

# Contents

<b>1</b>	<b>Critical Infrastructures, Protection and Resilience</b> . . . . .	<b>1</b>
	Roberto Setola, Eric Luijff and Marianthi Theocharidou	
<b>2</b>	<b>Modelling Dependencies Between Critical Infrastructures</b> . . . . .	<b>19</b>
	Roberto Setola and Marianthi Theocharidou	
<b>3</b>	<b>Critical Infrastructure Disruption Scenarios Analyses via Simulation</b> . . . . .	<b>43</b>
	Mohamed Eid and Vittorio Rosato	
<b>4</b>	<b>Physical Simulators of Critical Infrastructures</b> . . . . .	<b>63</b>
	Antonio Di Pietro, Carlo Liberto, Nikolas Flourentzou, Elias Kyriakides, Ivo Pothof and Gaetano Valenti	
<b>5</b>	<b>Phenomenological Simulators of Critical Infrastructures</b> . . . . .	<b>85</b>
	Alberto Tofani, Gregorio D’Agostino and José Martí	
<b>6</b>	<b>Federated Simulations</b> . . . . .	<b>109</b>
	Wim Huiskamp and Tom van den Berg	
<b>7</b>	<b>Cyber Threats Impacting Critical Infrastructures</b> . . . . .	<b>139</b>
	Michał Choraś, Rafał Kozik, Adam Flizikowski, Witold Hołubowicz and Rafał Renk	
<b>8</b>	<b>Verification and Validation for CIPRNet</b> . . . . .	<b>163</b>
	Jeroen Voogd	
<b>9</b>	<b>Design of DSS for Supporting Preparedness to and Management of Anomalous Situations in Complex Scenarios</b> . . . . .	<b>195</b>
	Antonio Di Pietro, Luisa Lavallo, Luigi La Porta, Maurizio Pollino, Alberto Tofani and Vittorio Rosato	

<b>10</b>	<b>The Use of What-If Analysis to Improve the Management of Crisis Situations. . . . .</b>	<b>233</b>
	Erich Rome, Thomas Doll, Stefan Rilling, Betim Sojeva, Norman Voß and Jingquan Xie	
<b>11</b>	<b>Model Coupling with OpenMI Introduction of Basic Concepts . . . .</b>	<b>279</b>
	Bernhard Becker and Andreas Burzel	

Managing the Complexity of Critical Infrastructures

A Modelling and Simulation Approach

Setola, R.; Rosato, V.; Kyriakides, E.; Rome, E. (Eds.)

2016, VIII, 299 p. 136 illus., 117 illus. in color.,

Hardcover

ISBN: 978-3-319-51042-2
