

Contents

1	Introduction	1
1.1	Dimension of the Environment: Outer Universe	1
1.2	Dimension of Subjective Preference: Inner Universe	1
1.3	Three Stages of Human Life	2
1.4	Twilight of the Third Stage of Life of the Author: An Example	3
	References	6
2	Model of Auditory Brain System	9
2.1	Slow-Vertex Responses (SVR) Corresponding to Subjective Preference of the Sound Field	9
2.2	Electroencephalographic (EEG) and Magnetoencephalographic (MEG) Correlates of Subjective Preference of the Sound Field	12
2.2.1	EEG in Response to Change of Δt_1	13
2.2.2	MEG in Response to Change of Δt_1	14
2.2.3	EEG in Response to Change of T_{sub}	17
2.2.4	EEG in Response to Change of the IACC	18
2.3	Specialization of Cerebral Hemispheres for the Sound Field . . .	20
2.4	Model of Auditory Brain System	23
	References	27
3	EEG and MEG Correlates of Visual Subjective Preferences	29
3.1	EEG Correlates of Subjective Preferences for Oscillatory Horizontal Movements of a Single Target	29
3.2	MEG Correlates of Subjective Preferences for Flickering Light	35
3.2.1	MEG Correlates of Sinusoidal Flickering Light	36
3.2.2	MEG Correlates of Subjective Preferences for Fluctuating Flickering Lights	41

3.3	Hemispheric Specialization in Vision	41
	References	43
4	Temporal and Spatial Percepts of Sound and Vision	45
4.1	Definitions of Temporal and Spatial Objective Factors	45
4.1.1	Temporal Factors for Sound and Vision	45
4.1.2	Spatial Factors Extracted from the Interaural Crosscorrelation Function (IACF) of the Sound Field	47
4.1.3	Spatial Factors Extracted from the Spatial Autocorrelation Function (ACF) of the Visual Field	48
4.1.4	Temporal Windows of Signals for Autocorrelation Processing	51
4.2	Temporal and Spatial Percepts of Sound	52
4.2.1	Temporal Sensations of Sound	54
4.2.2	Spatial Percepts of the Sound Field	58
4.3	Temporal and Spatial Percepts in Vision	59
4.3.1	Temporal Percepts of the Missing Fundamental Phenomenon in Vision	62
4.3.2	Spatial Percepts in Vision	63
	References	66
5	Theory of Subjective Preference for Sound and Visual Fields	69
5.1	Theory of Subjective Preference for Sound Fields	69
5.2	Theory of Subjective Preference for Visual Fields	72
	References	73
6	Preferred Conditions of Temporal and Spatial Factors of Sound Fields	75
6.1	Preferred Conditions of Temporal Factors of the Sound Field	75
6.1.1	Optimal First Reflection Time After the Direct Sound (Δt_1)	76
6.1.2	Optimal Subsequent Reverberation Time After the Early Reflection (T_{sub})	76
6.2	Preferred Conditions of Spatial Factors of Sound Fields	78
6.2.1	Listening Level (LL)	78
6.2.2	Optimal Magnitude of Interaural Crosscorrelation Function (IACC)	78
	References	79
7	Subjective Preferences in Vision	81
7.1	Subjective Preferences for the Temporal Factor of Flickering Lights	81
7.2	Subjective Preferences for the Temporal Factor of Oscillatory Movements	83
7.3	Subjective Preferences for Spatial Factors of Textures	84
	References	87

8	General Theory for Designing Physical Environments Incorporating Spatial and Temporal Factors	89
8.1	Biological Rhythms and Discrete Periods in the Physical Environment	89
8.2	Theory of Designing Physical Environments	91
8.3	Interaction Between Human Development and Environment	91
8.4	House Environment as a Nonverbal Teacher for Newborns	94
	References	94
9	Design Procedures for Matrix Elements Consisting of Discrete Periods and Spatial Ranks	95
9.1	Acoustic Environment	95
9.2	Visual Environment	97
9.3	Thermal Environment and Energy Conservation	98
9.4	Environmental Design for the Third Stage of Life	101
	References	105
10	Studies on Temporal Design for Visual Fields	107
10.1	ACF Analysis of Camphor Leaves Moving in Natural Wind . . .	107
10.2	Subjective Preferences for Camphor Leaves Moving in Wind	111
10.3	Matching Acoustic Tempo with Camphor Leaves Moving in Wind	113
10.4	Studies on Temporal Design for Landscape	117
10.5	Drawing with Spatial “Vibrato” as an Artistic Expression	119
	References	121
11	Studies on Temporal Design of an Individual House	123
11.1	House with Creative Work Space (CWS)	123
11.2	Design Study of a Hillside House	125
	References	136
12	Development of the Third-Stage (Creative) Life	137
12.1	Annual Drama-Performance in a Village	137
12.2	Weekly Meeting of Children in a Village	138
12.3	An Example of Prompt Creative Talk	139
12.4	Play Area for Children	139
13	Creativity-Inducing Environments for Building Culture	143
13.1	Individual Creations	143
13.1.1	Creative Work Space (CWS)	143
13.1.2	Integrating Knowledge	144
13.2	Concert Hall	145
13.3	Design Study of an Opera House	146
13.3.1	Temporal Design	149
13.3.2	Crystal Opera House	151
13.4	Open Space for Performances	151
	References	154

14	Theory of Environmental Design and Escape from Vandalism	155
14.1	Theory of Environmental Design Incorporating Temporal and Spatial Values	155
14.2	Indication of Quick Escape from Dangerous Occurrences	156
14.3	Escape from Effects of Aircraft Noise on Developing Children	158
14.4	Sleep Disturbance by Upstairs-Toilet Noise with Changing Spatial Factors	163
14.5	Escaping Ill Social Groups and Preserving the Third Stage of Life	166
	References	169
15	Remarks	171
15.1	Remarks on Personality-Oriented Preference and Creations . . .	171
15.1.1	Remarks on Subjective Preference	171
15.1.2	Remarks on the Theory of Subjective Preference (Chap. 5) for Designing the Environment	172
15.2	From an Ill Concept “Time Is Money” to Attaining a Healthy Currency	174
	References	174
	Appendices: Duration Experience and Cyclic Universe	175
A.1	A Model of Duration Experience in Listening to Noise and Music . .	175
A.1.1	Model of Duration Experience	175
A.1.2	Unconscious Duration Experience in Listening to Aircraft Noise	176
A.1.3	Duration Experience in Listening to Slow Music and Fast Music	177
A.2	Duration Experience for Each Three-Year School Term	179
A.3	Longest Period: Cyclic Universe	181
	References	181
	Index	183

Brain-Grounded Theory of Temporal and Spatial Design
In Architecture and the Environment

Ando, Y.

2016, XXVIII, 185 p. 124 illus., 95 illus. in color.,

Hardcover

ISBN: 978-4-431-55889-7
