

INDEX – Volume 1

SECTION 1

TESTING FOR WLTP

Chairperson: Prof. Dr. Jochen Wiedemann

WLTP – On the increased importance of aerodynamics and impact on development procedures **1**

Thomas Schütz, BMW AG

Test bench technologies for improving WLTP measurement results **19**

Zdenek Mestenhauser, V. Senft, MTS Systems Corporation

On- and off-cycle energy efficiency technologies of a global supplier **21**

Ulrich Schulmeister, A. Lang, M. Johannaber, D. Rieker, Robert Bosch GmbH; F. Götz, M. Rauscher, F. Schürg, Bosch Engineering GmbH

EXHAUST GAS AFTERTREATMENT

Chairperson: Prof. Dr. Georg Wachtmeister

The novel SCR and PNA exhaust gas after treatment systems for diesel passenger cars **31**

Nebojsa Milovanovic, S. Hamalian, MAHLE Powertrain; M. Lewander, K. Larsen, Haldor Topsoe

Experimental investigation of heat transfer characteristics of UWS spray impingement in diesel SCR **49**

Yujun Liao, P. Dimopoulos Eggenschwiler, Empa – Swiss Federal Laboratories for Materials Science and Technology

From laboratory to road – Real Driving Emissions **59**

Helge Schmidt, J. Badur, TÜV NORD Mobilität GmbH & Co. KG

BATTERY

Chairperson: Prof. Dr. Dr. Gerhard Hettich

Li-ion batteries for automotive applications – Quo vadis? 69

Holger Fink, Robert Bosch Battery Systems GmbH and
Lithium Energy and Power GmbH

How long will an electric car's propulsion battery last? 83

Detlef Hoffmann, SGS Germany GmbH

Increased efficiency in the calibration process of automotive Li-ion battery systems 101

Lukas Behr, U. Zimmermann, S. Trinkert, Robert Bosch Battery
Systems GmbH; T. Kruse, ETAS GmbH; S. Rees, F. Bröckel,
Robert Bosch GmbH; J. Xie, EWS, Universität Ulm

PHD COURSE

Chairperson: Prof. Dr. Oliver Zirn

HEV concept with lean operated SI-engine optimized for fuel consumption and emissions 117

Jing Cheng, Universität Stuttgart; M. Bargende, FKFS/IVK,
Universität Stuttgart; F. Altenschmidt, C. Ley, Daimler AG

Software tool to create a hybrid operation strategy for simulations 131

Dan Keilhoff, Universität Stuttgart; H.-C. Reuss, FKFS/IVK,
Universität Stuttgart

Iterative refinement of the discretization of the Dynamic Programming State Grid 145

Andreas Haag, Promotionskolleg Hybrid; P. Antony,
Daimler AG; F. Panik, Hochschule Esslingen; M. Bargende,
FKFS/IVK, Universität Stuttgart

FVV PROJECTS

Chairperson: Dr. Karl Kollmann

- | | |
|--|------------|
| Fast predictive burn rate model for gasoline-HCCI | 155 |
| Mahir Tim Keskin, IVK, Universität Stuttgart, M. Grill,
FKFS; M. Bargende, FKFS/IVK, Universität Stuttgart | |
| Transient simulation of nitrogen oxide emissions on diesel engines | 171 |
| Benjamin Kaal, M. Grill, FKFS; M. Bargende,
FKFS/IVK, Universität Stuttgart | |
| Renewables in transport 2050 – Empowering a sustainable mobility future with zero emission fuels | 185 |
| Patrick R. Schmidt, W. Zittel, W. Weindorf, T. Raksha, LBST –
Ludwig-Bölkow-Systemtechnik GmbH; D. Goericke, FVV e.V. | |

LIGHTWEIGHT CONSTRUCTION II

Chairperson: Dr. Marco Schneider

- | | |
|---|------------|
| Quality management of CFRP-components in the automotive production | 201 |
| Manuel Schuster, M. Soutschek, A. Hansmersmann,
Fraunhofer IPA | |
| High volume production of lightweight automotive structures | 213 |
| Clemens Buschhoff, C. Brecher, M. Emonts, Fraunhofer IPT | |
| Thermoplastic composites for high volume production | 227 |
| Stefan Eppele, C. Bonten, IKT, Universität Stuttgart | |

SECTION 2

RDE I

Chairperson: Prof. Dr. Michael Bargende

**Mercedes-Benz diesel technology OM654 near-engine-mounted
SCR system for WLTP and RDE** 239

Tillmann Braun, P. Lückert, F. Duvinage, A. Mackensen,
Daimler AG

The gasoline engine and RDE challenges and prospects 257

Günter Fraidl, P. Kapus, K. Vidmar, AVL LIST GMBH

**Solutions to fulfill “Real Driving Emission (RDE)” with
diesel passenger cars** 285

Dirk Naber, A. Kufferath, M. Krüger, S. Scherer, H. Schumacher,
M. Strobel, Robert Bosch GmbH

VEHICLE TECHNOLOGY

Chairperson: Prof. Dr. Thomas Maier

**A multiscale approach to virtually render fluid dynamics
on overall vehicle level** 287

Frank Hermsdorf, C. Jahn, G. Prokop, TU Dresden

**Investigation of visibility properties through wetted glass
planes on vehicles** 301

Thomas Landwehr, IVK, Universität Stuttgart, T. Kuthada, FKFS;
N. Widdecke, J. Wiedemann, IVK/FKFS, Universität Stuttgart

**The new Porsche 911 Carrera – Evolution in aerodynamics,
thermal management and heat protection** 315

Matthias Klingbeil, J. Weissert, M. Yilmaz,
Dr. Ing. h.c. F. Porsche AG

ELECTRIC POWERTRAIN

Chairperson: Prof. Dr. Nejila Parspour

- Holistic approach for the design of electrical powertrains for electric and plug-in-hybrid vehicles applying the methodology Multi-Objective Optimization** 331
Adam Babik, T. Reuschlé, A. Schönknecht,
Robert Bosch GmbH

- Electric drivetrain modular layout based on range specifications** 349
Markus Orner, T. Riemer, FKFS; H.-C.Reuss, FKFS/IVK,
Universität Stuttgart

- Combined power train and thermal management optimization using an extended dynamic programming** 367
Mike Liebers, R. Kloß, B. Bäker, TU Dresden

- Analysis of the effects of high coil temperatures on performance and drivability of electric sports cars** 383
Tobias Engelhardt, A. Heitmann, S. Oechslen, Dr. Ing. h.c.
F. Porsche AG; H.-C. Reuss, FKFS/IVK, Universität Stuttgart

TIRES

Chairperson: Prof. Dr. Thomas Vietor

- Experimental validation of the Maxwell model for description of transient tyre force** 401
Andreas Hackl, W. Hirschberg, C. Lex, TU Graz;
G. Rill, OTH Regensburg

- Measuring a reference friction potential by anti-lock braking tests** 419
Thorsten Lajewski, J.Rauh, Daimler AG; S. Müller, TU Berlin

- Parametrical approach for modeling of tire forces and torques in TMeasy 5** 435
Ronnie Dessort, C. Chucholowski, TESIS DYNAware GmbH;
G. Rill, OTH Regensburg

SOFTWARE AND DEVELOPMENT

Chairperson: Prof. Dr. Tobias Flämig-Vetter

Software-in-the-Loop at the junction of software development and drivability calibration 451

René Linssen, F. Uphaus, Daimler AG; J. Mauss, QTronic

Continuous delivery for simulation-model development 467

Marius Feilhauer, J. Häring, J. Buchner, ETAS GmbH

Generic development of software components and reuse for projects and variants 479

Walter Nagler, ZF Friedrichshafen AG

Agile processes in automotive industry – Efficiency and quality in software development 489

Axel Schloßer, J. Schnitzler, T. Sentis, J. Richenhagen, FEV GmbH

ARENA2036

Chairperson: Peter Froeschle

ARENA2036 – DigitPro: Development of a virtual process chain 505

Peter Middendorf, D. Michaelis, P. Böhrer, J. Dittmann, F. Heieck, IFB, Universität Stuttgart

Highly versatile plug&produce assembly systems 517

Stefan Junker, M. Vorderer, Robert Bosch GmbH

Digital reality – A revolution for planning and scheduling of the smart factory 535

Bernd-Dietmar Becker, D. Wohlfeld, FARO

Linked logistics concepts for future automobile manufacturing using innovative equipment 537

Karl-Heinz Wehking, J. Popp, IFT, Universität Stuttgart

SECTION 3

RDE II

Chairperson: Prof. Dr. Peter Eilts

Analytical challenge on Real Driving Emission 547

Hiroshi Nakamura, HORIBA Ltd.

**Introducing a method to evaluate RDE demands
at the engine test bench** 549

Jan Gerstenberg, H. Hartlief, S. Tafel, Bosch Engineering GmbH

Model supported calibration process for future 565

RDE requirements

Dirk Neumann, M. Steinbach, T. Kutzner, A. Lehmann,
V. Kassem, M. Dreiser, IAV GmbH

VEHICLE CONCEPTS

Chairperson: Prof. Dr. Lutz Eckstein

**Methodological development from vehicle concept to modular
body structure for the DLR NGC-Urban Modular Vehicle** 581

Marco Münster, M. Schäffer, R. Sturm, H. E. Friedrich,
DLR Institut für Fahrzeugkonzepte

Quantification concept for vehicle packaging 597

Arthur Frick, R. Müller, T. Blauß, Daimler AG; D. Schramm,
Universität Duisburg-Essen

**Analysis of hydraulic brake systems with regard to
the requirements for future vehicle concepts** 607

Christian Riese, Robert Bosch GmbH; F. Gauterin, Institut
für Fahrzeugsystemtechnik (FAST) KIT

Formula Student – A successful part of engineering education 619

Helena Ortwein, S. Heußner, Rennteam Uni Stuttgart e.V.

ELECTRIC VEHICLES

Chairperson: Prof. Karl-Ernst Noreikat

- Electromobility in daily life – Are you still exploring
or riding already?** 629

Matthias Vogt, bridgingIT GmbH

- System-integrated data acquisition in validation and
operation of electric vehicles** 643

Katharina Bause, F. Munker, N. Reiß, M. Behrendt, A. Albers, IPEK,
Karlsruher Institut für Technologie (KIT); A. Rupalla, RA Consulting GmbH

- Optimized operating strategies for electrified taxis
by means of condition-based load collectives** 659

Raphael Pfeil, M. Grimm, FKFS; H.-C. Reuss, FKFS/IVK, Universität Stuttgart

- Vehicle simulation of an electric street sweeper for substitution analysis** 673

Rene Budich, M. Hübner, HTW Dresden

ENGINE PROCESS I

Chairperson: Prof. em. Dr. Günter Hohenberg

- Reliability-oriented simulation in the engine development process** 691

Stefan Jetter, F.-O. Müller, R. Weller, M. Zöllner, Daimler AG;
B. Bertsche, IMA, Universität Stuttgart

- Variable valve timing of intake valves of a heavy-duty Diesel
engine as a way to improve fuel consumption** 705

Simon Schneider, S. Naujoks, MAHLE International GmbH

- New product aimed to optimize air intake system for
low end torque enhancement** 721

Vincent Raimbault, J. Migaud, MANN+HUMMEL France SAS; D. Chalet,
Q. Montaigne, A. Bouedec, École Centrale de Nantes, LHEEA Lab.
(ECN/CNRS); H. Buhl, H. Fuchs, MANN+HUMMEL GmbH

- Real-time simulation of the effects of catalyst on automotive engines performance** 737

Agostino Gambarotta, M. Crialesi Esposito, University of Parma;
P. Dimopoulos Eggenschwiler, F. Lucci, Empa – Swiss Federal Laboratories
for Materials Science and Technology

STEERING

Chairperson: Prof. Dr. Clemens Gühmann

A PID and state space approach for the position control of an electric power steering **755**

Vivan Govender, G. Khazaridi, T. Weiskircher, D. Keppler,
Daimler AG; S. Müller, TU Berlin

Identification and evaluation of the real temperature loading of steering electronics **771**

Ulrike Weinrich, G. Baumann, FKFS; H.-C. Reuss, FKFS/IVK,
Universität Stuttgart; S. Walz, Robert Bosch Automotive Steering GmbH

Fully automatic and haptic test of electric power steering in a virtual environment **787**

Jörg Paschedag, M. Scherer, ITK Engineering AG

ERGONOMICS IN AUTOMOTIVE PRODUCTION

Chairperson: Urban Daub

Ergonomical sequencing with state of the art tube lifters **797**

Tilman Hilbert, J. Schmalz GmbH

Future ergonomics tools – From the prototype to the serial product by comprehensive product optimization **807**

Tanja Schembera-Kneifel, M. Keil, AUDI AG

Loading of the musculoskeletal system in automotive assembly – The potential of an applied biomechanics analysis concept **817**

Christian Lersch, Velamed GmbH; L. Hausmanninger,
AUDI AG; W. Potthast, Deutsche Sporthochschule Köln

New approaches for analysis in ergonomics: From paper and pencil methods to biomechanical simulation **821**

Florian Blab, O. Avci, U. Daub, U. Schneider, Fraunhofer IPA

SPEAKERS, CHAIRPERSONS – Volume 1

Adam Babik

Robert Bosch GmbH

Prof. Carla Bailo

The Ohio State University

Prof. Dr. Michael Bargende

INDEX – Volume 2

SECTION 1

HYBRID I

Chairperson: Prof. Dr. Christian Beidl

The potential of 48V HEV in real driving	1
Mark Schudeleit, C. Sieg, F. Küçükay, IfF, TU Braunschweig	
Online optimization based energy management of hybrid electric vehicles using direct optimal control	19
Raja Sangili Vadamalu, C. Beidl, TU Darmstadt	
Rapid multi-physics approach to the development of electric drive systems for hybrid and electric vehicles	37
Christoph Leser, V. Aronovich, R. Hejny, J. Wattleworth MTS Systems Corporation	

LIGHTWEIGHT CONSTRUCTION I

Chairperson: Prof. Dr. Horst E. Friedrich

Material+energy efficient processing of composites for automotive lightweight parts	45
Jens Klug, M. Schuck, HBW-Gubesch Thermoforming GmbH	
Forta H-Series – Ultimate lightweight solutions with high strength austenitic materials	55
Stefan Lindner, Outokumpu Nirosta GmbH	
Fiber reinforced ceramic composites for hot gas and fire retardant applications in automotive	65
Patrick Weichand, R. Gadow, M. Jiménez, IFKB, Universität Stuttgart	

CHARGING OF ELECTRIC VEHICLES

Chairperson: Prof. Dr. Eric Sax

Future generations for DC fast charging systems 73

Ursel Willrett, IAV GmbH

Regression test requirements for the charging communication of electric vehicles 89

Johannes Unser, Vector Informatik GmbH

Automated robot-based charging system for electric vehicles 101

Bernhard Walzel, C. Sturm, J. Fabian M. Hirz, TU Graz

ENGINES COMPONENTS I

Chairperson: Prof. Dr. Bernhard Geringer

Inlet swirl throttle for passenger car engines 115

Wolfgang Wenzel, U. Hanig, J. Song, BorgWarner, Inc.; B. Bareis, BorgWarner Emission Systems; M. Miclea-Bleiziffer, BorgWarner Turbo Systems

Crank angle resolved floating-liner friction measurements on microstructured cylinder liner surfaces 133

Henning Pasligh, K. Oehlert, F. Dinkelacker, ITV, Leibniz Universität Hannover; H. Ulmer, Bertrandt Ingenieurbüro GmbH

Technology change towards fully synthetic air filter elements in engine air filtration 147

Thilo Müller, T. Batt, M. Heim, A. Pelz, G.-M. Klein, MANN+HUMMEL GmbH

THERMAL MANAGEMENT I

Chairperson: Prof. Dr. Frank Gauterin

Residual heat utilization in vehicles by thermochemical energy storage 161

Peter Hofmann, M. Jakobi, IFA, TU Wien

Holistic thermal management in electric vehicles 181

Srdan Milaković, FKFS, J. Wiedemann, FKFS/IVK, Universität Stuttgart; J. Haug, MAHLE Behr GmbH & Co. KG; M. Hartinger, Robert Bosch GmbH; J. Maué, Daimler AG; J. Rothfuss, sitronic GmbH & Co. KG

Thermal simulation of an electric motor in continuous and circuit operation 205

Stefan Oechslen, A. Heitmann, T. Engelhardt, Dr. Ing. h.c. F. Porsche AG; H.-C. Reuss, FKFS/IVK, Universität Stuttgart

AMBER-ULV – A STORY OF FUTURE LIGHT URBAN ELECTRIC VEHICLES

Chairperson: Gian Mauro Maneia

Introduction to AMBER-ULV and its different business models 219

Michael Stie Laugesen, NTU International A/S, G. M. Maneia, Ce.S.I. Centro Studi Industriali Srl

An innovative energy management system acting on multiple battery packages. 235

TBA

Achievements with model-based development on the innovative traction system of the AMBER-ULV Car 237

Claudio Rossi, D. Pontara, University of Bologna; A. Galli, EOS; P. Fiani, Sherpa Engineering; M. Alirand, Siemens Industry Software

Crash structure design, modelling, virtual sign-off for physical crash testing 253

Gian Mauro Maneia, Ce.S.I. Centro Studi Industriali Srl, R. Papalia, NOVA SRL

SECTION 2

HYBRID II

Chairperson: Prof. Dr. Michael Bargende

48 volt technology – More than a mild hybrid 255

Bernd Mahr, Continental

Plug-in hybrid by Mercedes-Benz – The technology kit for future consumption targets 265

Daniel Görke, S. Schmiedler, J. Strenkert, Daimler AG

Development of simulation test bench (HV-HIL) to calibrate and evaluate hybrid vehicle components without real engine or car 281

Hikaru Mizuno, R. Elbers, P. Pfeilmaier, Toyota Motorsport GmbH;
T. Naono, H. Oyobe, H. Hanada, K. Shirota, Toyota Motor Corporation;
J. De Smet, Toyota Motor Europe

Concept solution for efficiency improvement of a powertrain with P2 hybrid technology by an intelligent hybrid control unit 295

Shen Wang, T. Kersting, M. Rohe, Schaeffler Engineering GmbH;
B. Pennec, Schaeffler Trading (Shanghai) Co. Ltd.

ADAS

Chairperson: Prof. Dr. Klaus Dietmayer

Validating advanced driver assistance systems (ADAS) using comprehensive, loss-free in-vehicle measurements 307

Joachim Löchner, J. Wagner, M. Wolter, A. Fernandez,
ETAS GmbH

Predictive motion cueing algorithm for development of interactive assistance systems 319

Jürgen Pitz, T. Rothermel, M. Kehr, IVK, Universität Stuttgart;
H.-C. Reuss, FKFS/IVK, Universität Stuttgart

Safety and security requirements engineering 335

Christof Ebert, Vector Consulting Services GmbH; M. Brasse, Hella;
E. Metzker, Vector Informatik GmbH

DRIVING DYNAMICS

Chairperson: Prof. Dr. Ferit Küçükay

Improvements on availability and comfort of electric drives for electric power steering application 347

Nick Trümmel, T. Pötl, Robert Bosch Automotive Steering GmbH;
H.-C. Reuss, FKFS/IVK, Universität Stuttgart

Creation of driving cycles with lateral and longitudinal dynamics for analyzing energy losses in chassis 363

Andreas Schultze, M. Hauck, M. Lienkamp, TU München

Development of objective criteria to assess the vehicle performance utilized by the driver in near-limit handling conditions of racecars 377

Florian Goy, IVK, Universität Stuttgart; J. Wiedemann, FKFS/IVK, Universität Stuttgart; T. Völkl, G. Delli Colli, AUDI AG; J. Neubeck, W. Krantz, FKFS

ENGINE PROCESS II

Chairperson: Prof. Dr. Horst Harndorf

Investigation of the mixture formation process with combined injection strategies in high-performance SI-engines 397

Daniel Koch, G. Wachtmeister, LVK, TU München; M. Wentsch, M. Chiodi, FKFS; M. Bargende, FKFS/IVK, Universität Stuttgart; C. Pötsch, Volkswagen AG; D. Wichelhaus, Volkswagen Motorsport GmbH

Online-methods for engine test bed measurements considering engine limits 415

Benjamin Hartmann, P. Heuser, Bosch Engineering GmbH;
E. Kloppenburg, R. Diener, Robert Bosch GmbH

Simulative development of thermal management for warm-up 429

Björn Meyer, IVK, Universität Stuttgart; M. Bargende, FKFS/IVK, Universität Stuttgart; I. Kutschera, M. Gruber, S.-F. Haas, AUDI AG

Analysis of working processes and efficiency assessment of hand-held power tools 445

Stephan Meyer, A. Kölmel, T. Gegg, U. Dawin, ANDREAS STIHL AG & Co. KG;
P. Piecha, A. Trattner, S. Schmidt, R. Kirchberger, IVT, TU Graz

INJECTION

Chairperson: Prof. Dr. Hermann Rottengruber

Experimental study on the impact of the jet shape of an outward-opening nozzle on mixture formation with CNG-DI 459

Dimitri Seboldt, D. Lejsek, Robert Bosch GmbH; M. Bargende, FKFS/IVK, Universität Stuttgart

3D-CFD analysis on scavenging and mixture formation for CNG direct injection with an outward-opening nozzle 479

Marlene Wentsch, M. Chiodi, FKFS; M. Bargende, FKFS/IVK, Universität Stuttgart; D. Seboldt, D. Lejsek, Robert Bosch GmbH

Penetration path analysis of diesel sprays via spray force measurements 499

Hans Römisch, T. Hergemöller, F.-P. Gulde, Daimler AG; M. Bargende, FKFS/IVK, Universität Stuttgart

Effects of new nozzle hole configurations on air utilization and soot emissions of diesel engines 515

Klaus Hielscher, R. Baar, TU Berlin; M. Brauer, IAV GmbH

AUTOMOBILE & BIG DATA

Chairperson: Dr. Bernhard Budaker

IT architectures for Big Data in the automotive field 535

Jens Jäger, Fraunhofer IPA

Digital realms in production planning – Safety through virtualization 537

Ulrich Odefey, M. Pfeil, V. Fäßler, TWT GmbH Science & Innovation; T. Bär, Daimler AG; H. Zipper, Institut für Automation und Kommunikation e.V. Magdeburg

Big Data in automotive production – Concepts and experiences 549

Thomas Bauernhansl, Fraunhofer IPA

SECTION 3

CHASSIS OF THE FUTURE

Chairperson: Prof. Dr. Jochen Wiedemann

Honda's philosophy on vehicle dynamics performance and future technology direction 551

Yasunori Oku, Honda R&D Europe (Deutschland) GmbH

E-Mobility and driver assistance: Will driving dynamics and driving pleasure stay behind in the future? 567

Peter Schäfer, U. Reuter, C. Hoffmann, Dr. Ing. h.c. F. Porsche AG

Automotive game-changers and their challenges from a chassis perspective 583

Andreas Wagner, AUDI AG

AUTOMATED DRIVING

Chairperson: Prof. Dr. Hans-Christian Reuss

Safety argumentation for automated driving systems 601

Michael Helmle, P. Sautter, F. Hauler, F. von Zeppelin,
Robert Bosch GmbH

The Connected Car – A system-of-systems: Exploration of challenges in development from experts view 603

Armin Kurrle, A. Albers, S. Klingler, IPEK, Karlsruher Institut
für Technologie (KIT)

Connected efficiency – A paradigm to evaluate energy efficiency in tactical vehicle-environments 615

Jochen Kramer, M. Hillenbrand, K. D. Müller-Glaser, FZI
Forschungszentrum Informatik; E. Sax, ITIV, Karlsruher Institut
für Technologie (KIT)

THERMAL MANAGEMENT II

Chairperson: Prof. Dr. Stefan Böttinger

Optimization of an engine coolant radiator for vehicle thermal management 629

Lothar Seybold, I. Lazaridis, A. Seryi, W. Filsinger, Adam Opel AG; F. Gruber, B. Taxis, MAHLE Behr GmbH & Co. KG

Simulation in thermal management – Looking back, status and outlook of an exciting discipline 647

Andreas Koller, Dr. Ing. h.c. F. Porsche AG

Design and development of a component test bench for the investigation of automotive ORC systems 659

Holger Mai, D. Nascimento, Kratzer Automation AG; H. Rätz, H. S. Kunte, O. Willers, J. S. Seume, TFD, Leibniz Universität Hannover; S. Weigl, UFT GmbH

ENGINE CHARGING

Chairperson: Prof. Dr. Helmut Eichlseder

The hot side of the new 4-cylinder diesel engine from Mercedes-Benz 679

Jochen Schmid, Daimler AG

Experimental investigation of operating parameters on constant-tone-noise of turbochargers 687

Marco Leonetti, FKFS, M. Bargende, FKFS/IVK, Universität Stuttgart; D. Filsinger, M. Kreschel, IHI Charging Systems International; C. Meier, H. Schulze, Mercedes Benz

Concept for lower raw engine emission covering full engine map operation 707

Mike Lau, R. Suteekarn, Eaton Germany GmbH; G. Lautrich, M. Pannwitz, T. Tietze, IAV GmbH

ENGINES COMPONENTS II

Chairperson: Prof. Dr. Thomas Koch

Fritz Winter ecoCasting: Development of light-weight cylinder crankcases of cast iron 727

Wilfried Wolf, W. Steinberg, Fritz Winter Eisengießerei GmbH & Co. KG

Tailored crankshaft design from early development phase on 739

Julius Perge, VKA, RWTH Aachen University; R. Beykirch, J. Lehmann, M. Gast, FEV GmbH; A. Piccaglia, A. Almini, N. Parenti, VM Motori FCA

Concept for Diesel Particulate Filter monitoring based on BOSCH Particulate Matter Sensor (PMS) 759

Jörg Linke, D. Konrad, Bosch Engineering GmbH

E/E-ARCHITECTURE

Chairperson: Prof. Dr. Karl-Ludwig Krieger

A method to control distributed cause-effect chains of electrical and electronic systems in the field of driving dynamics and driver assistance 769

Matthias Wiese, W. Schröder, H. Kerscher, M. Hambauer, A. Kron, BMW Group

Cross-domain vehicle control units in modern E/E architectures 783

Waldemar Haas, P. Langjahr, Bosch Engineering GmbH

Intelligent sensor layout of PVDF structure-borne sound sensors to gain signals mechanically 793

Klaas Hauke Baumgärtel, K.-L. Krieger, ITEM, Universität Bremen

SPEAKERS, CHAIRPERSONS – Volume 2
