Part I Environmental Knowledge

1	Asia's Local Air Pollution and Impacts on Global Climate Change	3
	Nobuhiro Horii	
1.1	Economic Growth and Energy Consumption in Asia: What Is the Key to Energy Saving?	3
1.2	Increasing Impact on Climate Change: High Dependency on Coal	6
1.3	Current Situation of Traditional Air Pollution: Basically Improving	9
1.4	Future Outlook for Energy Demand and Environmental Problems in Asia	13
1.5	Conclusion	16
	References	17
2	Issues and Problems Regarding Water in Developing East Asia . . .	19
	Tetsuya Kusuda	
2.1	Introduction	19
2.2	Structure and Elements Regarding Water Issues and Problems	20
2.2.1	Current Water Issues and Problems	20
2.2.2	Structure of Water Issues and Problems	21
2.2.3	Characteristics of Water Issues and Problems	22
2.3	Development of Water Issues and Problems in Asia	23
2.3.1	Population	23
2.3.2	Urbanization	24
2.3.3	Economy	24
2.3.4	Climate	25
2.3.5	Floods	25
2.3.6	Groundwater and Water Resources	25

2.3.7	Water Supply and Water Scarcity	26
2.3.8	Wastewater Treatment and Sanitation	26
2.3.9	Water Pollution and Sediment Transport	27
2.3.10	Acid Rain	27
2.4	Integrated River Basin Management to Solve Problems and to Discuss Issues	27
2.4.1	Elements of Integrated River Basin Management	27
2.4.2	Concepts for Management	28
2.4.3	Objectives of IRBM	28
2.4.4	Management Procedure	29
2.4.5	Calculation Methods	29
2.4.6	Simplified Methods on IRBM	30
2.4.7	Example: Case Study of the Yellow River	30
	References	32
3	Environmental Problems in China	33
	Reiitsu Kojima	
3.1	Points Which Merit Extra Attention When Examining Environmental Ecosystem Problems in China	33
3.1.1	Negative Historical Heritage	33
3.1.2	Nature of Industrialization Which Began Full Scale in 1953	36
3.1.3	Occurrence of Compressed Environmental Destruction	37
3.2	1973 to the Mid-1990s Pollution Investigation and Policy Formation	38
3.2.1	Environmental Awareness	38
3.2.2	Progress of the Inspections	39
3.2.3	Feature of Policies	41
3.3	Mid-1990s to Today: Environmental Burden Additionally Increased by Hyper-rapid Growth	42
3.3.1	New Environmental Burden Brought About by Qualitative Change in the Economy	43
3.3.2	Deepened Environmental Awareness Accompanying New Economic Change	45
3.3.3	Groping for New Policy	46
3.3.4	Groping for a New Environmental Policy	48
3.3.5	Investment for Environmental Protection	49
3.4	Assessment of the Effect of a 40-Year Period of Environmental Protection Activity	50
3.5	Conclusion	52
	References	53

4	Environmental Issues in Southeast Asia	55
	Michikazu Kojima	
4.1	Introduction	55
4.2	Diverse Southeast Asian Countries and Their Environmental Issues	56
4.3	Environmental and Resource Issues and International Cooperation	58
4.3.1	Mekong River	59
4.3.2	Forest Fires and Smoke Pollution (Haze)	60
4.3.3	Initiatives Related to Biodiversity Protection	62
4.3.4	Cross-Border Products and Environmental Regulations on Products	63
4.4	Southeast Asian Economic Integration and Environmental Issues	65
4.5	Conclusion	66
	References	67
5	Environmental Policies in East Asia: Origins, Development, and Future	69
	Akihisa Mori	
5.1	Framing Environmental Challenges and Environmental Policies	69
5.2	Framing Environmental Problems in Neoclassical Economics	70
5.3	Economic and Institutional Cause of Environmental Problems in East Asia	72
5.4	Experience of Environmental Policies in East Asia	74
5.5	Summary and Prospects	77
	References	78
 Part II Environmental Technology		
6	Analysis Methods for Air, Water, and Soil	81
	Yuko Ishibashi	
6.1	Introduction to Analysis	81
6.2	Organic Analysis	82
6.2.1	Gas Chromatography with Flame Ionization Detector (GC (FID))	82
6.2.2	Gas Chromatography with Electron Capture Detector (GC (ECD))	83
6.2.3	Gas Chromatography Mass Spectrometry (GC/MS) . . .	84
6.2.4	High-Performance Liquid Chromatography (HPLC)	84
6.2.5	Liquid Chromatography-Tandem Mass Spectrometry (LC/MS/MS)	86

6.3	Inorganic Analysis	87
6.3.1	Ion Chromatography (IC)	88
6.3.2	Atomic Absorption Spectrometry (AAS)	89
6.3.3	High Frequency Inductively Coupled Plasma Atomic Emission Spectrometry/Mass Spectrometry (ICP-AES/ MS)	89
6.3.4	High Frequency Inductively Coupled Plasma Atomic Emission Spectrometry/Mass Spectrometry (ICP-AES/ MS)	90
6.4	Ending Analysis	92
7	Environmental Quality Analysis	93
	Yuka Watanabe	
7.1	Introduction	93
7.2	Environmental Standards	94
7.3	Regulation Standards	94
7.3.1	Stringent Standards	95
7.3.2	Total Amount Regulation	95
7.4	Official Method	95
7.5	Sample Preparation	96
7.5.1	Sampling (Collecting Samples)	96
7.5.2	Sample Preparation	96
7.6	Pretreatment	97
7.6.1	Decomposition and Dissolution	97
7.6.2	Extraction from Solids	98
7.6.3	Liquid-Liquid Extraction	98
7.6.4	Solid Phase Extraction	98
7.6.5	Concentration	99
7.6.6	Other Pretreatment Methods	99
7.7	Reliability of Analytical Values	100
7.7.1	Uncertainty	100
7.7.2	Technical Terms Related to Reliability	100
7.8	Leaching Test Method	101
7.8.1	Judgment Criteria for Landfill	101
7.8.2	Environmental Quality Standards for Soil Pollution	101
7.8.3	Soil Leaching and Content Standards	102
7.8.4	Radioactive Substance Standards	102
7.9	Conclusion	103
	References	103
8	Water Purification by Reducing the Pollution Burden	105
	Hiroshi Kumagai and Takahiro Kuba	
8.1	Overview of Water Pollution	105
8.1.1	Reduction of Water Pollution	105
8.1.2	Pollution Burden	106

8.2	Standard Items for Preservation of the Aquatic Environment . . .	107
8.2.1	Environmental Quality Standards	107
8.2.2	Monitoring-Required Items	108
8.2.3	Investigation-Required Items	108
8.2.4	Environmental Quality Standards for Preservation of Aquatic Life	108
8.2.5	Effluent Standard	109
8.3	Measures for Pollution Burden According to Pollution Source	112
8.3.1	Measures for Factory/Workplace Pollution Burden . . .	112
8.3.2	Measures for Domestic Wastewater Burden	115
8.3.3	Measures for Pollution Burden of Non-point Source	116
8.4	Reinforcing Water Purification Capacity	116
8.4.1	Measures for Reinforcing Water Purification Capacity	116
8.4.2	Cases of Reinforced Water Purification Capacity	116
8.5	Current Situation and Future Problems in Fukuoka Prefecture	117
8.5.1	Constant Monitoring of Water at Environmental Quality Standards Survey Points	117
8.5.2	Result of Constant Monitoring of Water	119
8.5.3	Improved Water Quality in Fukuoka Prefecture	119
8.5.4	Future Problems Concerning Preservation of the Aquatic Environment	120
	References	121
9	Recyclable Resources and Proper Waste Disposal	123
	Takayuki Shimaoka	
9.1	History Associated with Waste Problems and Measures Taken to Solve Related Issues	123
9.2	Changes in Waste Management Technology	127
9.2.1	Intermediate Treatment	127
9.2.2	Final Disposal	129
9.3	Transition to Waste-Based Recyclable Resources Aimed at Creating a Sustainable Society	131
9.3.1	The Modern Resource Problem	131
9.3.2	Resource Consumption and Resource Recycling: Material Flow in Japan	132
9.4	Establishing a Recycling-Oriented Society to Solve the Resource Problem	133

9.4.1	Ways of Promoting the Formation of a Recycling-Oriented Society	133
9.4.2	Using Sustainable Environmental Technology in a Move Toward Recycling Resources	134
	References	135

Part III Environmental Evaluation

10	Concept of the Environment and Environmental Systems	139
	Hirofumi Nakayama	
10.1	Environmental Capacity of the Nature and Scale of Human Activities	139
10.2	Basic Concept of Environmental Protection	143
10.3	Methods of Environmental Systems Analysis	144
	References	148
11	Socioeconomic Metabolism and Sustainability	149
	Hiroki Tanikawa	
11.1	Earth's Material Balance	149
11.2	Energy and Material Balance of Human Society	150
11.3	Abundance and Material Stocks	153
11.4	Material Flow, Stock, and Global Warming	154
	References	157
12	Environmental Problems in Economics	159
	Hideo Koide	
12.1	Economics and Environment	159
12.1.1	What Is Economics?	159
12.1.2	The Relationship Between the Environment and Economics	160
12.1.3	Weaknesses of Mainstream Economics	162
12.2	Optimal Use of Exhaustible Resources	163
12.2.1	An Increase in the Price of Resources	163
12.2.2	Hotelling's Rule	164
12.2.3	Examples	166
12.3	The Task of Economics	167
12.3.1	From Actual Data	167
12.3.2	Conclusion	169
	References	169
13	Monetary Value of the Environment: Theory and Method	171
	Mitsuyasu Yabe	
13.1	Classification of Environmental Values	171
13.2	Valuation Methods of Environmental Value	173
13.2.1	Concept of Classification	173
13.2.2	Preference-Independent Valuation Method	173
13.2.3	Preference-Dependent Valuation Method	175

13.3	Contingent Valuation Method	177
13.3.1	The Willingness-to-Pay and Willingness-to-Accept Compensation	177
13.3.2	Diagrammatic Presentation of Welfare Measurement	177
13.3.3	Major Questionnaire Formats	179
13.4	Conclusion	180
	References	181
14	Sustainable Development	183
	Shinji Kaneko	
14.1	Introduction	183
14.2	Discussion Points from the Perspective of How Development Should Be Approached	184
14.3	Discussion Points Regarding Sustainability	186
14.4	Measurement and Indicators for Sustainable Development	188
14.4.1	Classification of Indicators	188
14.4.2	Individual Indicators	189
14.4.3	Integrated Indicators	190
	References	192
 Part IV Environmental Strategy		
15	Basics in Environmental Economics and Environmental Policies	197
	Toshiyuki Fujita	
15.1	Natural Environment and Human Beings	197
15.2	Market and Environment	199
15.2.1	Agenda of Environmental Economics	199
15.2.2	Market Equilibrium	199
15.2.3	Market Failure	203
15.3	Cost–Benefit Analysis of Environmental Policies	205
15.4	Method of Environmental Policies	207
15.4.1	Direct Regulation	207
15.4.2	Pigovian Tax	207
15.4.3	Emission Trading	209
	References	212
16	Environmental Policy	213
	Shiro Hori	
16.1	Overview of Environmental Policy and Measures	213
16.1.1	Classification of Environmental Policies	213
16.1.2	Direct Regulation	214
16.1.3	Economic Method: When Are Economic Incentives Effective?	216
16.1.4	Voluntary Actions	216

16.1.5	Information Disclosure	217
16.1.6	Policy Mix	218
16.2	Effectiveness of Economic Measures: Theoretical Analysis	219
16.3	Compensation Policy for Social Damage	222
16.3.1	Legal Aspect of Compensation	222
16.3.2	Economic Aspect of Compensation	224
16.4	Assessment of Environmental Policies	224
16.4.1	Cost-Benefit Analysis: Case Study of the Policy	225
16.4.2	Cost-Effectiveness Analysis: Comparison Between Multiple Policies	226
16.4.3	Risk Analysis	227
16.4.4	Risk Communication	228
16.5	Application of Policy Assessment for Some Problems	229
16.5.1	Global Environmental Problems	229
16.5.2	Waste and Recycling	230
	References	232
17	Quantitative Analysis Method of Environmental Burden Using Input-Output Models	233
	Ryoji Hasegawa	
17.1	Introduction	233
17.1.1	What Is an Input-Output Table?	234
17.1.2	Environmental Analysis by Input-Output Method	237
17.1.3	Multiregional Input-Output Model and International Environmental Analysis	240
	References	242
18	Corporate Environmental Management and Environmental Strategies	245
	Hidemichi Fujii	
18.1	Environmental Management Toward a Sustainable Society	245
18.2	Measures Against Pollution in the Manufacturing Process	246
18.3	Measures Against Pollution and Cost Allocation	248
18.4	Factor Analysis of Environmental Pollutant Emission	250
18.5	Summary	251
	References	252
19	Basic of Project Management and Environmental Project Cases	255
	Mami Shinozaki, Kenichi Tsukahara, Masaki Yokota, and Takeru Sakai	
19.1	Basic Vocabulary in Project Management	255
19.1.1	What Is a Project?	255
19.1.2	What Is a Project Management?	256
19.1.3	Method of Project Planning	257

19.2	Case Study of Environmental Project	259
19.2.1	Case Study of Water Supply System Management Project: Comparative Study on Water Supply System Management Focusing on a Nonrevenue Water Ratio in Post-privatization Metropolitan Manila and Post-1950's Fukuoka City (Tsukahara et al. 2008)	259
19.2.2	Case Study of Environmental Symbiosis Project of Kyushu University New Campus Transfer Program: Water Cycle System Preservation and Biodiversity Preservation Project	265
19.3	Practical Education by Case Method Materials of Environmental Project Management	269
19.3.1	Case Method of Environmental Symbiosis and Water Cycle System Preservation, Kyushu University New Campus Transfer Program	270
19.4	Conclusion	271
	References	272
