Contents

Pairwise Comparisons Rating Scale Paradox 1
W.W. Koczkodaj

On Achieving History-Based Move Ordering in Adversarial Board Games Using Adaptive Data Structures 10
Spencer Polk and B. John Oommen

Identification of Possible Attack Attempts Against Web Applications Utilizing Collective Assessment of Suspicious Requests 45
Marek Zachara

A Grey Approach to Online Social Networks Analysis 60
Camelia Delcea, Liviu-Adrian Cotfas, Ramona Paun, Virginia Maracine, and Emil Scarlat

ReproTizer: A Fully Implemented Software Requirements Prioritization Tool 80
Philip Achimugu, Ali Selamat, and Roliana Ibrahim

A Consensus-Based Method for Solving Concept-Level Conflict in Ontology Integration 106
Trung Van Nguyen and Hanh Huu Hoang

Enhancing Collaborative Filtering Using Implicit Relations in Data 125
Manuel Pozo, Raja Chiky, and Elisabeth Métais

Semantic Web-Based Social Media Analysis 147
Liviu-Adrian Cotfas, Camelia Delcea, Antonin Segault, and Ioan Roxin

Web Projects Evaluation Using the Method of Significant Website Assessment Criteria Detection 167
Paweł Ziemba, Jarosław Jankowski, Jarosław Wątróbski, and Mateusz Piwowarski

Dynamic Database by Inconsistency and Morphogenetic Computing 189
Xiaolin Xu, Germano Resconi, and Guanglin Xu

A Method for Size and Shape Estimation in Visual Inspection for Grain Quality Control in the Rice Identification Collaborative Environment Multi-agent System 205
Marcin Hernes, Marcin Maleszka, Ngoc Thanh Nguyen, and Andrzej Bytniewski
