

Contents

Graph Theory

On the Capture Time of Cops and Robbers Game on a Planar Graph	3
<i>Photchchara Pisantechakool and Xuehou Tan</i>	
The Mixed Evacuation Problem	18
<i>Yosuke Hanawa, Yuya Higashikawa, Naoyuki Kamiyama, Naoki Katoh, and Atsushi Takizawa</i>	
A Comprehensive Reachability Evaluation for Airline Networks with Multi-constraints	33
<i>Xiaotian You, Xiaofeng Gao, Yaru Dang, Guihai Chen, and Xinglong Wang</i>	
Approximation and Hardness Results for the Max k -Uncut Problem	49
<i>Peng Zhang, Chenchen Wu, Dachuan Xu, and Xinghe Zhang</i>	
On Strong Tree-Breadth	62
<i>Arne Leitert and Feodor F. Dragan</i>	
Computing a Tree Having a Small Vertex Cover	77
<i>Takuro Fukunaga and Takanori Maehara</i>	
On the Approximability of PARTIAL VC DIMENSION	92
<i>Cristina Bazgan, Florent Foucaud, and Florian Sikora</i>	
Improved Precise Fault Diagnosis Algorithm for Hypercube-Like Graphs. . .	107
<i>Tai-Ling Ye, Dun-Wei Cheng, and Sun-Yuan Hsieh</i>	
Finding Disjoint Paths on Edge-Colored Graphs: A Multivariate Complexity Analysis	113
<i>Riccardo Dondi and Florian Sikora</i>	
Total Dual Integrality of Triangle Covering	128
<i>Xujin Chen, Zhuo Diao, Xiaodong Hu, and Zhongzheng Tang</i>	
Time-Optimal Broadcasting of Multiple Messages in 1-in Port Model	144
<i>Petr Gregor, Riste Škrekovski, and Vida Vukašinović</i>	
Fast Searching on Complete k -partite Graphs	159
<i>Yuan Xue, Boting Yang, Farong Zhong, and Sandra Zilles</i>	

Cliques in Regular Graphs and the Core-Periphery Problem in Social Networks	175
<i>Ulrik Brandes, Eugenia Holm, and Andreas Karrenbauer</i>	
Constant Factor Approximation for the Weighted Partial Degree Bounded Edge Packing Problem	187
<i>Pawan Aurora, Monalisa Jena, and Rajiv Raman</i>	
An Introduction to Coding Sequences of Graphs.	202
<i>Shamik Ghosh, Raibatak Sen Gupta, and M.K. Sen</i>	
Minimum Eccentricity Shortest Path Problem: An Approximation Algorithm and Relation with the k-Laminarity Problem	216
<i>Étienne Birmelé, Fabien de Montgolfier, and Léo Planche</i>	
On the Complexity of Extracting Subtree with Keeping Distinguishability . . .	230
<i>Xianmin Liu, Zhipeng Cai, Dongjing Miao, and Jianzhong Li</i>	
Safe Sets in Graphs: Graph Classes and Structural Parameters	241
<i>Raquel Águeda, Nathann Cohen, Shinya Fujita, Sylvain Legay, Yannis Manoussakis, Yasuko Matsui, Leandro Montero, Reza Naserasr, Yota Otachi, Tadashi Sakuma, Zsolt Tuza, and Renyu Xu</i>	
On Local Structures of Cubicity 2 Graphs	254
<i>Sujoy Bhore, Dibyayan Chakraborty, Sandip Das, and Sagnik Sen</i>	
Approximability of the Distance Independent Set Problem on Regular Graphs and Planar Graphs	270
<i>Hiroshi Eto, Takehiro Ito, Zhilong Liu, and Eiji Miyano</i>	
Algorithmic Aspects of Disjunctive Total Domination in Graphs.	285
<i>Chin-Fu Lin and Sheng-Lung Peng</i>	
Instance Guaranteed Ratio on Greedy Heuristic for Genome Scaffolding	294
<i>Clément Dallard, Mathias Weller, Annie Chateau, and Rodolphe Giroudeau</i>	
Geometric Optimization	
Performing Multicut on Walkable Environments: Obtaining a Minimally Connected Multi-layered Environment from a Walkable Environment	311
<i>Arne Hillebrand, Marjan van den Akker, Roland Geraerts, and Han Hoogeveen</i>	
Minimum Weight Polygon Triangulation Problem in Sub-Cubic Time Bound.	326
<i>Sung Eun Bae, Tong-Wook Shinn, and Tadao Takaoka</i>	

The Mixed Center Location Problem	340
<i>Yi Xu, Jigen Peng, and Yinfeng Xu</i>	
Constrained Light Deployment for Reducing Energy Consumption in Buildings	350
<i>Huamei Tian, Kui Wu, Sue Whitesides, and Cuiying Feng</i>	
On the 2-Center Problem Under Convex Polyhedral Distance Function	365
<i>Sergey Bereg</i>	
Algorithms for Colourful Simplicial Depth and Medians in the Plane	378
<i>Olga Zassenko and Tamon Stephen</i>	
Realizability of Graphs as Triangle Cover Contact Graphs	393
<i>Shaheena Sultana and Md. Saidur Rahman</i>	
A Quadratic Time Exact Algorithm for Continuous Connected 2-Facility Location Problem in Trees (Extended Abstract)	408
<i>Wei Ding and Ke Qiu</i>	

Complexity and Data Structure

On the (Parameterized) Complexity of Recognizing Well-Covered (r, ℓ)-graphs	423
<i>Sancrey Rodrigues Alves, Konrad K. Dabrowski, Luerbio Faria, Sulamita Klein, Ignasi Sau, and Uéverton dos Santos Souza</i>	
Algorithmic Analysis for Ridesharing of Personal Vehicles	438
<i>Qian-Ping Gu, Jiajian Leo Liang, and Guochuan Zhang</i>	
On the Complexity of Bounded Deletion Propagation	453
<i>Dongjing Miao, Yingshu Li, Xianmin Liu, and Jianzhong Li</i>	
On Residual Approximation in Solution Extension Problems	463
<i>Mathias Weller, Annie Chateau, Rodolphe Giroudeau, Jean-Claude König, and Valentin Pollet</i>	
On the Parameterized Parallel Complexity and the Vertex Cover Problem . . .	477
<i>Faisal N. Abu-Khzam, Shouwei Li, Christine Markarian, Friedhelm Meyer auf der Heide, and Pavel Podlipyan</i>	
A Linear Potential Function for Pairing Heaps	489
<i>John Iacono and Mark Yagnatinsky</i>	
Amortized Efficiency of Ranking and Unranking Left-Child Sequences in Lexicographic Order	505
<i>Kung-Jui Pai, Ro-Yu Wu, Jou-Ming Chang, and Shun-Chieh Chang</i>	

Combinatorial Optimization

Optimal Speed Scaling with a Solar Cell (Extended Abstract)	521
<i>Neal Barcelo, Peter Kling, Michael Nugent, and Kirk Pruhs</i>	
An Approximation Algorithm for the k -Median Problem with Uniform Penalties via Pseudo-Solutions	536
<i>Chenchen Wu, Donglei Du, and Dachuan Xu</i>	
On-Line Pattern Matching on Uncertain Sequences and Applications.	547
<i>Carl Barton, Chang Liu, and Solon P. Pissis</i>	
Scheduling with Interjob Communication on Parallel Processors	563
<i>Jürgen König, Alexander Mäcker, Friedhelm Meyer auf der Heide, and Sören Riechers</i>	
Cost-Efficient Scheduling on Machines from the Cloud	578
<i>Alexander Mäcker, Manuel Malatyali, Friedhelm Meyer auf der Heide, and Sören Riechers</i>	
Strategic Online Facility Location	593
<i>Maximilian Drees, Björn Feldkord, and Alexander Skopalik</i>	
An Efficient PTAS for Parallel Machine Scheduling with Capacity Constraints.	608
<i>Lin Chen, Klaus Jansen, Wenchang Luo, and Guochuan Zhang</i>	
A Pseudo-Polynomial Time Algorithm for Solving the Knapsack Problem in Polynomial Space	624
<i>Noriyuki Fujimoto</i>	

Game Theory

An Incentive Mechanism for Selfish Bin Covering	641
<i>Weian Li, Qizhi Fang, and Wenjing Liu</i>	
Congestion Games with Mixed Objectives	655
<i>Matthias Feldotto, Lennart Leder, and Alexander Skopalik</i>	
An Optimal Strategy for Static Black-Peg Mastermind with Two Pegs.	670
<i>Gerold Jäger</i>	

Miscellaneous

The Incentive Ratio in Exchange Economies	685
<i>Ido Polak</i>	

w -Centroids and Least (w, l) -Central Subtrees in Weighted Trees	693
<i>Erfang Shan and Liying Kang</i>	
Solving Dynamic Vehicle Routing Problem with Soft Time Window by iLNS and hPSO	702
<i>Xiaohan He, Xiaoli Zeng, Liang Song, Hejiao Huang, and Hongwei Du</i>	
Convex Independence in Permutation Graphs	710
<i>Wing-Kai Hon, Ton Kloks, Fu-Hong Liu, and Hsiang-Hsuan Liu</i>	
The Connected p -Center Problem on Cactus Graphs	718
<i>Chunsong Bai, Liying Kang, and Erfang Shan</i>	
Comparison of Quadratic Convex Reformulations to Solve the Quadratic Assignment Problem	726
<i>Sourour Elloumi and Amélie Lambert</i>	
Using Unified Model Checking to Verify Heaps	735
<i>Xu Lu, Zhenhua Duan, and Cong Tian</i>	
A Filtering Heuristic for the Computation of Minimum-Volume Enclosing Ellipsoids	744
<i>Linus Källberg and Thomas Larsson</i>	
Relaxations of Discrete Sets with Semicontinuous Variables	754
<i>Gustavo Angulo</i>	
Unfolding the Core Structure of the Reciprocal Graph of a Massive Online Social Network.	763
<i>Braulio Dumba and Zhi-Li Zhang</i>	
Tackling Common Due Window Problem with a Two-Layered Approach . . .	772
<i>Abhishek Awasthi, Jörg Lässig, Thomas Weise, and Oliver Kramer</i>	
A Polynomial Time Solution for Permutation Scaffold Filling.	782
<i>Nan Liu, Peng Zou, and Binhai Zhu</i>	
Author Index	791

Combinatorial Optimization and Applications
10th International Conference, COCOA 2016, Hong
Kong, China, December 16–18, 2016, Proceedings
Chan, T.-H.H.; Li, M.; Wang, L. (Eds.)
2016, XV, 793 p. 161 illus., Softcover
ISBN: 978-3-319-48748-9
