

# Table of Contents

## **Part I Starting Situation 1**

1	Advanced Model-Based Engineering of Embedded Systems.....	3
1.1	Challenges in Embedded System Development.....	4
1.2	The SPES Engineering Methodology.....	5
1.3	Vision and Mission of SPES XT.....	6
1.4	Topics not Addressed.....	7
1.5	Key Contributions of the SPES XT Approach.....	8
1.6	The Future of Embedded Systems.....	9
1.7	References.....	9
2	Running Examples.....	11
2.1	Introduction.....	12
2.2	Automotive Example: Exterior Lighting and Speed Control.....	13
2.3	Automation Example: Desalination Plant.....	19
2.4	Summary.....	25
2.5	References.....	25

## **Part II Modeling Theory 27**

3	SPES XT Modeling Framework.....	29
3.1	Introduction.....	30
3.2	Structure of the SPES XT Modeling Framework.....	31
3.3	SPES Process Building Block Framework.....	35
3.4	Specific Extensions of the SPES XT Modeling Framework.....	39
3.5	Summary.....	41
3.6	References.....	42
4	SPES XT Context Modeling Framework.....	43
4.1	Introduction.....	44
4.2	The SPES XT Context Modeling Framework.....	46
4.3	Applying Context Models.....	54
4.4	Summary.....	55
4.5	References.....	55
5	SPES XT Systems Engineering Extensions.....	59
5.1	Introduction.....	60
5.2	Standard Engineering Processes.....	61
5.3	Integrating Systems and Software Engineering.....	62

5.4	Summary.....	70
5.5	References.....	71
<b>Part III Application of the SPES XT Modeling Framework</b>		<b>73</b>
6	Early Validation of Engineering Artifacts .....	75
6.1	Introduction.....	76
6.2	Supporting Artifacts for Validation .....	80
6.3	Validation Techniques.....	82
6.4	Summary.....	101
6.5	References.....	102
7	Verification of Systems in Physical Contexts .....	105
7.1	Introduction.....	106
7.2	Extensions to the SPES Modeling Framework .....	107
7.3	Methodological Building Blocks.....	113
7.4	Summary.....	116
7.5	References.....	116
8	System Function Networks.....	119
8.1	Introduction.....	120
8.2	Extensions to the SPES Modeling Framework .....	122
8.3	Methodological Process Building Blocks.....	128
8.4	Summary.....	142
8.5	References.....	143
9	Optimal Deployment.....	145
9.1	Introduction.....	146
9.2	Extensions to the SPES Modeling Framework .....	151
9.3	Methodological Process Building Blocks.....	154
9.4	Application to the Automotive Example.....	166
9.5	Summary.....	167
9.6	References.....	167
10	Modular Safety Assurance.....	169
10.1	Introduction.....	170
10.2	Integrated Safety Framework .....	173
10.3	Methodological Building Blocks.....	176
10.4	Summary.....	194
10.5	References.....	195
11	Variant Management and Reuse.....	197
11.1	Introduction.....	198
11.2	Variability Extension to the SPES Modeling Framework .....	199
11.3	Methodological Building Blocks.....	208

11.4 Summary .....	220
11.5 References .....	221
<b>Part IV Evaluation and Technology Transfer</b>	<b>223</b>
12 Experiences of Application in the Automation Domain.....	225
12.1 Introduction .....	226
12.2 Today's Process .....	227
12.3 Technological Hierarchy.....	228
12.4 Applying the SPES Viewpoints in the Automation Domain.....	230
12.5 Implication for Engineering Tools Used Today .....	236
12.6 Summary .....	237
12.7 References .....	238
13 Technology Transfer Concepts .....	241
13.1 Introduction .....	242
13.2 Technology Transfer in SPES XT.....	242
13.3 Guideline Concepts.....	244
13.4 Artifact Quality Assessment Framework.....	247
13.5 Summary .....	249
13.6 References .....	249
14 The SPES XT Tool Platform.....	251
14.1 Introduction .....	252
14.2 Interoperability and Tool Integration Concepts .....	252
14.3 Defining the SPES XT Tool Platform .....	255
14.4 Summary .....	261
14.5 References .....	261
15 Evaluation of the SPES XT Modeling Framework.....	263
15.1 Introduction .....	264
15.2 Evaluation Strategy.....	265
15.3 Method Toolkit.....	267
15.4 Evaluation Landscape.....	267
15.5 Applications of the Evaluation Strategy .....	269
15.6 Summary .....	270
15.7 References .....	270
16 Outlook.....	273
<b>Appendices</b>	<b>277</b>
A – Author Index.....	279
B – Project Structure .....	285
C – Members of the SPES XT Project .....	289

D – List of Publications..... 291

E – Index..... 301

Advanced Model-Based Engineering of Embedded  
Systems

Extensions of the SPES 2020 Methodology

Pohl, K.; Broy, M.; Daembkes, H.; Hönninger, H. (Eds.)

2016, XII, 303 p. 98 illus., Hardcover

ISBN: 978-3-319-48002-2
