Contents

Part I Introduction to Future Energy Systems Based on Feasible Technologies Beyond 2030
Yukitaka Kato and Michihisa Koyama

Future Energy System and Executive Summaries of the Parts 3
Yukitaka Kato and Michihisa Koyama

Roadmap of Energy Technologies for Envisioning Future Energy Systems 13
Michihisa Koyama, Takuya Hasegawa, and Yuya Kajikawa

Part II Multiple Aspects of Energy Systems in Japan: Present and Future Perspectives
Yuya Kajikawa

Present Status of Japan's Energy 23
Yasunori Kikuchi, Seiichiro Kimura, and Michihisa Koyama

Sustainable Production and Stable Transportation of Energy Resources: Measures Toward 2050 33
Naohito Okumura

Fukushima Nuclear Power Plant Accident and Thereafter 57
Tadashi Narabayashi

Energy Policy and Perspectives 107
Yuya Kajikawa

Part III Advanced Use of Secondary Energy Media
Yukitaka Kato

Large-Scale Electrical Energy Storage Systems 123
Shohji Tsushima

Heat Storage, Transportation, and Transfer 135
Yukitaka Kato, Hiroshi Suzuki, and Naoki Shikazono

Hydrogen Production 147
Hiroshige Matsumoto, Seiichiro Kimura, Kenshi Itaoka, and Gen Inoue

Concept of Energy Carrier, Candidate Materials, and Reactions 167
Koichi Eguchi

Part IV Energy Supply Infrastructure
Seiichiro Kimura

Electricity Grid Infrastructure 185
Hiroshi Asano

Gas Supply Infrastructure 197
Yasuhiko Urabe, Toshio Kawamura, Takashi Sakanoue, Osamu Uno, and Yoshio Matsuzaki

Infrastructure for Next-Generation Vehicles 217
Seiichiro Kimura and Hiroshige Matsumoto

Part V Electric Power Generation and Its Backend Technology
Takao Nakagaki

Thermal Power Generation 239
Takao Nakagaki

Nuclear Power Generation 257
Hiroshi Sekimoto

Nuclear Waste and Power Generation 269
Norihiko Handa

Hydropower Generation 279
Morihito Inagaki

Geothermal Power Generation 297
Keigo Matsuda

Wind Power Generation 307
Yosuke Nakanishi, Tetsuo Saito, and Ryuichi Yokoyama

Photovoltaic Power Generation 323
Masakazu Sugiyama

CO_2 Capture, Transportation, and Storage Technology 343
Ikuo Taniguchi and Kenshi Itaoka

Topic: Compressed Air Energy Storage (CAES) 359
Yoshiharu Toida

Topic: Distributed Cooperative Heat Supply System as a Measure Against Fluctuating Renewable Electricity Output 363
Kengo Suzuki

Part VI Primary and Secondary Sectors of Industry
Yasuhiro Fukushima

Chemical Industry 369
Tohru Setoyama

Area-Wide Energy Saving in Heavy Chemical Complexes Using Area-Wide Pinch Technology 381
Kazuo Matsuda

Forestry and Wood Industry 391
Kazutake Oosawa, Yuichiro Kanematsu, and Yasunori Kikuchi

Agriculture 405
Yuichiro Kanematsu, Kazutake Oosawa, and Yasunori Kikuchi

Waste-Derived Energy 415
Ryo Moriyama

Topic: CO_2 Breakthrough Program by COURSE50 in Japanese Steel Industry Sector 431
Yutaka Ujisawa, Shigeaki Tonomura, Natsuo Ishiwata, Yuki Nabeshima, and Koji Saito

Topic: Hybrid Steel Works 441
Tsuguhiko Nakagawa

Topic: Utilization of Heat and Energy by Small- to Medium-Sized Manufacturers: Case of the Molding Industry 445
Keiko Fujioka

Topic: Regional Utilization of Unused Agricultural Waste 449
Yutaka Morikawa and Masako Ito

Topic: Energy Recovery from Mushroom Culture Waste and the Use of Its Ash as Fertilizer 455
HeeJoon Kim, Tadaaki Shimizu, Itaru Kourakata, and Yoshihiko Takahashi

Topic: Organic Hydride for Hydrogen Energy Carrier 459
Yasukazu Saito and Yoshimi Okada

Topic: Liquid Biofuel Production 463
Naomi Shibasaki-Kitakawa

Part VII Commercial and Residential Energy Utilization
Mitsuhiro Kubota

Commercial and Residential Buildings 471
Takao Sawachi

Smart Community 481
Takao Shinji

Fuel Cell Combined Heat and Power Systems in Residential Sector . . . 491
Junichiro Otomo

Nanoelectronics with Low Power Consumption 507
Takashi Kimura

Topic: Thermally Driven Heat Pumps 519
Mitsuhiro Kubota

Topic: Materials for Thermochemical Energy Storage 523
Junichi Ryu

Part VIII Transportation
Yukitaka Kato

Automotive Internal Combustion Engines 529
Hiroshi Kawanabe

Secondary Batteries and Fuel Cell Systems for Next-Generation Vehicles 537
Gen Inoue

Power Electronics for Vehicles and Energy Systems 549
Takaji Umeno

Effective Thermal Energy Utilization for Automobiles 557
Hironao Ogura

Index 567

http://www.springer.com/978-4-431-55949-8

Energy Technology Roadmaps of Japan
Future Energy Systems Based on Feasible Technologies Beyond 2030
Kato, Y.; Koyama, M.; Fukushima, Y.; Nakagaki, T. (Eds.)
2016, XIV, 573 p. 302 illus., 260 illus. in color.,
Hardcover
ISBN: 978-4-431-55949-8
