

Contents

1	Introduction	1
1.1	Technology Transfer and Economic Growth in Sub-Sahara African Countries—Lessons from East Asian Experience	1
1.2	From Technology Importers to Net Technology Exporters	3
1.3	Scope of This Book	5
1.4	How This Book Is Organized	5
	References	6
2	Technology Transfer For Economic Growth In Africa—Why It Matters	7
2.1	Introduction	7
2.2	Technology Imports and Technology Learning	12
2.3	Focus on Manufacturing and Related Service Sector Technologies	13
2.4	Manufacturing Sector Growth and Solving Duality of Economic Structure	14
2.5	Dynamics and Intervention Points for Solving Duality in Economic Structure	15
2.6	Japanese Economic Development: Solving Duality in Economic Structure	16
2.7	Infrastructure Development	18
2.8	Non-linear Relationship Between Science and Technology Education and Industrial Technology Outcomes	19
2.9	Growth in MVA and GDP Correlation	20
	References	20
3	Sub-Sahara African Countries' Attractiveness to Technology Transfer	23
3.1	Critical Evaluation of Asset Profile of the African Continent	24
3.2	Potential for Agro-Processing—Convergence of Agriculture and Industry	26

3.3	Technology and Agricultural Productivity: The Missing Link to Productivity Improvement	26
3.4	Demand-Led Technology Transfer Efforts: Examining Growth in Market Size and Regional Integration	27
3.5	African Markets and Risk Factor	29
3.6	Efficiency and Strategic Motive Investments in Africa.	31
3.7	Changing Profile of Assets in African Countries: Implications for Technology Transfer and Economic Growth	31
3.8	Implications for Technology Transfer and Capability Building	34
	References	34
4	Pragmatic Analytical Framework for Technology Transfer and Economic Growth	37
4.1	Introduction.	37
4.2	Absorptive Capacity Building and Technology Transfer: Core Aspects of Technology Management.	39
4.3	Technology Management in Catch-up Economies: Need for an Integrated Analytical Framework	41
4.4	Technology Environment: Complexity of Variable Interaction	44
4.5	International Level Factors: Attributes and Impact	45
4.6	International Trade and Market Structure.	45
4.7	International Technological Developments.	47
4.8	International and Regional Division of Labor.	48
4.9	Chance Element and Technological Opportunities	50
4.10	National Technological Environment: The National, Firm and Individual Level Variables.	51
4.11	Economic Factors.	51
4.12	Socio-Cultural Factors and Institutions	56
4.13	Conclusion	58
	References	59
5	Japanese Technological Capability Building and Management Practices for Development of SMEs	63
5.1	Brief Historical Background	63
5.2	Economic Policy for Small Manufacturing Industries—Lack of SME Development Policies as Compared to Large Industries	64
5.3	The Curse of Abundant Unskilled Labor.	67
5.4	Overview of Modern Japanese Small and Medium Manufacturing Firms	68
5.5	Entrepreneurial Factor in the SME Manufacturing Sector	70
5.5.1	Understanding Entrepreneurship in the SME Manufacturing Sector	70

5.6	Entrepreneurship—Analytical Framework	75
5.7	Motivating Factors	77
5.8	Innovation as an Entrepreneurial Task—(Kaizen)	79
5.9	Social Network—Building Social Capital	81
5.10	The Link Between Education and Entrepreneurship	82
5.11	High Savings Rate and Its Implications on Entrepreneurial Activity	84
5.12	Employment Policies	85
	References	88
6	Industrial Structure and Enterprise Networking: Learning from Japanese Experience	91
6.1	Introduction	91
6.2	Overview of the Organizational Characteristics of SMEs	92
6.3	Industrial Networking	94
6.4	Regional Grouping of Certain Industries—Community Based Industries	95
6.5	Subcontracting System	96
6.6	Japanese Culture and the Industrial Networks Process	100
6.7	Networking and the Use of Information Technology	101
6.8	Advantages of Industrial Networking	103
6.9	Institutional Support for SME Activities	103
6.10	Japanese SMEs in a Changing International Environment	106
6.11	Problems Related to Changes in the International Business Environment	107
6.12	Lessons from SMEs' Response to the Problems	110
	6.12.1 Business Conversion	110
	6.12.2 Market Diversification	112
	6.12.3 Moving Operations Overseas	114
	References	124
7	Malaysian Industrial Development Experience—Economic Fundamentals and Policy	127
7.1	Introduction	127
7.2	Manufacturing Percentage of GDP (1960s–1990s)	127
7.3	Manufacturing Value Added	128
7.4	Structural Change	131
7.5	Educational Levels	132
7.6	Technology Infrastructure	133
7.7	Provision and Quality of Infrastructure	135
7.8	Technology Policy and Planning	135
7.9	Foreign Direct Investment Flows and Connected Issues	137
7.10	Interface Between FDI and Host Country Gains	137
7.11	Malaysian FDI Incentive Regime and Technological Capability Building	138

7.12	Regional Economic Trends: Resulting Divergent Industrial Strategies	140
7.13	Political Economy: National Industrial Interest Groups	141
7.14	Geographical and Comparative Advantage Issues	142
7.15	International Division of Labor: Malaysia Placed Within the Context of Pacific Asia	143
7.16	Contemporary Sub-Sahara African Countries' Situation: Regional and Domestic Changes	144
7.17	Changes in Kenyan Industrial Strategy	145
7.18	A Summary of the Constraints to Technology Transfer and Capability Building in the Sub-Sahara African Countries' Manufacturing Sector	145
7.19	Conclusion	146
	References	147
8	Technological Capacity Building in Consumer Electronics Industry in Malaysia	149
8.1	Introduction.	149
8.1.1	The Main Issues in the Malaysian Consumer Electronics Industry	149
8.2	A Two-Pronged Scenario	150
8.2.1	Consumer Electrical Products Manufacturing Industry in Kenya.	150
8.3	Failure in Technological Capability Building in Consumer Electronics in Kenya—The Case of Sanyo African Radio Manufacturing Company (Sanyo ARMCO)	151
8.3.1	Current Redefined Regional Dynamics: Expanded Market	152
8.4	Building Technological Capacity in Consumer Electronics Industry: A Case Study of Matsushita Electric Company in Malaysia	153
8.5	Brief Historical Overview of Melcom: Why It Makes an Appropriate Case Study	156
8.6	Human Resource Upgrading Activities	156
8.7	Production Capacity and Capability	158
8.7.1	Technology and Process Configuration	160
8.7.2	Advanced Manufacturing Technology	161
8.8	Automated Plastic Injection Plant—Assessment	162
8.8.1	Machine Tooling for AMT	163
8.8.2	Production Capacity and Capability Changes Over 30 Years	163
8.9	Research and Development	164

8.10	Supplier Development Program	168
8.10.1	Implementation Method and Processes	168
8.11	Summary Evaluation of Technological Capability.	171
	References	175
9	A Case Study of Automotive Technological Capacity	
	Development in Malaysia	177
9.1	Key Issues in Auto Industry: Global and Regional	177
9.1.1	Strategic Importance	177
9.2	Market Structure and Demand Trends.	179
9.3	Sustained Investments in Oligopolistic and Saturated Market	180
9.4	Major Competitive Factors	180
9.4.1	Concept of Quality	180
9.4.2	Organization of Production	181
9.4.3	Just-in-Time Delivery System	181
9.4.4	Technology	182
9.4.5	Environmentally Friendly Aspects.	183
9.4.6	Information Technology Systems	184
9.5	Restructuring, Strategic Alliances and the Increasing Use of Computer Based Technologies.	185
9.6	Auto Industry in Malaysia.	185
9.7	Rationalization of Malaysian Auto Industry	186
9.8	Auto Industry in Kenya	187
9.9	Government Objectives and Policies.	188
9.10	Bottom-Up Approach: Policy Failure	188
9.11	Automotive Maintenance and Repair Capability	190
9.12	Analysis of the Two Countries' Experiences	191
9.13	Why Proton Case Study?	192
9.14	Human Resource Upgrading Activities	194
9.15	Stressful Training System (1985–1994).	195
9.16	A Conspiracy of Negative Factors	197
9.17	Turnaround: From Stressful Training System to Learning and Development (1994–97)	199
9.18	Production Capability and Capacity Building.	200
9.19	Production Context.	201
9.20	Body Assembly, Painting, Trim and Final Assembly	202
9.21	Die Making and Body Stamping	203
9.22	Engine and Transmission Assembly and Parts Casting	205
9.23	Casting Plant.	206
9.24	Research and Development	208
9.25	Performance Evaluation	209
9.26	R&D and Strategic Linkages	210
9.27	Suppliers Development Plan	212
9.28	Vendor Production: Another Sub-assembly	213

9.29	Summary Evaluations on Technological Capability.	215
9.29.1	Confusion in the Initiating Phase	215
9.29.2	Limited Performance.	216
9.29.3	A Thousand-Piece Jigsaw Puzzle	217
	References	218
10	Learning from Entrepreneurial East Asian States	221
10.1	Focus on Linkage-Intensive Technologies and Moving Beyond Solving Market Failure Problem.	221
10.1.1	Entrepreneurial State.	222
10.2	Opportunities and Challenges for African Industrialization.	226
10.2.1	Summary Analysis of Key Issues	227
10.2.2	Technology Transfer Environment: Determinant Variable Interaction.	227
10.2.3	Regional Production Network (RPN) and National Technological Capability Building	228
10.2.4	A Proposition for Technological Capability Building Within the Framework of RPN.	229
10.2.5	Contingencies Within the International Environment	230
10.2.6	National Absorptive Capability.	231
10.2.7	Nurturing Absorptive Capability: Experience and Purposeful Efforts.	232
10.2.8	Technology Transfer and Capability Building: Process and Critical Issues.	233
10.2.9	Balancing the 'Hows' and 'Whys' of Technological Learning	233
10.2.10	Managing the Technological Learning Process	234
10.2.11	Segmented Operations: Hindrance to Technological Learning	234
10.2.12	Parts Suppliers and Building Technological Capability	235
10.2.13	Other Implications for Sub-Sahara African Countries	236
10.2.14	Policy Implications	237
10.2.15	Enhancing Sub-Sahara African Countries' National Technology Absorptive Capability	237
10.2.16	Need for a Comprehensive National Technology Policy and Planning	238
10.2.17	Regional Economic Dynamics and Technology Transfer and Capability Building in African Countries.	239
10.2.18	Firm Level Implications	240
10.2.19	Discussion of the Implications	240

10.2.20	Adaptation of Production Systems to Local Conditions	241
10.2.21	Limitation to Technological Learning by Doing	242
10.2.22	Development of Parts and Component Suppliers. . . .	242
10.2.23	Concluding Remarks.	243
