<b>List of Figures</b>	<b>XVII</b>
<b>List of Tables</b>	<b>XXI</b>
<b>List of Symbols</b>	<b>XXV</b>
<b>List of Abbreviations</b>	<b>XXVII</b>
<b>1 Introduction</b>	<b>1</b>
1.1 Transport Protocols in Logistics . . . . .	3
1.2 Contributions of this Thesis . . . . .	4
1.3 Outline of this Thesis . . . . .	5
<b>2 Motivation</b>	<b>7</b>
<b>3 Transport Protocols</b>	<b>11</b>
3.1 Transmission Control Protocol (TCP) . . . . .	13
3.1.1 TCP Tahoe and TCP Reno . . . . .	14
3.1.2 TCP New-Reno and TCP SACK . . . . .	15
3.1.3 TCP Vegas . . . . .	16
3.1.4 TCP BIC and TCP Cubic . . . . .	17
3.2 Router-Feedback Based Protocols . . . . .	18
3.3 Recent Transport Protocol Proposals . . . . .	19
3.4 Model-Driven Congestion Protocols . . . . .	20
<b>4 Channel Measurements and Channel Traces</b>	<b>23</b>
4.1 Measurement Description . . . . .	24
4.1.1 Channel Measurements . . . . .	24
4.1.2 Channel Traces . . . . .	28
4.2 Measurement Insights . . . . .	30
4.2.1 Stationary Measurements . . . . .	30
4.2.2 Mobile Measurements . . . . .	35
4.2.3 Stationary and Mobile Measurements on 3G and LTE	42
4.2.4 Competing Traffic . . . . .	44

4.2.5	Burst Scheduling of Packets . . . . .	45
4.3	Channel Traces and Their Use in Simulations . . . . .	48
4.3.1	Implementation of the Channel Traces . . . . .	50
4.4	Conclusions . . . . .	51
<b>5</b>	<b>The Verus Protocol</b>	<b>53</b>
5.1	VERUS Description . . . . .	54
5.1.1	Abstract Description and Symbols of VERUS . . . . .	55
5.1.2	Verus Elements . . . . .	58
5.2	VERUS Implementation . . . . .	64
5.2.1	Connection Establishment . . . . .	64
5.2.2	Delay Profile Initialization and Maintenance . . . . .	65
5.2.3	Timeouts and Retransmissions . . . . .	67
5.3	VERUS Parameter Settings . . . . .	68
5.3.1	Epoch Interval . . . . .	70
5.3.2	Delta Decrement $\delta_1$ and Delta Increment $\delta_2$ . . . . .	71
5.3.3	Delay Profile Update Interval . . . . .	72
5.3.4	Upper Limit of the Packet Delay ( $R$ ) . . . . .	73
5.3.5	Sending Buffer Size . . . . .	73
5.4	Summary . . . . .	74
<b>6</b>	<b>Evaluation of the Verus Protocol</b>	<b>77</b>
6.1	Measurement Description . . . . .	77
6.1.1	Measurement Setup . . . . .	77
6.1.2	Network Shaping . . . . .	78
6.1.3	Protocol Parameter . . . . .	79
6.2	Measurement Insights . . . . .	79
6.2.1	Static Networks . . . . .	80
6.2.2	Emulated Networks . . . . .	86
6.2.3	Cellular Networks . . . . .	93
6.3	Conclusions . . . . .	97
<b>7</b>	<b>Modeling of Delay-Based Congestion Control Protocols</b>	<b>99</b>
7.1	Concept of Modeling Delay-Based Congestion Control Protocols	101
7.1.1	Relationship of Packet Delay and Sending Window Size	103
7.1.2	Discrete-Time Markov Model . . . . .	104
7.1.3	Guided Random Walk . . . . .	107
7.2	Training of the Model . . . . .	108
7.2.1	Collecting the Samples . . . . .	108
7.2.2	State Transition Matrix . . . . .	109

7.2.3	Summary of the Model Assumptions . . . . .	110
7.3	Evaluation of the Model . . . . .	112
7.3.1	Evaluation Setup and Methodology . . . . .	112
7.3.2	Implementation of the Model . . . . .	114
7.3.3	Example of the Guided Random Walk . . . . .	116
7.3.4	Effect of Quantization . . . . .	117
7.3.5	Training with a Non-Matching User Model . . . . .	125
7.3.6	Training with a Matching User Model . . . . .	127
7.3.7	Training with a Combined User Model . . . . .	132
7.3.8	Evaluation with ON/OFF Traffic Model . . . . .	134
7.4	Conclusions . . . . .	137
7.5	Extensions to the Model . . . . .	139
<b>8</b>	<b>Conclusions and Outlook</b>	<b>141</b>
8.1	Conclusions . . . . .	141
8.2	Outlook . . . . .	143
<b>A</b>	<b>Time Series of Channel Measurements</b>	<b>145</b>
<b>B</b>	<b>Jain's Fairness Index</b>	<b>147</b>
<b>C</b>	<b>Overview Bandwidth-Delay Products</b>	<b>149</b>
<b>D</b>	<b>Numerical Results of Verus</b>	<b>151</b>
D.1	Summary of Throughput for Multiple Flows . . . . .	151
D.2	Cellular Network Experiments . . . . .	152
D.2.1	Statistical Evaluation . . . . .	152
D.2.2	Numerical results . . . . .	152
<b>E</b>	<b>Example of Transition Probability Matrix</b>	<b>159</b>
<b>F</b>	<b>Numerical Results of Model</b>	<b>161</b>
F.1	Effect of Quantization . . . . .	161
F.2	Training with a Non-Matching User Model . . . . .	163
F.2.1	Channel Trace #1 . . . . .	163
F.2.2	Channel Trace #2 . . . . .	164
F.2.3	Channel Trace #3 . . . . .	166
F.2.4	Channel Trace #4 . . . . .	168
F.2.5	Channel Trace #5 . . . . .	170
F.3	Training with a Matching User Model . . . . .	172
F.3.1	Two Users . . . . .	172

---

F.3.2	Three Users . . . . .	173
F.3.3	Four Users . . . . .	175
F.4	Training with a Combined User Model . . . . .	177
F.4.1	Channel Trace #1 . . . . .	178
F.4.2	Channel Trace #2 . . . . .	179
F.4.3	Channel Trace #3 . . . . .	181
F.4.4	Channel Trace #4 . . . . .	183
F.4.5	Channel Trace #5 . . . . .	185
<b>Bibliography</b>		<b>187</b>

Future Mobile Transport Protocols  
Adaptive Congestion Control for Unpredictable Cellular  
Networks

Pötsch, Th.

2016, XXIX, 195 p. 64 illus., 19 illus. in color., Softcover
