Contents

Intelligent Computing Systems 1
George A. Tsihrintzis, Maria Virvou and Lakhmi C. Jain

Semantic Tools; Their Use for Knowledge Management in the Public Sector 5
Stamatios Theocharis and George Tsihrintzis

From Game Theory to Complexity, Emergence and Agent-Based Modeling in World Politics 39
John A. Paravantis

A Semantic Approach for Representing and Querying Business Processes 87
Eleni-Maria Kalogeraki, Dimitris Apostolou, Themis Panayiotopoulos, George Tsihrintzis and Stamatios Theocharis

Using Conversational Knowledge Management as a Lens for Virtual Collaboration in the Course of Small Group Activities 115
Demosthenes Akoumianakis and Dionysia Mavraki

Spatial Environments for m-Learning: Review and Potentials 133
Georgios Styliaras

Science Teachers' Metaphors of Digital Technologies and Social Media in Pedagogy in Finland and in Greece 161
Marianna Vivitsou, Kirsi Tirri and Heikki Kynäslahti

Data Driven Monitoring of Energy Systems: Gaussian Process Kernel Machine for Fault Identification with Application to Boiling Water Reactors 177
Miltiadis Alamaniotis, Stylianos Chatzidakis and Lefteri H. Tsoukalas

A Framework to Assess the Behavior and Performance of a City Towards Energy Optimization 189
Stella Androulaki, Haris Doukas, Evangelos Spiliotis, Ilias Papastamatiou and John Psarras

An Energy Management Platform for Smart Microgrids 207
Federico Delfino, Mansueto Rossi, Fabio Pampararo and Luca Barillari

Transit Journaling and Traffic Sensitive Routing for a Mixed Mode Public Transportation System 227
Joshua Balagapo, Jerome Sabidong and Jaime Caro

Adaptation of Automatic Information Extraction Method for Environmental Heatmaps to U-Matrices of Self Organising Maps 247
Urszula Markowska-Kaczmar, Agnieszka Szymanska and Lukasz Culer

Evolutionary Computing and Genetic Algorithms: Paradigm Applications in 3D Printing Process Optimization 271
Vassilios Canellidis, John Giannatsis and Vassilis Dedoussis

Car-Like Mobile Robot Navigation: A Survey 299
Sotirios Spanogianopoulos and Konstantinos Sirlantzis

Computing a Similarity Coefficient for Mining Massive Data Sets 329
M. Coşulschi, M. Gabroveanu and A. Sbîrcea

A Probe Guided Crossover Operator for More Efficient Exploration of the Search Space 351
K. Liagkouras and K. Metaxiotis
