

Contents

1	Introduction	1
1.1	Alternative Materials as Sensors, Antennas, and Processors	3
1.1.1	Textile Materials	3
1.1.2	Polymers	4
1.1.3	Graphene and Carbon Nanotubes	6
	References	9
2	Manufacturing Process of Thermally Unstable Partially Oriented Yarns	13
2.1	Production Process of tuPOY	14
2.2	Parametric Verification	16
	References	17
3	Thermal Unstability Analysis	19
3.1	TEM and SEM Analysis	20
3.2	Wide Angle X-Ray Diffraction	22
3.3	Nuclear Magnetic Resonance	23
3.4	Fourier Transform Infra Red Analysis	25
	References	27
4	tuPOY: Mathematical and Analytical Characterization	29
4.1	Inherent Microstress in tuPOY	30
4.2	Mathematical Science of tuPOY	31
	References	37
5	tuPOY as a Radiating Element: Antenna	39
5.1	Antenna Design	40
5.2	Microstrip tuPOY Antenna Operation	41
5.3	Operating Performance Characteristics of tuPOY Antenna	47
	References	48

6 tuPOY in Future of Computing: Internet of Things and Ubiquitous Sensing 51

6.1 Ubiquitous and Pervasive Application Design 52

6.1.1 Sensing Mechanism 53

6.1.2 Signal Transmission Module 56

6.1.3 Power Generation for On-Body Modules 57

6.1.4 Textile Antenna 60

6.1.5 UWB Signal Modulation 61

6.1.6 Back-End Receiver Architecture 62

6.1.7 Experimental Test Bed 64

6.2 tuPOY: The Final Frontier. 66
