

Contents

1	Background Independence of Fertility Decline	1
1.1	The Fallacies of Demographic Transition Theory	2
1.1.1	A Decline of Mortality Is not the Cause of a Decline of Fertility	2
1.1.2	Industrialization	5
1.1.3	Urbanization	8
1.1.4	Education	9
1.1.5	Demographic Transition Is Only a Tale and not a Theory	13
1.2	The Early Stage of Diffusion Hypothesis and Its Limitations	15
1.2.1	Carved Seals of Diffusion	15
1.3	Household Economics—Not Even Wrong	16
1.3.1	Is a Society's Formation Entirely the Result of our Clear and Conscious Choices?	17
1.3.2	What Are the Causes of Alterations of Preferences?	18
1.3.3	The Lack of Falsifiability	19
1.3.4	Not Even Wrong	19
1.4	Evidence of Background Independence	22
1.4.1	Japan	22
1.4.2	Normal Distribution in Hokaido	25
1.5	The Rise of Neo-Diffusionism	26
1.5.1	Mathematical Model of Neo-Diffusionism	28
1.5.2	The Model of Rosero-Bixby and Casterline	28
1.5.3	The Background-Dependent Simultaneous Differential Equation Model	29
1.6	The True Impact of Diffusion Hypothesis: Background Independence	31
1.6.1	A Preoccupation Which Governs Us	32

1.7	What Diffusion Theory Should Propose	33
1.7.1	Irreversibility	33
1.7.2	Stability and Smoothing	34
2	Reaction-Diffusion of the Number of Children	35
2.1	What Is the Reaction-Diffusion System?	35
2.2	Reaction-Diffusion of the Number of Children	36
2.2.1	Diffusion of Low Fertility	37
2.2.2	Reaction as Disintegration of the Balance of Stochastic Fluctuations	38
2.2.3	Fertility Decline Difference Equation	39
2.2.4	The Application of Fertility Decline Difference Equation	40
2.2.5	Differential Equation of Fertility Decline	46
2.2.6	Progressive Wave	49
2.3	A Search for a Singularity-Origin of Fertility Decline in Europe	52
2.3.1	The Date When a Singularity Appeared	52
2.3.2	Where Is a Singularity?	53
2.4	Reaction-Diffusion from the Singularity of Lot-et-Garonne	56
2.4.1	Features of Lot-et-Garonne	58
2.5	Areas Around the Singularity: Aquitaine and Parts of the Midi-Pyrénées	59
2.5.1	Background Independence of Fertility Decline	60
2.6	Districts Situated 600–500 km Away from the Singularity	61
2.7	Districts Located Further than 600 km Away from the Singularity	62
2.7.1	Advanced Industrial Development in Nord-Pas-de-Calais	63
2.7.2	Low Fertility in Northern France	63
2.7.3	The Reaction-Diffusion Process in Belgium	63
2.8	Conclusion	67
3	Marriage Function as an Integral Equation	69
3.1	Introduction to Marriage Function	69
3.2	Previous Marriage Functions	70
3.2.1	Coale-McNeil Distribution: A Convolution Model	70
3.2.2	Applications of Extreme Events	71
3.3	How First Marriages Occur	72
3.3.1	Hernes' Function	72
3.3.2	Flaws of Hernes' Function	73
3.3.3	The More Marriages That Are Evident Within a Space, the Higher the Occurrences of Marriage	73

3.3.4	Formulation of an Integral Equation	74
3.3.5	The Fit of SDSMF with the Data	76
3.4	Decisive Evidence of SDSMF	78
3.4.1	A Good Theory Can Predict Some Theoretical Values . . .	78
3.4.2	Comparing SDSMF to the Coale-McNeil and Double Exponential Distributions	80
3.5	Testing SDSMF in Other Countries	81
3.5.1	Testing SDSMF Using Cohorts Within the Swiss Population	82
3.5.2	Marriage at Young Ages: The Second Decisive Discriminant Test	83
3.5.3	A Test Using Algeria Data	84
3.6	Conclusion	85
Appendix A: Mathematical Supplement		87
