Contents

1 Introduction: Climate Risks in the Health Sector 1
1.1 Scope: Risks, Adaptation and Public Health in Developing Economies 2
1.2 Framing the Context for Climate Risks 6
1.3 Key Regional Risks: The Current State of Knowledge 9
1.4 Managing Risks and Adaptation 12
Appendix 1: Definition of Some Key Terms 14
References 16

2 Climate Change Adaptation: The International Experience in Health 19
2.1 The Need for Adaptation 20
2.2 Criteria for Adaptation 21
2.3 The Economic Basis for Adaptation Decisions 22
2.4 Lessons from International Experience 25
2.4.1 Governance and Management 25
2.4.2 Awareness 26
2.4.3 Motivation, Information Availability and Skills 27
2.4.4 Options on Resources, Health Policy 27
2.4.5 Training and Knowledge Transfer 28
2.4.6 Institutional Capacities, Tools and Finances 28
2.4.7 Resource Constraints and Infrastructure 29
2.5 The Way Forward: Building Adaptation Capacity 29
References 30

3 Developing Economy Context for Adaptation Decision-Making 35
3.1 The Comparative Context for Developing Economies 36
3.1.1 Development and Health 36
3.1.2 Economic Situation 38
3.1.3 Disaster and Mortality Profile 42
3.1.4 Health Expenditures 46
3.1.5 Climate Related Morbidity 49

3.1.6 Current Adaptation and Mitigation Initiatives 51
3.2 Climate Change and Economic Valuation 53
3.3 Costing for Health Impacts of Climate Change 54
References 57

4 Understanding Associations: Health, Socio-economic Wellbeing and Climate 61
4.1 Climate Sensitivity and Socio-economic Factors: Heat Stress and Floods 62
4.2 An Illustration: Risk, Health and Socio-economics 64
4.2.1 Mapping Interlinkages 64
4.2.2 Data Issues in Analysing Interlinkages 71
4.2.3 Risk Analysis and Health Care Indices 73
4.2.4 Measures of Exposure, Mortality and Risk 74
4.3 Economic Losses from Disasters 78
4.4 Associations Between Risk of Mortality, Health Preparedness and Socioeconomic Index 79
References 82

5 Analysing the Interface in Indian Plans and Policies 85
5.1 Prevalence of Illnesses 86
5.2 Health Sector Programs 91
5.2.1 Diarrhoeal Diseases: A Contextual Approach to Control 91
5.2.2 Malaria: A Programmatic Approach to Control 98
5.3 State Action Plans on Climate Change 107
References 115

6 Criticality of the Field: Three Case Studies 119
6.1 Setting the Context: Health, Socio-economics and Climate 121
6.1.1 Socio-economic Indicators 121
6.1.2 Disease Profile: India, West Bengal 123
6.1.3 Projected Temperature Trends in Districts of West Bengal 126
6.2 Methodological Aspects 127
6.3 Domains of Analysis 128
6.3.1 Assessment of Current Plans and Documents 128
6.3.2 Data on Extreme Weather and Climatic Events and Disasters Experienced in the Study Area 129
6.3.3 Data on Specific Health Impacts and Their Management, Arising from Occurrence of Heatwaves, Floods and Cyclones 130
6.4 Sampling Frame and Field Area 132
6.4.1 Selection of Districts Based on Climate Parameters 133
6.4.2 Selection of Blocks and Coverage of Health Facilities 136
6.4.3 Respondents for the Survey 137

6.5 Disease Profile in the Three Districts 138
6.6 Findings 140
6.6.1 Assessment of Plans and Documents 140
6.6.2 Extreme Weather and Climate Events with Associated Health Impacts 141
6.6.3 Health Impacts, Management and Preparedness of the Health Sector for Heatwaves, Floods and Cyclones 142
Appendix 1: District-Wise Maximum Temperature Graphs (°C) 146
Appendix 2: District-Wise Minimum Temperature Graphs (°C). 149
Appendix 3: Description of the Field Study Areas. 152
Appendix 4: Maps of Districts 168
References 170

7 Conclusion: Integrating Sustainable Development and Health Adaptation 175
7.1 Key Challenges and Efforts Made 176
7.2 Sustainable Development and Health Risks: The Approach so Far 179
7.2.1 The MDGs: Health in Development 179
7.2.2 The SDGs: Climate Change and Adaptation 180
7.2.3 Disaster Risk Reduction and Health Gains 181
7.3 Adaptation Processes 181
7.3.1 The UNFCCC 181
7.3.2 INDCs: Mitigation, Adaptation 182
7.3.3 Other Initiatives 183
7.4 Key Recommendations for Adaptation Action 184
7.4.1 Surveillance and Monitoring 184
7.4.2 Funding and Technology Facilitation 185
7.4.3 Capacity Building—Institutions, Training, Awareness 186
7.4.4 Land Use Planning and Landscaping 187
7.4.5 Data Collection 188
7.4.6 Being Inclusive 190
