

# Contents

1	Introduction	1
2	Preliminaries	5
2.1	Basic Notation	5
2.2	Theory of Computation	6
2.3	Graph Theory	9
2.4	Network Flow Problems	12
2.5	Approximation Algorithms	17
3	Fractional Packing and Parametric Search Frameworks	19
3.1	Parametric Search	19
3.2	Fractional Packing Framework	23
3.3	A Generalized Framework	24
3.3.1	Minimizing Oracles	27
3.3.2	Sign Oracles	29
3.3.3	Separation Oracles	32
3.4	Conclusion	36
4	Budget-Constrained Minimum Cost Flows: The Continuous Case	39
4.1	Introduction	39
4.1.1	Previous Work	40
4.1.2	Chapter Outline	41
4.2	Preliminaries	42
4.3	Network Simplex Algorithm	44
4.3.1	Notation and Definitions	46
4.3.2	Network Simplex Pivots	48
4.3.3	Optimality Conditions	52
4.3.4	Termination and Running Time	53
4.4	Bicriteria Interpretation	62
4.4.1	A Weakly Polynomial-Time Algorithm	62
4.4.2	A Strongly Polynomial-Time Algorithm	66
4.5	Approximability	71
4.5.1	General Graphs	71
4.5.2	Acyclic Graphs	73
4.6	Conclusion	74

5	Budget-Constrained Minimum Cost Flows: The Discrete Case	77
5.1	Introduction	77
5.1.1	Previous Work	78
5.1.2	Chapter Outline	79
5.2	Preliminaries	80
5.3	Integral Case	82
5.3.1	Complexity	82
5.3.2	Approximability	83
5.3.3	Exact Algorithm	85
5.4	The Bounded Knapsack Problem with Laminar Cardinality Constraints	89
5.4.1	A Polynomial-Time Approximation Scheme	92
5.4.2	Fully Polynomial-Time Approximation Schemes	98
5.4.3	A Polynomial-Time Solvable Special Case	107
5.5	Binary Case	109
5.6	Conclusion	113
6	Generalized Processing Networks	117
6.1	Introduction	117
6.1.1	Previous Work	118
6.1.2	Chapter Outline	119
6.2	Preliminaries	120
6.3	Structural Results	123
6.4	Complexity and Approximability	126
6.4.1	Complexity	126
6.4.2	Approximability	128
6.5	Series-Parallel Graphs	131
6.5.1	Augmenting on Flow Distribution Schemes	134
6.5.2	A Faster Approach	142
6.6	Integral Flows	148
6.7	Conclusion	151
7	Convex Generalized Flows	155
7.1	Introduction	155
7.1.1	Previous Work	156
7.1.2	Chapter Outline	156
7.2	Preliminaries	157
7.3	Structural Results	160
7.4	Complexity and Approximability	167
7.4.1	Complexity	168

7.4.2	Approximability . . . . .	172
7.5	Exact Algorithms . . . . .	175
7.5.1	General Graphs . . . . .	175
7.5.2	Acyclic Graphs . . . . .	180
7.5.3	Series-Parallel Graphs . . . . .	181
7.5.4	Extension-Parallel Graphs . . . . .	187
7.5.5	Restricted Extension-Parallel Graphs . . . . .	188
7.6	Integral Flows . . . . .	189
7.7	Conclusion . . . . .	190
8	Conclusion	193
	Bibliography	195
	Glossary	203
	Index	207

Generalized Network Improvement and Packing Problems

Holzhauser, M.

2016, XVI, 213 p. 26 illus., Softcover

ISBN: 978-3-658-16811-7
