

Contents

1	Introduction	1
1.1	Adaptive Filter and Its Application Areas	1
1.2	Basic Scheme for Adaptation	3
1.3	Organization of the Book	4
1.4	Remarks on Notation	5
	References	5
2	Classical Adaptation Algorithms	7
2.1	Least Mean-Squares (LMS) Algorithm	7
2.2	Normalized LMS (NLMS) Algorithm	9
	References	13
3	Affine Projection Algorithm	15
3.1	Motivation of Affine Projection Algorithm	15
3.2	Basic Affine Projection Algorithm (B-APA)	18
3.3	Regularized Affine Projection Algorithm (R-APA)	21
3.4	Alternative Approaches to Derivation of Update Equations	22
3.4.1	Update Equation as Solution of an Optimization Problem	22
3.4.2	Derivation of Update Equation by Instantaneous Approximation	24
3.5	Decorrelating Property of B-APA	25
3.6	Formal Similarities Between APA and RLS	29
	References	56
4	Family of Affine Projection Algorithms	59
4.1	Variants of Basic Affine Projection Algorithm	59
4.2	Partial-Rank Algorithm (PRA)	59
4.3	NLMS Algorithm with Orthogonal Correction Factors (NLMS-OCF)	60

4.4	Binormalized Data-Reusing LMS Algorithm (BNDR-LMS).	62
4.5	Unified Formulation	63
	References	64
5	Convergence Behavior of APA	65
5.1	Measures of Convergence Behavior	65
5.2	Fundamental Behavior of B-APA	67
5.2.1	Shuffling Property	67
5.2.2	Stability and Mean-Square Deviation	72
5.3	Discrete Orientation Assumption for Regressors	75
5.4	Autoregressive Regressor Assumption.	86
5.4.1	Formulation	86
5.4.2	Convergence of Mean Coefficient Vector	91
5.4.3	Behavior of Mean-Square Error	92
5.5	Convergence Behavior of R-APA	100
5.5.1	Steady-State Performance	100
5.5.2	Transient Analysis	107
	References	118
6	Reduction of Computational Complexity	121
6.1	Computational Complexity of APA	121
6.2	Fast Affine Projection (FAP) Algorithm	122
6.2.1	Time-Shift Property of Regressor Blocks	122
6.2.2	Recursion for the Error Vector e_k	122
6.2.3	Expression for w_{k+1} as a Linear Combination of Past Regressors	123
6.2.4	Recursion for $\epsilon_{k,l}$	126
6.2.5	Recursion for Computing $e_{k,0}$	127
6.2.6	Algorithm and Computational Complexity	128
6.3	Block Exact Fast Affine Projection (BEFAP) Algorithm	129
6.3.1	Block Exact Technique.	129
6.3.2	Fast Matrix–Vector Multiplication	137
6.3.3	Algorithm and Computational Complexity	142
	References	162
7	Kernel Affine Projection Algorithm.	165
7.1	Kernel Trick	165
7.2	Kernel Affine Projection Algorithm (KAPA)	168
7.3	Sparsification of Regressors.	173
	References	185

8	Variable Parameter APAs	187
8.1	Variable Step-Size APA (VSS-APA)	187
8.1.1	VSS-APA Based on Optimization of Step-Size	187
8.1.2	VSS-APA for Acoustic Echo Cancellation	189
8.2	Proportionate APA (PAPA)	194
8.2.1	Proportionate NLMS (PNLMS)	194
8.2.2	Proportionate APA (PAPA)	195
8.3	Evolving Order APA (E-APA)	196
8.4	Variable Regularized APA (VR-APA)	197
8.4.1	Use of a Posteriori Error	197
8.4.2	Adaptive Regularization Matrix	202
	References	203
	Appendix A: Matrices	205
	Index	221

Theory of Affine Projection Algorithms for Adaptive
Filtering

Ozeki, K.

2016, XII, 223 p. 32 illus., Hardcover

ISBN: 978-4-431-55737-1
