

Content

Preface	vii
Content	ix
List of Figures	xi
List of Tables.....	xv
Abbreviations	xvii
Physical parameters	xix
1 Introduction	1
2 State of the art	5
2.1 Zinc oxide	6
2.2 Gold nanoparticles	9
2.3 Different lasers for one application – particle processing	11
2.4 Interaction of light with particles.....	14
2.5 Fundamentals of laser fragmentation.....	18
2.5.1 <i>Interaction of laser light with non-metallic particles</i>	19
2.5.2 <i>Interaction of laser light with metallic particles</i>	22
2.6 Fundamentals of pulsed laser melting in liquids.....	26
3 Materials and methods.....	31
3.1 Materials and instruments.....	31
3.2 Experimental design.....	36
4 Results and discussion	41
4.1 Laser fragmentation	43
4.1.1 <i>Quantification of mass-specific laser energy input converted into particle properties during picosecond pulsed laser fragmentation of zinc oxide and boron carbide in liquids</i>	43
4.1.2 <i>Influence of particle mass on laser fragmentation efficiency and process limitations</i>	61
4.1.3 <i>Laser fragmentation of supported particles: gold on zinc oxide</i>	67
4.1.4 <i>Ligand-free gold atom clusters adsorbed on graphene nano sheets generated by oxidative laser fragmentation in water</i>	71
4.1.5 <i>Laser-induced chemical conversion of particle suspensions</i>	82

4.1.5.1 Fragmentation of copper compounds – laser-induced reduction	82
4.1.5.2 Fragmentation of aluminum particles – laser-induced oxidation	90
4.2 Laser melting.....	95
4.2.1 Pulsed laser melting in liquids (PLML) for the fabrication of sub-micrometer spheres (SMS)	95
4.2.2 Inclusion of supported gold nanoparticles into their semiconductor support	103
4.2.3 Near-field-enhanced, off-resonant laser sintering of semiconductor particles for additive manufacturing of dispersed Au-ZnO-micro/nano hybrid structures	118
4.3 Key figures for laser irradiation of particles in the passage reactor	131
4.3.1 Exemplary calculations for PLFL of ZnO	138
4.3.2 Optimization of PLFL using key figures	142
5 Summary and conclusion	147
6 Outlook.....	151
7 Literature	153
8 Appendix	187
8.1 Supplementary Data	187
8.2 List of authored and co-authored publications	252
8.3 Declaration.....	257

Laser Fragmentation and Melting of Particles

Lau, M.

2016, XX, 258 p. 118 illus., Softcover

ISBN: 978-3-658-14170-7
