

# Contents

<b>1</b>	<b>Controlled Periodic Equations, LQ Problems and Periodic Stabilization</b>	<b>1</b>
1.1	Controlled Periodic Evolution Equations	1
1.2	Linear Quadratic Optimal Control Problems	11
1.2.1	Finite Horizon Case	11
1.2.2	Infinite Horizon Case	21
1.3	Relation Between Periodic Stabilization and LQ Problems	26
<b>2</b>	<b>Criteria on Periodic Stabilization in Infinite Dimensional Cases</b>	<b>31</b>
2.1	Attainable Subspaces	31
2.2	Three Criteria on Periodic Feedback Stabilization	34
2.2.1	Multi-periodic Feedback Stabilization	34
2.2.2	Proof of Theorem 2.1	41
2.3	Applications	51
2.3.1	Feedback Realization in Finite Dimensional Subspaces	51
2.3.2	Applications to Heat Equations	53
<b>3</b>	<b>Criteria on Periodic Stabilization in Finite Dimensional Cases</b>	<b>59</b>
3.1	Null Controllable Subspaces	60
3.2	Algebraic Criterion and Application	66
3.2.1	The Proof of (a) $\Leftrightarrow$ (c) in Theorem 3.1	67
3.2.2	The Proof of (a) $\Leftrightarrow$ (b) in Theorem 3.1	74
3.2.3	Decay Rate of Stabilized Equations	84
3.3	Geometric Criterion	87
<b>4</b>	<b>Design of Simple Control Machines</b>	<b>95</b>
4.1	The First Kind of Simple Control Machines	96
4.2	The Second Kind of Simple Control Machines—General Case	97
4.3	The Second Kind of Simple Control Machines—Special Case	105
