

Table of Contents

Table of Contents.....	IX
Abbreviations.....	XIII
Figures.....	XV
Tables.....	XXIII
1 Introduction.....	1
2 Measuring Technology Maturity: Theoretical Aspects.....	9
2.1 Details of the Sommerlatte & Deschamps Strategic Technology Management Approach and Maturity Model.....	10
2.1.1 Benefits of a Firm-Wide Technology Strategy.....	11
2.1.2 Reconstruction of the Sommerlatte and Deschamps Approach.....	15
2.1.3 Newly Enabled Capabilities to Assess Technology Maturity Automatically as a Functional Option to Improve the S&D Approach in General and the S&D Model in Particular	30
2.1.4 Technology Management Office as a Structural Option to Improve the S&D approach.....	34
2.2 Defining Basic Terms and Mechanisms of Technology Maturity and Developing a Characterization and Operationalization Framework for Theoretical Technology Maturity Models.....	35
2.2.1 Delineating Technologies as the Objects of Maturity Measurement	36
2.2.2 Developing a Framework for Maturity Model Characterization	41
2.2.3 Profiles of Selected Popular Models	51
2.3 Operationalizing Theoretical Technology Maturity Indicators	61
2.3.1 The Typology of Grupp and Options for More Indicators.....	62
2.3.2 Information Scattering in Different Text Media	66
2.3.3 Identifying Text Media Suitable for Informetric Analyses	69
2.3.4 Deriving Relevant Indicator Values	85
2.3.5 Employing and Combining Indicators	102
3 Designing an Empirical Analysis	115

4	Execution and Results of the Empirical Analysis	121
4.1	Issue Identification	121
4.2	Using the Delphi Method for Letting Experts Typify Technology Maturity	124
4.3	Selection of Data Sources	129
4.4	Search Refinement, Data Retrieval, and Data Cleaning	134
4.5	Basic Analyses	137
4.5.1	Absolute Invention Count per Year	137
4.5.2	Absolute Scientific Publication Activity	140
4.5.3	Absolute Web Search Queries in Google Trends	140
4.5.4	Juxtaposition of Absolute Document Frequencies for Technology Application, Paradigms, and Generations for Recall Estimations	141
4.6	Methodological Triangulation	143
4.6.1	Magnetic Tape as a Case Where Data is Available for the Later Maturity States Only	145
4.6.2	Compact Disc as a Case Where Data is Available for All Maturity States	148
4.6.3	Blu-ray as a Case Where Data is Available for the Earlier Maturity States Only	151
4.7	Advanced Analyses	154
4.7.1	Overview of Contestant Indicator Sets and Their Data Requirements	154
4.7.2	Considering Indicator Biases	166
4.7.3	Compiling Activity Indicator Values for a Technology by Example of the MiniDisc Technology	167
4.7.4	Assigning Activity Indicator Observations to States of Maturity and Determining the Distribution of Observations Across These States	171
4.7.5	Comparing Hypothetical to Actual Indicator Behavior	176
4.7.6	Using a Linear Discriminant Analysis to Gauge the Maturity Classification Performance of the Activity Indicators	189
4.7.7	Using a Linear Discriminant Analysis to Gauge the Maturity Classification Performance of the Patent Meta Data Indicators	226

4.8 Representation, Interpretation, and Utilization of the Advanced Analysis Results	235
4.8.1 Applying the S&D Model to Hard Disc Technology	237
4.8.2 Applying the S&D Model to NVRAM Technology	238
4.8.3 Applying the S&D Model to ReRAM Technology	239
4.8.4 Checking the Reaction Time and Precision of Activity Indicators on Optical Disc Technologies: DVD, Blu-ray, and HD-DVD	239
5 Measuring Technology Maturity: Conclusions	243
5.1 Quality Criteria and Limitations.....	245
5.2 Directions for Future Research.....	249
Bibliography.....	251
Annex A: Delphi Questionnaire and Information Basis	275
Annex B: Technology Search Strategies for Different Text Media Databases	286
Annex C: R-Code of Statistical Analyses Performed in the Scope of the Approach in this Book.....	288

Measuring Technology Maturity

Operationalizing Information from Patents, Scientific
Publications, and the Web

Albert, T.

2016, XXIX, 311 p. 86 illus., Softcover

ISBN: 978-3-658-12131-0
