

# Contents

- 1 Introduction . . . . . 1**
  - 1.1 Processes, Models, and Data . . . . . 1
  - 1.2 Process Mining . . . . . 3
  - 1.3 Conformance Checking Explained: The University Case . . . . . 5
  - 1.4 Book Outline . . . . . 7

**Part I Conformance Checking in Process Mining**

- 2 Conformance Checking and its Challenges . . . . . 11**
  - 2.1 The Role of Process Models in Conformance Checking . . . . . 11
  - 2.2 Dimensions of Conformance Checking . . . . . 12
  - 2.3 Replay-based and Align-based Conformance Checking . . . . . 15
  - 2.4 Challenges of Conformance Checking . . . . . 15
- 3 Conformance Checking and its Elements . . . . . 19**
  - 3.1 Basic Notations . . . . . 20
  - 3.2 Event Logs . . . . . 22
  - 3.3 Process Models . . . . . 23
  - 3.4 Process Modeling Formalisms . . . . . 26
    - 3.4.1 Petri Nets . . . . . 26
    - 3.4.2 Workflow Nets . . . . . 28
    - 3.4.3 Other Formalisms . . . . . 28

**Part II Precision in Conformance Checking**

- 4 Precision in Conformance Checking . . . . . 33**
  - 4.1 Precision: The Forgotten Dimension . . . . . 34
  - 4.2 The Importance of Precision . . . . . 34
  - 4.3 Measures of Precision . . . . . 35
  - 4.4 Requirements for Precision . . . . . 37

<b>5</b>	<b>Measuring Precision</b>	<b>39</b>
5.1	Precision based on Escaping Arcs	40
5.2	Constructing the Observed Behavior	42
5.3	Incorporating Modeled Behavior	43
5.4	Detecting Escaping Arcs and Evaluating Precision	46
5.5	Minimal Imprecise Traces	49
5.6	Limitations and Extensions	51
5.6.1	Unfitting Scenario	51
5.6.2	Indeterministic Scenario	52
5.7	Summary	53
<b>6</b>	<b>Evaluating Precision in Practice</b>	<b>55</b>
6.1	The University Case: The Appeals Process	56
6.2	Experimental Evaluation	58
<b>7</b>	<b>Handling Noise and Incompleteness</b>	<b>61</b>
7.1	Introduction	62
7.2	Robustness on the Precision	62
7.3	Confidence on Precision	67
7.3.1	Upper Confidence Value	67
7.3.2	Lower Confidence Value	69
7.4	Experimental Results	70
7.5	Summary	73
<b>8</b>	<b>Assessing Severity</b>	<b>75</b>
8.1	Introduction	76
8.2	Severity of an Escaping Arc	76
8.2.1	Weight of an Escaping Arc	77
8.2.2	Alternation of an Escaping Arc	78
8.2.3	Stability of an Escaping Arc	78
8.2.4	Criticality of an Escaping Arc	80
8.2.5	Visualizing the Severity	80
8.2.6	Addressing Precision Issues based on Severity	81
8.3	Experimental Results	82
8.4	Summary	84
<b>9</b>	<b>Handling non-Fitness</b>	<b>85</b>
9.1	Introduction	86
9.2	Cost-Optimal Alignment	88
9.3	Precision based on Alignments	92
9.4	Precision from 1-Alignment	93
9.5	Summary	96

<b>10</b>	<b>Alternative and Variants to Handle non-Fitness</b>	<b>97</b>
10.1	Precision from All-Alignment	98
10.2	Precision from Representative-Alignment	100
10.3	Abstractions for the Precision based on Alignments	102
10.3.1	Abstraction on the Order	104
10.3.2	Abstraction on the Direction	105
10.4	Summary	106
<b>11</b>	<b>Handling non-Fitness in Practice</b>	<b>107</b>
11.1	The University Case: The Exchange Process	108
11.2	Experimental Results	112

### Part III Decomposition in Conformance Checking

<b>12</b>	<b>Decomposing Conformance Checking</b>	<b>121</b>
12.1	Introduction	122
12.2	Single-Entry Single-Exit and Refined Process Structure Tree	123
12.3	Decomposing Conformance Checking using SESEs	125
12.4	Summary	127
<b>13</b>	<b>Decomposing for Fitness Checking</b>	<b>129</b>
13.1	Introduction	130
13.2	Bridging a Valid Decomposition	130
13.3	Decomposition with invisible/duplicates	135
13.4	Summary	138
<b>14</b>	<b>Decomposing Conformance Checking in Practice</b>	<b>141</b>
14.1	The Bank Case: The Transaction Process	142
14.2	Experimental Results	145
<b>15</b>	<b>Diagnosing Conformance</b>	<b>151</b>
15.1	Introduction	152
15.2	Topological Conformance Diagnosis	153
15.3	Multi-level Conformance Diagnosis and its Applications	156
15.3.1	Stand-alone Checking	156
15.3.2	Multi-Level Analysis	157
15.3.3	Filtering	158
15.4	Experimental Results	159
15.5	Summary	161
<b>16</b>	<b>Data-aware Processes and Alignments</b>	<b>163</b>
16.1	Introduction	164
16.2	Data-aware Processes	166
16.2.1	Petri nets with Data	166
16.2.2	Event Logs and Relating Models to Event Logs	169
16.2.3	Data Alignments	170

16.3	Summary .....	172
<b>17</b>	<b>Decomposing Data-aware Conformance .....</b>	<b>173</b>
17.1	Introduction .....	174
17.2	Valid Decomposition of Data-aware Models .....	174
17.3	SESE-based Strategy for a Valid Decomposition .....	176
17.4	Implementation and Experimental Results .....	177
17.5	Summary .....	179
<b>18</b>	<b>Event-based Real-time Decomposed Conformance Checking .....</b>	<b>181</b>
18.1	Introduction .....	182
18.2	Event-based Real-time Decomposed Conformance .....	182
18.2.1	Model and Log Decomposition .....	182
18.2.2	Event-based Heuristic Replay .....	184
18.3	Experimental Results .....	186
18.4	Summary .....	188
 <b>Part IV Conclusions and Future Work</b>		
<b>19</b>	<b>Conclusions .....</b>	<b>191</b>
19.1	Conclusion and Reflection .....	191
19.2	Summary of Contributions .....	192
19.3	Challenges and Directions for Future Work .....	193
<b>References .....</b>		<b>197</b>

Conformance Checking and Diagnosis in Process Mining  
Comparing Observed and Modeled Processes

Munoz-Gama, J.

2016, XIV, 202 p. 90 illus., Softcover

ISBN: 978-3-319-49450-0
