

Contents

- 1 Convex Sets and Convex Functions** 1
 - 1.1 Normed Spaces and Inner Product Spaces 1
 - 1.1.1 Sets and Mappings 1
 - 1.1.2 Normed Spaces 3
 - 1.1.3 Elementary Topology 7
 - 1.1.4 Limitation Theorems 9
 - 1.1.5 Inner Product Spaces 12
 - 1.2 Convex Sets 14
 - 1.2.1 Convex Sets and Their Properties 15
 - 1.2.2 Construction of Convex Sets 17
 - 1.2.3 Separation Theorems 23
 - 1.3 Convex Functions 28
 - 1.3.1 Convex Functions and Their Elementary Properties 28
 - 1.3.2 Examples of Convex Functions 31
 - 1.3.3 Derivative of Convex Functions 33
 - 1.4 Semi-continuous Functions 41
 - 1.4.1 Semi-continuous Functions and Their Elementary Properties 41
 - 1.4.2 Examples of Semi-continuous Functions 45
- References 51
- 2 Set-Valued Mappings and Differential Inclusions** 53
 - 2.1 Set-Valued Mappings 53
 - 2.1.1 Definition of the Set-Valued Mappings 53
 - 2.1.2 Continuities of Set-Valued Mappings 55
 - 2.1.3 Tangent Cones and Normal Cones 62
 - 2.1.4 Derivative of Set-Valued Mappings 67
 - 2.2 Selection of Set-Valued Mappings 72
 - 2.2.1 The Minimal Selection 73
 - 2.2.2 Michael Selection Theorem 76
 - 2.2.3 Lipschitzian Approximation 80
 - 2.2.4 Theorems for Fixed Points 87

2.3	Differential Inclusions and Existence Theorems	89
2.3.1	Differential Equations and Differential Inclusions	89
2.3.2	Why Do We Propose Differential Inclusions?.....	91
2.3.3	Existence Theorems of Solution of Differential Inclusions...	97
2.3.4	The Existence of Solutions of Time-delayed Differential Inclusions	106
2.4	Qualitative Analysis for Differential Inclusions	108
2.4.1	Qualitative Analysis for Lipschitzian Differential Inclusions	108
2.4.2	Qualitative Analysis for Upper Semi-continuous Differential Inclusions	112
2.4.3	Convexification of Differential Inclusions and Relaxed Theorem	118
2.5	Stability of Differential Inclusions	124
2.5.1	Dini Derivatives.....	124
2.5.2	Definitions of Stability of Differential Inclusions.....	128
2.5.3	Lyapunov-like Criteria for Stability of Differential Inclusions	131
2.6	Monotonous Differential Inclusions	140
2.6.1	Monotonous Set-valued Mappings and Their Properties	141
2.6.2	Minty Theorem	143
2.6.3	Yosida Approximation.....	148
2.6.4	Maximally Monotonous Differential Inclusions	152
	References	156
3	Convex Processes	157
3.1	Convex Processes in Linear Normed Spaces	157
3.1.1	Convex Processes and Their Adjoint Processes	158
3.1.2	The Norm of Convex Processes	163
3.1.3	Fundamental Properties of Convex Processes	164
3.2	Convex Processes in Spaces with Finite Dimensions	168
3.2.1	Adjoint Processes in n -Dimensional Space.....	168
3.2.2	Structure of Convex Processes	173
3.3	Controllability of Convex Processes	185
3.3.1	T -Controllability	185
3.3.2	Controllability	192
3.4	Stability of Convex Process Differential Inclusions	195
3.4.1	Stability of Convex Processes	196
3.4.2	Construction of Lyapunov Functions	203
	Reference	208
4	Linear Polytope Control Systems	209
4.1	Polytope Systems	209
4.1.1	Linear Control Systems and Matrix Inequalities	209
4.1.2	Linear Polytope Systems	214

4.2	Convex Hull Lyapunov Functions	218
4.2.1	Convex Hull Quadratic Lyapunov Functions	218
4.2.2	Layer Sets for the Convex Hull Quadratic Function	221
4.3	Control of Linear Polytope Systems	232
4.3.1	Feedback Stabilizability for Linear Polytope Systems	233
4.3.2	Feedback Stabilization for Linear Polytope Systems with Time-delay	239
4.3.3	Disturbance Rejection for Linear Polytope Systems	242
4.4	Saturated Control for Linear Control Systems	249
4.4.1	Saturated Control Described by Set-Valued Mappings	249
4.4.2	Stabilization by the Saturated Control	251
4.4.3	Disturbance Rejection by the Saturated Control	256
	References	262

Theory of Control Systems Described by Differential
Inclusions

Han, Z.; Cai, X.; Huang, J.

2016, XI, 344 p. 50 illus., 5 illus. in color., Hardcover

ISBN: 978-3-662-49243-7
