High-Level Model for the Design of KPIs for Smart Cities Systems	1
<i>Cezary Orłowski, Artur Ziółkowski, Aleksander Orłowski, Paweł Kapłański, Tomasz Sitek, and Witold Pokrzywnicki</i>	
Implementation of Business Processes in Smart Cities Technology	15
<i>Cezary Orłowski, Artur Ziółkowski, Aleksander Orłowski, Paweł Kapłański, Tomasz Sitek, and Witold Pokrzywnicki</i>	
Designing Aggregate KPIs as a Method of Implementing Decision-Making Processes in the Management of Smart Cities	29
<i>Cezary Orłowski, Artur Ziółkowski, Aleksander Orłowski, Paweł Kapłański, Tomasz Sitek, and Witold Pokrzywnicki</i>	
Smart Cities System Design Method Based on Case Based Reasoning.	43
<i>Cezary Orłowski, Artur Ziółkowski, Aleksander Orłowski, Paweł Kapłański, Tomasz Sitek, and Witold Pokrzywnicki</i>	
Model of an Integration Bus of Data and Ontologies of Smart Cities Processes	59
<i>Cezary Orłowski, Artur Ziółkowski, Aleksander Orłowski, Paweł Kapłański, Tomasz Sitek, and Witold Pokrzywnicki</i>	
Ontology of the Design Pattern Language for Smart Cities Systems	76
<i>Cezary Orłowski, Artur Ziółkowski, Aleksander Orłowski, Paweł Kapłański, Tomasz Sitek, and Witold Pokrzywnicki</i>	
Text Classification Using “Anti”-Bayesian Quantile Statistics-Based Classifiers	101
<i>B. John Oommen, Richard Khoury, and Aron Schmidt</i>	
Two Novel Techniques to Improve MDL-Based Semi-Supervised Classification of Time Series	127
<i>Vo Thanh Vinh and Duong Tuan Anh</i>	
Author Index	149

Transactions on Computational Collective Intelligence
XXV

Nguyen, N.-T.; Kowalczyk, R.; Orłowski, C.; Ziolkowski, A.
(Eds.)

2016, XI, 149 p. 66 illus., Softcover
