

Contents

1	Background and Introduction	1
1.1	Background	1
1.2	Accomplishments and Present Research Status	4
1.2.1	Premixed Flame	5
1.2.2	Research of Dynamics and Mechanisms of Premixed Flame Propagation in Tubes	16
1.2.3	Research of Combustion and Explosion Safety in Utilization of Hydrogen Energy	21
1.3	Scientific Issues and Research Objectives of the Thesis	25
1.4	Research Content and Organization of the Thesis	27
	References	28
2	Experiments of Premixed Hydrogen–Air Flame Propagation in Ducts	35
2.1	Introduction	35
2.2	Experimental Setup and Methods	35
2.2.1	Combustion Tube	36
2.2.2	Gas Mixture Preparation and Filling System	36
2.2.3	High-Voltage Ignition System	37
2.2.4	High-Speed Photography System	38
2.2.5	Schlieren Optics System	39
2.2.6	Pressure Transducer	40
2.2.7	Data Acquisition Device	40
2.2.8	Synchronization System	41
2.3	Experiment Procedure and Initial Conditions	42
2.3.1	Methodology	42
2.3.2	Procedure	42
2.3.3	Initial Parameters	42
2.4	Experimental Results and Discussion	43
2.4.1	Hydrogen–Air Flame Propagation in Half-Open Tubes	43
2.4.2	Hydrogen–Air Flame Propagation in Closed Tubes	45

2.4.3 Behaviors and Characteristics of Distorted Tulip Flames	47
2.4.4 Comparisons of Distorted Tulip Flame to Classical Tulip Flame.	49
2.4.5 Effects of Gravity.	52
2.4.6 Effects of Equivalence Ratio	54
2.4.7 Effects of Opening Ratio.	58
2.5 Summary.	66
References	67
3 Numerical Simulations of Dynamics of Premixed Hydrogen-Air Flames Propagating in Ducts.	71
3.1 Introduction	71
3.2 Models and Methods.	73
3.2.1 Physical Model	73
3.2.2 Mathematical Model and Governing Equations.	74
3.2.3 Combustion Modeling.	77
3.3 Numerical Results and Discussion	83
3.3.1 Results Based on Thickened Flame Technique and Comparisons to Experiments	83
3.3.2 LES Calculations Using Burning Velocity Model and Comparisons to Experiments	92
3.4 Summary.	101
References	103
4 Theoretical Analysis of Premixed Hydrogen-Air Flame Propagation in Ducts	107
4.1 Introduction	107
4.2 Evolution of Premixed Flame in a Duct.	108
4.3 Factors Influencing the Flame Properties	109
4.3.1 Influence of Fuel Properties.	110
4.3.2 Influence of Mixture Composition	110
4.3.3 Influence of Pressure and Temperature	110
4.3.4 Influence of Impurities	111
4.3.5 Influence of Ignition Energy	111
4.4 Theoretical Analysis of Premixed Hydrogen-Air Flame in the Duct	112
4.4.1 Empirical Model	112
4.4.2 Theoretical Model and Results.	113
4.5 Comparisons Between Experiments, Numerical Simulations and Theoretical Predictions, and the Combustion Regime	116

4.6	Effects of Wall Friction	118
4.7	Summary	123
	References	124
5	Mechanisms of Flame Deformations in the Premixed	
	Hydrogen–Air Flame Propagation	127
5.1	Introduction	127
5.2	Interactions Between Flame and Pressure Waves	128
5.3	Formation Mechanism of Tulip Flame—Interactions of Flame with Flow	131
5.4	Formation Mechanisms of Distorted Tulip Flames—Interactions Between Flame, Pressure Waves, and Flow	134
5.4.1	Interactions of Flame Front with the Vortex Motion in Burnt Gas.	134
5.4.2	Taylor Instabilities	138
5.5	Summary	141
	References	142
6	Conclusions and Further Work	145
6.1	Summary	145
6.2	Main Conclusions	145
6.3	Future Research	148
	Reference	149

Experimental and Numerical Study of Dynamics of
Premixed Hydrogen-Air Flames Propagating in Ducts

Xiao, H.

2016, XX, 149 p. 71 illus., 62 illus. in color., Hardcover

ISBN: 978-3-662-48377-0
