

Contents

1	Introduction	1
1.1	The Power of Space: Density, Distance and Division	1
1.2	Understanding Urban-Rural and Regional Development in China	4
1.3	Contents and Structure	8
1.4	Significance of This Study	14
	References	15
2	Urban-Rural Integration and Spatial Agglomeration in the Process of Chinese Urbanization	17
2.1	What Kind of Urbanization Do We Need?	18
2.2	Spatial Agglomeration and Scale Effect in Urban Development	21
2.3	Misunderstanding About Urbanization and Urban Development	25
2.4	Agglomeration Effect of Metropolises: Comparisons Between Shanghai and Tokyo	29
2.5	Toward Balanced Urban-Rural Development and Policy Adjustments	35
	References	37
3	How Should China Maintain Growth While Balancing Regional Development	39
3.1	Industry Agglomeration and Regional Imbalance	40
3.1.1	Industry Agglomeration in the Process of Globalization and Urbanization	42
3.1.2	Regional Imbalance in the Process of Globalization, Industrialization and Urbanization	45

3.2	Balanced Regional Development: Is There Trade-off Between Efficiency and Equalization?	46
3.2.1	Mechanism of Regional Balance	46
3.2.2	Adjustment to Policies for Balanced Regional Development	49
3.3	Readjustment to Policies for Balanced Regional Development	57
	References	60
4	Globalization and Regional Income Inequality in China	63
4.1	Globalization and Income Inequality	63
4.2	China's Journey to Globalization and Regional Inequality	65
4.2.1	Growing International Trade	65
4.2.2	Increasing Cross-Boarder Capital Flows	66
4.2.3	Further Opening up After WTO Accession	66
4.2.4	Globalization and Regional Inequality	67
4.3	Accounting for China's Inter-regional Income Inequality	69
4.3.1	Variables of Income Generating Function	69
4.3.2	Form of Income Generating Function	70
4.3.3	Decomposing Income Inequality	73
4.4	Concluding Remarks	79
	Data Appendix	80
	References	85
5	Economic Opening and Domestic Market Integration	89
5.1	What Do We Know About Market Integration in China?	90
5.2	The Determinants of China's Domestic Integration	93
5.3	Measuring Market Segmentation for Chinese Domestic Goods	95
5.3.1	Data and Index Computing	95
5.3.2	The Integration of Chinese Domestic Goods Market	98
5.4	Data and Estimation	99
5.5	Conclusions	107
	References	108
6	Urban-Rural Inequality and Regional Economic Growth in China	111
6.1	About Inequality and Growth: Where Do We Stand?	111
6.2	Inequality-Growth Nexus: Theories and Modeling Framework	114
6.2.1	Theories on Inequality-Growth Nexus	114
6.2.2	Model Specification	115

6.3	Empirical Evidence from China	118
6.3.1	Basic Results	118
6.3.2	Impact of Inequality on Investment, Education and Economic Growth	121
6.4	Conclusions and Policy Implications	123
	Appendix: Data	124
	References	125
7	Balance Through Agglomeration: A “Third Path” to Balanced Development Between Urban and Rural Areas and Among Regions	127
7.1	Balanced Urban-Rural and Regional Development with Efficiency	128
7.1.1	Economic Agglomeration and Regional Balance Are Reconcilable	128
7.1.2	Urban-Rural Integration and Urban Development Are Reconcilable	130
7.1.3	Social Harmony and Economic Growth Are Reconcilable	131
7.2	Policy Innovation in Balanced Urban-Rural and Regional Development	132
	References	134
	Postscript	135

Toward Balanced Growth with Economic Agglomeration
Empirical Studies of China's Urban-Rural and
Interregional Development

Chen, Z.; Lu, M.
