1	Getting Started to Explore “Integrated Nanoelectronics”	1
1.1	What “Integrated Nanoelectronics” Is About?	1
1.2	Subdivision of the Book	2
1.3	Organization of the Book	3
1.3.1	Part I: Preliminaries	3
1.3.2	Part II: CMOS Nanoelectronics	3
1.3.3	Part III: CMOS-Supportive Nanotechnologies	4
1.3.4	Part IV: Beyond CMOS Nanoelectronics	4
1.3.5	Part V: Nanomanufacturing	6
1.4	Discussion and Conclusions	7
	Review Exercises	7
	References	8

Part I Preliminaries

2	Nanoelectronics and Synergistic Nanodisciplines	11
2.1	Meaning of “Nano” and “Nanometer”	11
2.2	Nanoscience	12
2.3	Nanotechnology	12
2.4	Plurality of Nanosciences and Nanotechnologies	12
2.5	Nanomaterials	13
2.6	Uniqueness and Specialty of Nanomaterials	13
2.6.1	Quantum Size Effect	13
2.6.2	Surface-Area-to-Volume Ratio	14
2.7	Nanoelectronics	15
2.7.1	More Moore Sub-domain	17
2.7.2	More-than-Moore Sub-domain	17
2.7.3	Beyond CMOS Sub-domain	17
2.7.4	Convergence of Nanosciences	17
2.8	Spintronics and Nanomagnetism	19
2.9	Nanophotonics or Nano-optics	19

2.10	Nanomechanics	20
2.11	Nanobiotechnology	21
2.12	Discussion and Conclusions	21
	Review Exercises	22
	References	23
3	Nanomaterials and Their Properties	25
3.1	Bewilderment from a Multitude of Nanomaterial Definitions . . .	25
3.2	ISO (International Organization for Standardization) Definitions	26
3.2.1	Nanomaterial	26
3.2.2	Nanoscale	26
3.2.3	Nano-object	26
3.3	EC (European Commission) Definitions	29
3.3.1	Nanomaterial	29
3.3.2	Particle	29
3.3.3	Agglomerate	30
3.3.4	Aggregate	30
3.4	Mechanical Strength of Nanomaterials	30
3.5	Characterizing Parameters for the Influence of Surface Effects on Material Properties	31
3.6	Catalytic Effects of Nanomaterials	32
3.7	Thermal Properties of Nanomaterials	32
3.7.1	Melting Point Depression	32
3.7.2	Negative Thermal Capacity	33
3.8	Exciton Bohr Radius: A Characteristic Length for Quantum Confinement	33
3.9	Electronic and Optical Properties of Nanomaterials	34
3.9.1	Bandgap Broadening of a Spherical Semiconductor Nanocrystal: The Quantum Dot	34
3.9.2	Interaction of Light with Metallic Nanoparticles	37
3.10	Magnetic Properties of Nanomaterials	38
3.10.1	Superparamagnetic Nanoparticles	38
3.10.2	Magnetism in Gold Nanoparticles	39
3.10.3	Giant Magnetoresistance (GMR) Effect	39
3.11	Discussion and Conclusions	39
	Review Exercises	40
	References	41

Part II CMOS Nanoelectronics

4	Downscaling Classical MOSFET	45
4.1	Moore's Law	45
4.2	The Classical, Planar, Single-Gate Bulk MOSFETs	46
4.2.1	The MOS Device and its Electrical Characteristics . . .	46
4.2.2	Self-aligned Polysilicon Gate MOS Process	47
4.2.3	Self-aligned Silicide (Salicide) Process	49

4.3	Complementary Metal-Oxide-Semiconductor (CMOS) Technology	49
4.3.1	CMOS Structure and Advantages	49
4.3.2	CMOS NOT Gate	49
4.3.3	CMOS NAND Gate.	50
4.3.4	CMOS NOR Gate	51
4.3.5	CMOS Process	53
4.3.6	Shallow Trench Isolation (STI) Process.	57
4.4	Scaling Trends of Classical MOSFETs	61
4.4.1	Constant Field Scaling.	61
4.4.2	Constant Voltage Scaling.	65
4.5	Scaling Limits for Supply and Threshold Voltages in Classical MOSFETs	68
4.5.1	Subthreshold Leakage Current.	68
4.5.2	Subthreshold Slope and V_{DD} , V_{Th} Interrelationship.	69
4.6	Discussion and Conclusions	71
	Review Exercises.	71
	References.	72
5	Short-Channel Effects in MOSFETs	73
5.1	Meaning of “Short Channel”.	73
5.2	Polysilicon Gate Depletion Effect	74
5.3	Gate-First or Gate-Last Fabrication Flow	75
5.4	Threshold Voltage Roll-off and Drain-Induced Barrier Lowering (DIBL)	78
5.5	Velocity Saturation	80
5.6	Carrier Mobility Degradation	81
5.6.1	Horizontal Field Effect.	81
5.6.2	Vertical Field Effect.	81
5.7	Impact Ionization	82
5.8	Hot Carrier Effects	82
5.8.1	Substrate Hot Electron (SHE) Injection	82
5.8.2	Channel Hot Electron (CHE) Injection	83
5.8.3	Drain Avalanche Hot Carrier (DAHC) Injection	83
5.8.4	Charge Generation Inside SiO_2	83
5.9	Random Dopant Fluctuations (RDF).	83
5.10	Overcoming Short-Channel Effects in Classical MOSFETs	83
5.10.1	Avoiding DIBL Effect	83
5.10.2	Reducing Gate Leakage Current	84
5.10.3	Strain Engineering for Enhancing Carrier Mobility.	85
5.10.4	Minimization of Hot Carrier Effects.	88
5.10.5	Preventing Punch-Through	89
5.10.6	Innovative Structures Superseding Classical MOSFET	91

5.11	Discussion and Conclusions	91
	Review Exercises.	92
	References.	93
6	SOI-MOSFETs	95
6.1	Introduction	95
6.2	SOI Wafer Manufacturing.	97
6.2.1	Separation by Implanted Oxygen (SIMOX) Process	97
6.2.2	Bond and Etch-Back SOI (BESOI) Process.	97
6.2.3	Smart Cut® Process.	99
6.3	Classification of SOI-MOSFETs.	101
6.4	Floating Body Effects in SOI-MOSFET	101
6.4.1	Kink Effects in Partially-Depleted SOI-MOSFET . . .	101
6.4.2	Absence of Kink Effects in Fully-Depleted SOI-MOSFET	105
6.5	Disadvantage of SOI Technology: Self-heating Issue	105
6.6	Double-Gate, Multiple-Gate, and Surround Gate MOSFETs. . .	106
6.7	Discussion and Conclusions	106
	Review Exercises.	106
	References.	107
7	Trigate FETs and FINFETs	109
7.1	Introduction	109
7.2	Relooking at MOSFET Concept in Nanoscale	110
7.3	The Path of MOSFET Restructuring.	110
7.4	Rotating the SOI-MOSFET by 90° for Making Trigate FET . . .	110
7.5	Advent of FINFET	111
7.6	What About the Source and the Drain of FINFET?	113
7.7	FINFET Versus Trigate FET	114
7.8	FINFET Fabrication	114
7.9	FINFET on SOI or Bulk Silicon Wafers?	114
7.10	FINFET Comparison with Fully-Depleted SOI-MOSFET	121
7.11	Classification of FINFETs.	121
7.12	Impact of Random Doping Effects and Other Process Variations on FINFETs.	125
7.13	Discussion and Conclusions	125
	Review Exercises.	126
	References.	126

Part III CMOS-Supportive Nanotechnologies

8	Nanophotonics	131
8.1	Introduction	131
8.2	Diffraction-Limited Nanophotonics	132
8.2.1	Plasmonics.	132
8.2.2	Photonic Crystals.	136

8.2.3	Quantum Dot Lasers	138
8.2.4	Silicon Nanophotonics	140
8.3	Nanophotonics Beyond the Diffraction Limit	140
8.3.1	Near Field, Dressed Photons, and Nanophotonics	140
8.3.2	Relevance of Plasmonics	141
8.3.3	Exciton-Polariton Exchanges	141
8.3.4	Nanophotonic Devices	142
8.4	Discussion and Conclusions	145
	Review Exercises	146
	References	147
9	Nanoelectromechanical Systems (NEMS)	149
9.1	Introduction	149
9.2	NEMS Sensor Classification	150
9.3	MEMS Sensors Downscalable to NEMS Version	150
9.3.1	Piezoresistive Sensors	150
9.3.2	Tunneling Sensors	151
9.4	MEMS Sensors Not Downscalable to NEMS Version	153
9.5	CNT-Based Piezoresistive Nanosensors	153
9.6	NEMS Resonators	154
9.6.1	Resonator-Based Mass Sensors	154
9.6.2	Resonator-Based Strain Sensors	156
9.7	NEMS Actuators	156
9.7.1	CNT Nanotweezers	156
9.7.2	Nanogrippers	156
9.7.3	Magnetic Bead Nanoactuator	157
9.7.4	Nanoactuation by Magnetic Nanoparticles and AC Fields	157
9.7.5	Ferroelectric Switching-Based Nanoactuator	157
9.7.6	Optical Gradient Force-Driven NEMS Actuator	157
9.8	NEMS Memories	158
9.9	Discussion and Conclusions	160
	Review Exercises	160
	References	161
10	Nanobiosensors	163
10.1	Introduction	163
10.2	Gold Nanoparticle (GNP) Biosensors	163
10.2.1	Gold Nanoparticle-Enhanced Surface Plasmon Resonance (SPR) Biosensor	164
10.2.2	Gold Nanoparticle LSPR Biosensor	166
10.2.3	Gold Nanoparticle-Wired Electrochemical Biosensor	168

10.3	Magnetic Nanoparticle Biosensors	169
10.4	Quantum Dot (QD) Biosensors	171
10.4.1	QD FRET Biosensor	172
10.4.2	QD BRET Biosensor	172
10.4.3	QD Charge Transfer-Coupled Biosensor	172
10.4.4	QD CRET Biosensor	174
10.5	Carbon Nanotube (CNT) Biosensors	176
10.6	Si Nanowire (SiNW) Biosensors	177
10.6.1	SiNW Electrochemical Biosensor	177
10.6.2	SiNW Field-Effect Transistor (FET) Biosensor	177
10.6.3	SiNW Fluorescence Biosensor	179
10.6.4	SiNW Surface-Enhanced Raman Spectroscopy (SERS) Biosensor	179
10.7	Nanocantilever Biosensor	181
10.8	Discussion and Conclusions	181
	Review Exercises	181
	References	182
11	Spintronics	185
11.1	Introduction	185
11.1.1	Defining Spintronics	185
11.1.2	Spintronics and Semiconductor Nanoelectronics	186
11.1.3	Branches of Spintronics	187
11.2	Giant Magnetoresistance (GMR) in Magnetic Nanostructures	188
11.3	Magnetic Tunnel Junction (MTJ)	190
11.4	Magnetic Random Access Memory (MRAM)	191
11.5	Spin Transfer Torque Random Access Memory (STT-RAM)	194
11.6	Discussion and Conclusions	194
	Review Exercises	195

 Part IV Beyond-CMOS Nanoelectronics		
12	Tunnel Diodes and Field-Effect Transistors	199
12.1	Introduction	199
12.2	Quantum Mechanical Tunneling Across a P-N Junction	200
12.3	Nondegenerate and Degenerate Semiconductors	201
12.4	Negative Differential Resistance (NDR)	203
12.5	Tunnel Diode (TD)	204
12.5.1	TD Under Zero Bias	204
12.5.2	TD Under Forward Bias	205
12.5.3	TD Under Reverse Bias	209

12.6	Resonant Tunneling	210
12.7	Resonant Tunneling Diode (RTD)	210
12.7.1	RTD Heterostructure	211
12.7.2	Physical Phenomena in RTD	211
12.7.3	Simplified Operation of RTD	214
12.8	Advantages of RTD	216
12.9	Challenges of RTD	216
12.10	Applications of RTD	217
12.11	Tunnel Field-Effect Transistor	217
12.11.1	Recalling MOSFET Principle	217
12.11.2	Tunnel FET Principle	217
12.11.3	Tunnel FET Structure	217
12.11.4	Tunnel FET Operation	218
12.11.5	Participation of Valence and Conduction Bands in Tunnel FET Operation	218
12.12	Discussion and Conclusions	220
	Review Exercises	220
	References	221
13	Tunnel Junction, Coulomb Blockade, and Quantum Dot Circuit	223
13.1	Introduction	224
13.2	Coulomb Blockade in a Nanocapacitor	224
13.2.1	Energy Required to Transfer a Single Electronic Charge	224
13.2.2	Change in Energy Stored on Electron Tunneling	226
13.3	Effect of Temperature	228
13.4	Correlation of Uncertainty in the Number of Electrons with Capacitor Size	229

24.8	DNA Nanoengineering	411
24.8.1	DNA Structure.	411
24.8.2	DNA Origami	413
24.9	Self Assembly of Nanocomponent Arrays on DNA Scaffolds.	414
24.10	Self-Assembled DNA Scaffolds for Nanoelectronic Circuit Boards	414
24.11	Discussion and Conclusions	415
	Review Exercises.	415
	References.	417
25	Nanocharacterization Techniques.	419
25.1	Introduction	419
25.2	Scanning Probe Microscopy (SPM)	420
25.2.1	Near-Field Scanning Optical Microscopy (NSOM).	420
25.2.2	Scanning Tunneling Microscopy (STM)	420
25.2.3	Atomic Force Microscopy (AFM)	421
25.3	Electron Microscopy	424
25.3.1	Transmission Electron Microscopy (TEM)	424
25.3.2	Scanning Electron Microscopy (SEM)	425
25.3.3	Field Emission Scanning Electron Microscopy (FESEM)	425
25.3.4	Focused Ion Beam Scanning Electron Microscopy (FIB-SEM)	427
25.3.5	Specimen Preparation for Electron Microscopy	427
25.3.6	Electron Microscope Upkeep and Maintenance	427
25.4	X-Ray Techniques	428
25.4.1	Energy Dispersive X-Ray Analysis (EDX)	428
25.4.2	X-Ray Powder Diffraction (XRD)	428
25.4.3	X-Ray Photoelectron Spectroscopy (XPS)	429
25.5	Fourier Transform Infrared (FT-IR) Spectroscopy.	430
25.6	Ultraviolet and Visible (UV-Visible) Absorption Spectroscopy.	432
25.7	Raman Spectroscopy.	433
25.7.1	Resonance-Enhanced Raman Scattering Spectroscopy	435
25.7.2	Surface-Enhanced Raman Scattering (SERS) Spectroscopy	435
25.7.3	Confocal/Micro Raman Spectroscopy	436

25.8	Photon Correlation Spectroscopy	436
25.9	Zeta Potential Analysis by Laser Doppler Electrophoresis	437
25.10	Laser Doppler Vibrometry (LDV).	438
25.11	Discussion and Conclusions	440
	Review Exercises.	440
	References.	442
Index	443
