List of Figures	15
Introduction	19

Part I Interdisciplinary Perspectives of Cognitive Sciences in Terms of Music

1 Perspectives of Developmental Psychology: Between Pre-disposed Structures and Musical Experience	27
1.1 Ontogeny of Musical Abilities during the Prenatal Period	27
1.1.1 The Fetal Sound Environment	27
1.1.2 Fetal Auditory Competencies	30
1.1.3 Fetal Auditory Learning and Memory Structures	33
1.2 Infants' Auditory Sensitivity Related to Acoustical Parameters of Music	35
1.2.1 Auditory Threshold Sensitivity	35
1.2.2 Auditory Sensitivity for Frequency, Pitch and Timbre Discrimination	40
1.3 Perspectives of Infants General Musical Organization	46
1.3.1 Auditory Grouping and Segregation Processes	47
1.3.2 Perception of Time and Rhythmical Structures - a Sensorimotor Perspective	49
1.3.3 Processing of 'Musical' Sequences	55
1.4 The Evolving Musical-Artistic Competence From Infancy to Adulthood	57
1.4.1 Child Development in a Social-Cultural Environment - the perspective of Piaget and Neo-Piagetian	58
1.4.2 Three Models of Musical-Artistic Development	64

1.4.2.1	Hargreaves 'Five Age-Related Phases in Musical-Artistic Development'	65
1.4.2.2	Swanwick and Tillman's Model of 'Developmental Spiral'	69
1.4.2.3	Schubert and McPherson's Model of Emotion Perception in Music	72
1.4.2.4	Conclusion – Relationships and Distinctions Amongst the Three Theories	77
1.5	Summary	80
2	Perspectives on Creativity in General and while Music is being Listened to and Composed	85
2.1	Perspectives on Creativity in General	85
2.1.1	Cognition and Creativity	85
2.1.2	Developmental and Social Influences on Creativity	90
2.1.3	Creativity in Dependence on Personality, Motivation, and Emotion	96
2.2	Musical Creativity/Creative Thinking in Sound	111
2.3	Developmental Aspects of Musical Creativity/Creative Thinking in Sound	118
2.3.1	Definitions of Musical Creativity in the Course of Development	118
2.3.2	Perspectives to Measure the Potential and its Development within 'the Psychometric Approach' of Musical Creativity	121
2.3.3	Conclusions – Measurement of Musical Creativity/Creative Thinking in Sound/Music and their Development	136
2.4	Creativity in Listening to Music	140
2.4.1	Listeners as (Creative) Makers of Music	140
2.4.2	Various Ways of Listening (to Music)	144
2.4.3	Creativity Research in Terms of Listening to Music	153
2.4.4	Conclusions	160
2.5	Creativity while Composing of Music	162
2.5.1	The Role of Imagery and Imagination	162
2.5.2	Composing Music – A Creative Problem-Solving Perspective	168

2.5.2.1	Between Ill-defined Problems and Well-structured Solutions	169
2.5.2.2	Influences while Composing of Music	173
2.5.2.3	Models describing Creative Problem-Solving in Terms of Composing Music	180
2.6	Summary	191

Part II Musical Extrapolations – Towards a Model of Creativity in Music

3	At the Very Heart (of Music)	209
4	The Model of Musical Extrapolations – Basic Factors and their Inter-dependencies	223
4.1	Intrinsic Activity and Motivation	223
4.2	Pre-disposed and Experience-based Structures	228
4.2.1	Pre-disposed	228
4.2.2	Experience-based	232
4.3	Environmental Pressure	239
4.4	At the Very Heart of <i>New</i> Musical Extrapolations	247
4.4.1	Problem-Construction and Problem-Finding	249
4.4.2	Idea-Generation	254
4.4.3	Evaluation	264
4.5	Summary	270
5	Perspectives of Investigation Based on the Outlined Model of Musical Extrapolations	289
	References	295
	Appendices	345

Musical Extrapolations
Creative Processes Involved While Music is Being
Listened to and Composed
Schmidt, S.
2016, XXIV, 324 p. 46 illus., Softcover
