

Contents

1 Introduction	1
References.	2
2 Pure State Extensions in Linear Algebra	3
2.1 Density Operators and Pure States	4
2.2 Extensions of Pure States	9
3 State Spaces and the Kadison-Singer Property	11
3.1 States on C^* -Algebras.	11
3.2 Pure States and Characters	14
3.3 Extensions of Pure States	17
3.4 Properties of Extensions and Restrictions	19
4 Maximal Abelian C^*-Subalgebras	23
4.1 Maximal Abelian C^* -Subalgebras.	23
4.2 Examples of Maximal Abelian C^* -Subalgebras	26
4.2.1 The Discrete Subalgebra	26
4.2.2 The Continuous Subalgebra	29
4.2.3 The Mixed Subalgebra	32
5 Minimal Projections in Maximal Abelian von Neumann Algebras	37
5.1 Unitary Equivalence	37
5.2 Minimal Projections	39
5.3 Subalgebras Without Minimal Projections	43
5.4 Subalgebras with Minimal Projections	50
5.5 Classification	58
6 Stone-Čech Compactification	59
6.1 Stone-Čech Compactification	59
6.2 Ultrafilters.	60
6.3 Zero-Sets	62
6.4 Ultra-Topology	63

6.5	Convergence of Ultrafilters for Tychonoff Spaces.	65
6.6	Pushforward	68
6.7	Convergence of Ultrafilters for Compact Hausdorff Spaces	69
6.8	Universal Property	70
7	The Continuous Subalgebra and the Kadison-Singer Conjecture . . .	71
7.1	Total Sets of States.	71
7.2	Haar States	74
7.3	Projections in the Continuous Subalgebra.	78
7.4	The Anderson Operator	81
7.5	The Kadison-Singer Conjecture	83
	References.	84
8	The Kadison-Singer Problem	85
8.1	Real Stable Polynomials.	85
8.2	Realizations of Random Matrices	90
8.3	Orthants and Absence of Zeroes.	94
8.4	Weaver's Theorem	102
8.5	Paving Theorems	105
8.6	Proof of the Kadison-Singer Conjecture	110
	References.	112
	Appendix A: Preliminaries	113
	Appendix B: Functional Analysis and Operator Algebras	117
	Appendix C: Additional Material	125
	Appendix D: Notes and Remarks	133
