1	Introduction	1
	References	5
2	Historical Perspective	7
	Protandry	8
	Encounter	10
	Courtship Behaviour	11
	Copulation	14
	Spermatophore	19
	Estimation of Age	22
	Lifetime Mating Frequency	25
	References	28
3	Reproductive Anatomy	33
	Reproductive Organs in Males and Females	33
	Fecundity	40
	Eupyrene Sperm and Apyrene Sperm	48
	Sperm Migration	55
	References	59
4	Necessary Requirements for Oviposition	63
	Oviposition	64
	Nutrients Derived from Host Plants	71
	Nutrients Derived from Cannibalism	72
	Nutrients Derived from Males	74
	Multiple Mating by Females	79
	References	87
5	Mating Conflict	93
	Ejaculate Production of Virgin Males	94
	Ejaculate Production of Mated Males	95
	Nectar Feeding	98

Beyond Nectar	105
Transfer and Storage of Sperm	110
Paternity Guards	112
References	117
6 Avoidance of Sperm Competition in Males	121
Competition with Stored Rival Sperm	121
Competition with Future Ejaculates	123
Prolonged Copulation	125
Strategic Ejaculation	127
References	131
7 Sperm Manipulation in Females	135
Females of Monandrous Species	135
Control of Sperm Abundance	142
Pre-Copula Female Choice	145
Post-Copula Female Choice	147
Mating Strategy of Overwintering Females	151
References	154
8 Apyrene Sperm as a Key Factor for Sperm Competition	157
Theoretical Framework	158
Final Conflict of Apyrene Sperm	163
