List of Figures	xiii
List of Tables	xv
List of Notations	xix
List of Abbreviations	xxiii
1 Introduction	1
1.1 Aims and Contributions of the Thesis	4
1.2 Overview of the Thesis	7
1.3 Publications	8
2 Job Shop Scheduling - Formulation and Modeling	9
2.1 Problem Structure	9
2.2 Classification into the Scheduling Theory	11
2.3 Mathematical Model and Complexity	13
2.4 The Disjunctive Graph Model	15
2.5 The Concept of the Critical Tree	17
2.6 Exemplification on the instance ft06 ($f = 1.3$)	19
3 Literature Review	25
3.1 Exact Algorithms	25
3.2 Dispatching Rules	26
3.3 Shifting Bottleneck Heuristic	26
3.4 Local Search based Algorithms and Techniques	27
3.5 Other Heuristic Approaches	27
3.6 Hybrid Approaches	28
3.7 Summary	29

4	Neighborhood Definitions for the JSPTWT	31
4.1	The Basic Concept of Neighborhood Search	31
4.2	Existing Neighborhoods	33
4.3	New Neighborhoods	37
4.4	Characteristics of the proposed Neighborhoods	41
4.4.1	Feasibility Property	42
4.4.2	Connectivity Property	45
4.4.3	Estimate of the Size of the Neighborhoods	48
4.5	Performance Analysis	51
4.5.1	Test Suite	51
4.5.2	Local Search with a Single Neighborhood Operator	52
4.5.3	Local Search with Pairs of Neighborhood Operators	57
4.5.4	Local Search with all Neighborhood Operators	60
4.6	Summary	62
5	Neighbor Evaluation Procedures in Local Search based Algorithms for solving the JSPTWT	65
5.1	Basic Principles	66
5.2	Lower Bound Procedure for the CET Neighborhood	70
5.3	Lower Bound Procedure for the SCEI Neighborhood	72
5.4	A new approach: Heads Updating	74
5.5	Performance Test	77
5.6	Summary	80
6	Solving the JSPTWT - a new Solution Procedure	81
6.1	Metaheuristic Concepts	81
6.1.1	Basic Concept of Metaheuristics	82
6.1.2	Some Metaheuristics	84
6.1.3	The Fitness Landscape: a brief Side Trip	87
6.2	Algorithmic Concept for a new Solution Procedure	95
6.2.1	Motivation and Overview of the Algorithmic Concept	96
6.2.2	Construction Algorithm	99
6.2.3	Improvement Algorithm	102
6.2.4	Adaptive Components	104
6.2.5	Configuration and Parameter Values	109

7	Computational Study	119
7.1	Benchmark Instances of the JSPTWT	119
7.1.1	Modification of JSP Instances	119
7.1.2	Standard Benchmark Set of Singer and Pinedo	120
7.1.3	Lawrence's Instances	131
7.2	Other Objective Functions	136
7.2.1	JSP with minimizing the Total Flow Time	137
7.2.2	JSP with minimizing the Number of Tardy Jobs	141
7.3	Summary	145
8	Conclusion	147
	Bibliography	151
A	Applying Neighborhood Operators: the example ft06 ($f = 1.3$)	167
	Appendices	
B	Overview of considered Dispatching Rules	171
C	Computational Results from the Literature	175
D	Analysis of the EGRASP result for the problem instance orb08 ($f = 1.6$)	181
E	Computational Results for the JSPTWU	187

Job Shop Scheduling with Consideration of Due Dates
Potentials of Local Search Based Solution Techniques
Kuhpfahl, J.

2016, XXV, 190 p. 37 illus., Softcover

ISBN: 978-3-658-10291-3
