

# Contents

<b>1</b>	<b>Introduction and Rationale</b> . . . . .	1
	Layout . . . . .	3
	How to Use the Book . . . . .	4
	Abbreviations . . . . .	5
<b>2</b>	<b>Methods in Taphonomy</b> . . . . .	7
	Collecting Methods for Fossils and Artifacts and Their Effects on Taphonomic Results. . . . .	7
	Surface Collection . . . . .	7
	Excavation . . . . .	7
	Collecting Samples for DNA Taphonomy . . . . .	9
	Histology and Preservation . . . . .	9
	Modern Analogues and Experimental Field/Laboratory Projects . . . . .	10
	Long Term Monitoring Studies . . . . .	11
	Monitoring Studies of Small Mammals . . . . .	11
	Preparation Methods. . . . .	11
	Equipment Used in Taphonomic Research. . . . .	13
	Summary of Localities Sampled . . . . .	16
 <b>Part I Surface Modifications</b>		
<b>3</b>	<b>Linear Marks</b> . . . . .	25
	Agents and Processes . . . . .	25
	Characteristics . . . . .	25
	Description of Linear Marks . . . . .	25
	Inorganic Linear Marks with V Shaped Cross-Section Made by Stone . . . . .	26
	Linear Marks on Teeth . . . . .	31
	Organic Linear Marks with U Shaped Cross-Section Made by Animals. . . . .	31
	Incisor Gnawing . . . . .	31
	Canines and Premolars/Molars . . . . .	32
	Linear Marks Made by Beaks of Raptors . . . . .	33
	Linear Marks Made by Insects. . . . .	33
	Organic Linear Marks with U Shaped Cross-Section Made by Plants . . . . .	33
	Atlas Figures . . . . .	35
<b>4</b>	<b>Pits and Perforations</b> . . . . .	101
	Agents and Processes . . . . .	101
	Characteristics . . . . .	101
	Morphology of Pits and Perforations. . . . .	101

Organic Processes Producing Pits or Cone-Shaped Perforations . . . . .	102
Size Distributions of Pits and Perforations . . . . .	103
Insect Damage . . . . .	108
Plant Roots . . . . .	109
Inorganic Processes Producing Broad-Based Perforations . . . . .	109
Asymmetric Perforations . . . . .	110
Organic Processes Producing Broad-Based Perforations . . . . .	110
Perforations from Chemical Attack . . . . .	110
Atlas Figures . . . . .	112
<b>5 Discoloration and Staining . . . . .</b>	<b>155</b>
Agents and Processes Affecting Bone Color . . . . .	155
Characteristics . . . . .	155
Inorganic and Organic Modifications . . . . .	156
Black Staining . . . . .	156
Brown and Black Variable Staining . . . . .	157
Red Staining . . . . .	158
Atlas Figures . . . . .	159
<b>Part II Modifications Affecting Shape</b>	
<b>6 Abrasion and Rounding . . . . .</b>	<b>169</b>
Agents . . . . .	169
Characteristics . . . . .	169
Inorganic Processes . . . . .	170
Degree of Abrasion . . . . .	170
Polishing . . . . .	176
Brightness . . . . .	176
Location of Abrasion . . . . .	176
Atlas Figures . . . . .	178
<b>Part III Modifications Penetrating Bone Tissue</b>	
<b>7 Flaking and Cracking . . . . .</b>	<b>201</b>
Agents and Processes . . . . .	201
Characteristics . . . . .	201
Inorganic Flaking and Cracking . . . . .	201
Cracking of Surface Bone . . . . .	201
Flaking of Surface Bone . . . . .	205
Organic Cracking . . . . .	205
Atlas Figures . . . . .	206
<b>8 Corrosion and Digestion . . . . .</b>	<b>235</b>
Corrosion . . . . .	235
Agents and Processes . . . . .	235
Characteristics . . . . .	235
Location of Corrosion . . . . .	236
Depth of Corrosion . . . . .	237
Degree of Corrosion . . . . .	238
Digestion . . . . .	238
Agents and Processes . . . . .	239
Characteristics . . . . .	239
Location of Digestion . . . . .	239

Degrees of Digestion . . . . .	239
Depth of Digestion . . . . .	242
Effects of Enzymes and Acidity . . . . .	243
Mineral Composition . . . . .	243
Atlas Figures . . . . .	245
 <b>Part IV Modification by Loss of Bone Tissue or Skeletal Elements</b>	
<b>9 Breakage and Deformation . . . . .</b>	<b>283</b>
Agents and Processes . . . . .	283
Characteristics . . . . .	283
Morphology of Breaks . . . . .	284
Fracture Outline . . . . .	284
Fracture Angle . . . . .	284
Fracture Edge . . . . .	284
Peeling . . . . .	284
Shaft Circumference of Limb Bones . . . . .	284
Fragmentation . . . . .	286
Breadth/Length Ratios of Fragments . . . . .	286
Extent of Shaft Fragmentation . . . . .	286
Relative Proportions of Articular and Shaft Fragments . . . . .	287
Relative Proportions of Isolated Teeth and Teeth in Jaws . . . . .	287
Deformation . . . . .	287
Modification of Articular Ends . . . . .	287
Modification of Diaphyses . . . . .	288
Distortion of Rounded Bones . . . . .	288
Atlas Figures . . . . .	289
<b>10 Disarticulation and Completeness . . . . .</b>	<b>311</b>
Agents and Processes . . . . .	311
Characteristics . . . . .	311
Patterns of Disarticulation . . . . .	311
Human Burials . . . . .	314
Atlas Figures . . . . .	317
 <b>Part V Conclusions</b>	
<b>11 Why Taphonomy? . . . . .</b>	<b>327</b>
Concluding Remarks . . . . .	331
 <b>References . . . . .</b>	 <b>333</b>
 <b>Figure Index . . . . .</b>	 <b>341</b>
 <b>Index . . . . .</b>	 <b>355</b>

Atlas of Taphonomic Identifications

1001+ Images of Fossil and Recent Mammal Bone  
Modification

Fernández-Jalvo, Y.; Andrews, P.

2016, IX, 359 p. 1131 illus., 311 illus. in color.,

Hardcover

ISBN: 978-94-017-7430-7
