Figures and tables	13
1 Introduction: Social mobility perspective and intergenerational downward mobility in educational attainment.....	17
2 Research on intergenerational mobility	23
2.1 Research on social mobility and educational inequality	23
2.2 Research on intergenerational downward mobility	33
3 Theoretical approaches: The life-course perspective and rational-choice-based theories of educational decisions	41
3.1 The life-course perspective.....	41
3.2 Educational decisions	44
3.2.1 Primary and secondary effects	45
3.2.2 Decision parameters: basic concepts and variations	47
3.2.3 Status maintenance	52
3.2.4 The Mare model of sequential educational decisions	53
3.2.5 Critique of rational choice theory and limitations of rationality.....	55
3.3 Combining the life-course approach and rational-choice-based theories of educational decisions.....	58
4 Data: The sub-study Adult Education and Lifelong Learning of the National Educational Panel Study.....	61
5 Empirical analysis 1: Educational downward mobility over time in Germany.....	63
5.1 Theoretical considerations and hypotheses	63
5.2 Data.....	67
5.3 Variables.....	68
5.4 Methods	70
5.5 Results	73
5.5.1 Educational pathways and the education of parents.....	78
5.5.2 Duration of education by education of parents	81
5.5.3 Development of downward mobility over cohorts.....	83
5.6 Summary and conclusion on educational downward mobility over time in Germany	86

6 Empirical analysis 2: Re-entering the academic pathway after starting vocational training in Germany	89
6.1 Social selectivity before and after the tertiary education entrance certificate	90
6.2 Theoretical considerations and hypotheses	92
6.2.1 Decreasing effects of social origin at late educational transitions due to growing independence	92
6.2.2 Persisting differences in educational decisions by social origin in adult age	93
6.2.3 Path dependence	95
6.2.4 Age norms and competing life-course roles	96
6.2.5 Opportunity costs and type of vocational training	98
6.2.6 Change in transition probabilities over cohorts	101
6.3 Data	102
6.4 Variables	103
6.4.1 Characteristics of the school career	103
6.4.2 Competing life-course roles	104
6.4.3 Characteristics of the vocational training programme	104
6.5 Methods	105
6.6 Results	106
6.6.1 Selectivity of school leavers with tertiary education entrance certificate choosing vocational training	106
6.6.2 Descriptive results on activities in the first 5 years after obtaining a tertiary education entrance certificate	108
6.6.3 Multivariate results	111
6.7 Summary and conclusion on re-entering the academic pathway after starting vocational training in Germany	116
7 Empirical analysis 3: Access to tertiary education and dropout in Germany	121
7.1 Selection processes prior to tertiary education in the German education system	122
7.2 Descriptive results on access to tertiary education	124
7.3 Theoretical considerations and hypotheses on dropout from tertiary education	127
7.3.1 Mechanisms linking pre-tertiary pathways and dropout from higher education	127
7.3.2 The role of social origins	131
7.3.3 The role of time	132
7.4 Data	133
7.5 Sample, variables and methods of the analysis on dropout from tertiary education	133
7.6 Results on dropout from tertiary education	136
7.6.1 Descriptive results of dropout from tertiary education	136
7.6.2 Multivariate results	140
7.7 Summary and conclusion on access to tertiary education and dropout in Germany	150

8 Intergenerational downward mobility in educational attainment in Germany: Summary of the main results and conclusions	157
8.1 Summary of the main results	157
8.2 Limitations of the present study	162
8.3 Conclusions on the utility of studying downward mobility for sociological research	163
8.4 How do the findings connect to previous and future research?	166
