List of Figures XV
List of Tables XIX
Abbreviations XXI
Conventions XXIII
1 Introduction 1
1.1 Research Questions and Approach 2
1.2 Contributions 3
1.3 Thesis Walkthrough 4
2 Background 7
2.1 Terminology 7
2.1.1 Emergency and Disaster 7
2.1.2 Crisis, Crisis Management, and Emergency Response 9
2.1.3 First Responders 9
2.1.4 Resilience 10
2.2 Relevant Disasters 11
2.3 Infrastructure 13
2.3.1 Disambiguation of 'Infrastructure' 14
2.3.2 Forms of Network Structures during Emergency Response 15
2.3.3 Creative Use of Infrastructural Elements 17
2.3.4 Smartphones as a Ubicomp Device Fostering Infrastructure 18
2.4 Crisis Informatics 18
2.5 Mobile Emergency Systems 21
2.6 Summary 24
3 Methodology 25
3.1 The Role of BRIDGE 25

3.2 User Groups ... 27
3.3 Data Sources ... 27
3.4 Interviews ... 28
3.5 Grounded Theory and the Constant Comparative Method ... 30
3.6 Iterative System Development ... 31
3.7 Summary ... 33
4 Empirical Findings ... 35
4.1 Data Set ... 35
4.2 Categories of Using Remnants of Technology ... 36
4.2.1 Category 1 – “Islands” of Connectivity ... 36
4.2.2 Category 2 - Degradation of Services ... 38
4.2.3 Category 3 – Usage of surviving resources ... 41
4.3 Conclusion ... 44
5 Conceptual Framework ... 45
5.1 Disambiguation of Quality Attributes ... 45
5.2 Proposal of Quality Attributes ... 46
5.2.1 Prevalence ... 46
5.2.2 Ad-Hoc Communication ... 47
5.2.3 Quick Connectivity ... 47
5.2.4 Serendipity ... 47
5.2.5 Graceful Degradation ... 48
5.2.6 Short-lived Interactions ... 48
5.2.7 Self-Management ... 49
5.2.8 Decentralized Distribution ... 49
5.3 Example Scenario ... 50
5.4 Conclusion ... 50
6 State of the Art ... 53
6.1 Scope ... 53
6.2 Wireless Communication Technologies for Smartphones ... 54
6.2.1 Near-Field Communication ... 55
6.2.2 Bluetooth ... 56

6.2.3 IEEE 802.11 (WiFi) ... 59
6.2.4 WiFi Direct ... 63
6.2.5 Overview ... 65
6.3 Towards Opportunistically Created Mobile Ad-Hoc Networks ... 68
6.3.1 The Paradigm of Mobile Ad-Hoc Networks ... 68
6.3.2 Bluetooth-based Approaches ... 69
6.3.3 Approaches based on 802.11 Ad Hoc Mode ... 70
6.3.4 Approaches based on 802.11 Infrastructure Mode ... 72
6.4 Conclusion ... 74
7 First System: Help Beacons ... 77
7.1 Concept ... 77
7.2 First Prototype ... 80
7.2.1 Design ... 81
7.2.2 Implementation ... 82
7.2.3 Evaluation ... 92
7.2.4 Analysis ... 102
7.3 Second Prototype ... 103
7.3.1 Design ... 104
7.3.2 Implementation ... 107
7.3.3 Evaluation ... 109
7.3.4 Analysis ... 111
7.4 Third Prototype ... 112
7.4.1 Design ... 113
7.4.2 Implementation ... 114
7.4.3 Evaluation ... 115
7.4.4 Analysis ... 122
7.5 Conclusion ... 125
8 Second System: Local Cloud ... 127
8.1 Concept ... 127
8.2 First Prototype ... 128
8.2.1 Design ... 128

8.2.2 Implementation 130
8.2.3 Evaluation 133
8.2.4 Analysis 136
8.3 Second Prototype 138
8.3.1 Design 138
8.3.2 Implementation 140
8.3.3 Evaluation 142
8.3.4 Analysis 148
8.4 Delineations 149
8.4.1 Help Beacons System 149
8.4.2 WiFi Direct 150
8.5 Conclusion 151
9 Conclusions 153
9.1 Contributions 153
9.2 Future Work 155
9.3 Closing Remarks 158
