Abstract.....	ix
Table of Contents.....	xi
Table of Abbreviations	xvii
Mathematical Notations.....	xix
1 Introduction	1
1.1 Why Look at Signs in the Learning of Mathematics: Becoming Aware of a Chicken-Egg Problem and the Importance to Address it	1
1.2 The Project	2
1.3 On the Structure of this Book	3
Part I: State of the Art and Theoretical Background	7
2 State of the Art	9
2.1 A Psychologist’s Approach to Gestures in the Learning of Mathematics	9
2.2 Research in Mathematics Education on the Role of Gestures in Learning Processes	10
2.3 The Epistemic Role of Gestures Against the Background of Different Theoretical Frameworks	12
2.4 The Epistemic Role of Gestures in this Project	14
3 Shaping the Semiotic Approach	19
3.1 Signs: The Peircean Semiotics	19
3.1.1 Definition of Signs and the Process of Semiosis	20
3.1.2 The Trichotomy of the Object: Iconic, Indexical, and Symbolic ..	22
3.1.3 The Representational and the Epistemic Function of Signs	25
3.2 Gestures: A Framework for this Study	26
3.2.1 Understanding of Gestures in this Study	26
3.2.2 Gesture and Speech: An Integrative System	28
3.2.3 Gesture Classification	31

4	Perspectives on Learning	35
4.1	Learning as a Social Process: An Epistemic Action Model	35
4.2	Embodied Thinking and Learning: How our Body Shapes our Mind	37
4.2.1	The Role of Metaphors in the Conceptualization of Mathematics	38
4.2.2	Multimodality and Perceptuo-Motor Experiences in Learning Mathematics	42
4.3	Learning as a Multimodal Process	44
4.3.1	The Basic Idea of the Semiotic Bundle	44
4.3.2	The Analysis Of and Within the Semiotic Bundle	46
4.3.3	Implications for the Mathematics Classroom	48
4.4	Summarizing the Theoretical Frame for this Study	49
	 Part II: The Study	 51
5	Methodological Assumptions	53
5.1	The Goal of this Study: Focus, Aims, and Questions against the Theoretical Background	53
5.2	The Interpretative Approach	55
5.2.1	Handling the Data within the Interpretative Approach	55
5.2.2	Transcript versus Video Data: Dealing with Gestures	56
5.2.3	Analyzing Interaction by Tracing the Development of Signs	58
5.2.3.1	A Reconstructivist Approach, Based on a Peircean Understanding of Signs	58
5.2.3.2	Considering a Multimodal Approach by Using the Model of the Semiotic Bundle	67
5.2.3.3	Combining Both Approaches	76
5.3	Theoretical Sampling as a Focusing Strategy	79
5.4	Forming the Building Blocks for a Theory on Gestures' Contribution to Social Epistemic Processes	79
5.4.1	Identifying the Gestures to be Analyzed	79
5.4.2	Elaborating Functions of Gestures as Empirically Based Categories	80
5.4.3	The Scope of the Theoretical Building Blocks	81
5.5	Quality Criteria and Methodological Concerns from Gesture Studies	81

5.5.1	Quality Criteria Considered in Qualitative Research	81
5.5.2	Criteria Considered in Gesture Studies	85
6	Methods	89
6.1	Setting	89
6.1.1	General Aspects of the Study and on Gathering the Data	89
6.1.2	The Students	90
6.1.3	The Tasks	91
6.1.3.1	Geometric-Algebraic: The Parabola as Geometrical Locus (PA)	91
6.1.3.2	Arithmetic-Analytic: Continued Fraction (CF)	94
6.1.3.3	Logical Reasoning: Induction (IN)	95
6.2	Methods of the Analysis	96
6.2.1	Data Preparation	96
6.2.2	Choice of Data	97
6.2.3	Analysis of the Data	98
6.2.3.1	Steps 1-3: Preparatory Steps	99
6.2.3.2	Steps 4 and 5: Main Steps	104
6.2.3.3	Step 6: Comparative Step	108
6.3	Presentation of the Results	108

Part III: Results **111**

7	Representing <i>Within</i> the Multimodal Sign	113
7.1	Within-Functions of Gestures: A Tool to Integrate How Gestures May Shape Mathematical Meaning	113
7.1.1	Specifying the Immediate Object: Adding What is not Revealed in Speech	114
7.1.1.1	Clarifying Imprecise Terms: Gesture can Complement the Immediate Object Presented in Speech by Filling a Semantic Gap	114
7.1.1.2	From Clarifying to Specifying: Providing a Real Surplus of Meaning	119
7.1.1.3	Specifying-Gestures in <i>Mismatch</i> -Situations: Gestures Take the Lead	121

7.1.1.4	Summarizing Overview of the Specifying-Function of Gestures on Speech	125
7.1.2	Specification and Non-Specification: Further Details	126
7.1.2.1	Coding Guideline for Illustrators	127
7.1.2.2	Non-Specifying Illustrators	128
7.1.3	Gestures can Refer to Mathematical Objects on Three Spatial Levels	134
7.1.3.1	Presentation of the Three Levels of Gestural Reference	134
7.1.3.2	Summarizing Overview about the Referential Levels of Gestures	138
7.1.4	Closing Remarks on the Within-functions of Gestures	139
7.2	Reconstructing Meaning in Social Interaction: The Development of Associated Signs and Information Bundles	140
7.2.1	Detailed Reconstruction of Two Illustrative Examples	141
7.2.2	Evidence on the Use of Associated Signs	150
7.2.2.1	Evidence through Irritation when the Use of a Gesture does Not Fit the Context	151
7.2.2.2	Evidence through Students' Joint Packing and Shared Use of the Associated Sign	155
7.2.3	Closing Remarks on Associated Signs	157
7.3	Representing Within the Multimodal Sign: Within-Functions as a Methodological Tool	158
7.4	Summary	159
8	The Epistemic Process in Progress	161
8.1	Epistemic Functions of Gestures: Detailed Descriptions of the Categories as Reconstructed within the Data	162
8.1.1	Forming-Functions: How Gestures can Provide Visual Access to a Mathematical Object that is Involved in an Epistemic Action	162
8.1.1.1	Sourcing Out	162
8.1.1.2	Depicting	168
8.1.1.3	Extracting	174
8.1.1.4	Illustrating Generality	180
8.1.1.5	Summarizing Overview on the Forming-Functions of Gestures	181

8.1.2	Performing-Functions: How Gestures can Take Part in the Accomplishment of an Epistemic Action	181
8.1.2.1	Focusing	182
8.1.2.2	Exemplifying	190
8.1.2.3	Contrasting	193
8.1.2.4	Making More Precise	197
8.1.2.5	Gluings	202
8.1.2.6	Structuring Verbal Discourse	205
8.1.2.7	Summarizing Overview on the Performing Functions ..	206
8.2	Extensive Reconstruction of a Larger Scene: Merging the Possible Variety of Gestures' Contribution to the Epistemic Process	208
8.2.1	Semiotic Analysis: Epistemic Functions of Gestures	212
8.2.2	Reflection on the Benefit of Using Gestures with Respect to the Epistemic Process	222
8.3	Summary	224
9	Towards the Role of Gestures: A Comparison	227
9.1	Horizontal Comparison: One Task, Different Pairs of Students (PA5, PA7, PA6)	227
9.2	Vertical Comparison: One Pair of Students, Different Tasks (PA7, CF7, IN7)	231
9.3	Summarizing Conclusions Resulting from the Horizontal and the Vertical Comparison	242
10	Reflection, Synopsis, Perspectives	245
11	References	251
12	Glossary	265
12.1	What is Meant by... ..	265
12.2	Glossary of Important Gestures Referred to in This Study	272
Part IV:	Appendix	275
A	The Tasks.....	277
a)	Parabola	277

b) Continued Fraction282

c) Induction286

B Analysis of the Tasks287

a) Parabola287

b) Continued Fraction297

c) Induction305

**C Condensed Process Diagrams of the Epistemic-Dense Episodes
as Used for Comparisons Between the Data Sets309**

D The Inscriptions Produced by the Students313

a) PA5313

b) PA7320

c) PA6326

d) CF7330

e) IN7336

E Example of a Multimodal SRA (PA5e1.1)339
