

Preface

This book is a slightly revised version of my dissertation thesis that I handed in at the University of Bamberg in February 2015. First and foremost, I thank my first supervisor, Thorsten Schneider, for being an outstanding mentor. He invested a large amount of his time and thought, gave insightful advice and was always available for my questions. Also, I thank Sandra Buchholz for writing an elaborate second expert's report and Steffen Schindler for readily agreeing to be additional assessor in the thesis defense. Furthermore, I thank Steffen Hillmert for admitting this book to appear in the series, *Life Course Research*. I learned a lot from these four excellent researchers and their suggestions have improved this book substantially. Last but not least, I am very grateful for the comments I received from doctoral fellows of the doctoral programme at the German Institute for International Educational Research (DIPF) and at the colloquia of Thorsten Schneider and Hans-Peter Blossfeld.

The research was funded by the German Federal Ministry of Education and Research (reference number 01JG1059). The author is solely responsible for the content of this publication.
