. Machado</i>	
Towards Model Construction Based on Test Cases and GUI Extraction	225
<i>Antti Jääskeläinen</i>	
Set-Based Algorithms for Combinatorial Test Set Generation	231
<i>Ludwig Kampel and Dimitris E. Simos</i>	
Automated Localisation Testing in Industry with Test*	241
<i>Mireilla Martinez, Anna I. Esparcia, Urko Rueda, Tanja E.J. Vos, and Carlos Ortega</i>	
Distribution Visualization for User Behavior Analysis on LTE Network.	249
<i>Masaki Suzuki, Quentin Plessis, Takeshi Kitahara, and Masato Tsuru</i>	
Author Index	257

Testing Software and Systems

28th IFIP WG 6.1 International Conference, ICTSS 2016,

Graz, Austria, October 17-19, 2016, Proceedings

Wotawa, F.; Nica, M.; Kushik, N. (Eds.)

2016, XVIII, 257 p. 62 illus., Softcover

ISBN: 978-3-319-47442-7
